## // Background

*... the most successful man in life is the man who has the best information.- Benjamin Disraeli\_*

I've diverse careers. I accredit that to my ability to work with **logic** and **computers**. Computers can do my accounting, correspondence, manage large data bases of people and information and do skilled work; finding, manage, retouching and publishing photos, articles, and manage vast resources and research through the internet.

For those who help my research, I require, simply; Can you read, think, type ! Why type ? If you can type, you can speedily form and focus thoughts. You can ask questions, seek and gain help from others. You can connect to a vast world through e-mail and the internet. Any other method pales in comparison to your efficiency, speed, and command.

My autobiography is at book end, but this book stands not on credentials, but on logic. I appeal to you, strictly from **logic and clear thinking** to embrace and apply some of the **simple logical search techniques** I've found and used to uncover a very different world, **a New Reality**. **Begin your Quest !**

## // Synopsis - An abbreviated outline

*Fundamental information can lead to basic truth.*

Language limits consciousness.

*We can find unknown truths. The truth will set you free.*

*John 8:32*

Language is word, symbols, a pointer to name something. We cannot think or consider something unless we can name it, i.e. language. Thinking is the process of perception, consideration, evaluation, judgment, recording, remembering and telling another. Thinking deals in language. Thinking can combine simple things to greater, more complex thoughts.

**We see (only) what we know**, yet **we can learn** and then see new things, new relationships, new causes.

Until something is seen and named, it is unknown to us. Only what we have named (or learned a name) do we see. Before consciousness, before we know it by a name or description, we hardly see it. Without seeing it, we cannot consider it. We cannot think about it nor discover, nor gain advantage from it. It simply does not enter, reside, or speak from our consciousness until we see and name it.

Language frames human consciousness through; word, image, video, audio, model, drawing, equations, choreography, schematics, etc. Mostly what we know (learn), we get from others, those we trust, believe or accept. Most people follow popular thought, which is accepted by their peers. A few seek broader perceptions through books, web sites, videos, travel. The broader your perception, the more probable you reach a deeper truth.

Great forces, elite people with vast money and power, control our lives by **limiting** our thinking. Their loud and repeated statements dominate our consciousness, are reflected in news, education and history. Few stand free of their dominate voice to look deeper. Those free thinkers, not bound by convention, are constantly beaten down, ignored, drowned out by these might forces, the dominate voices which control information to advance their own agenda. The chapter on **Thought Print** is **the soul of this book**. Anyone 12 or older can **know the truth** quickly & easily.

**None are more hopelessly enslaved** than those who **falsely** believe they are **free**. - Johann Wolfgang von Goethe ... "

Americans believe they are free because many

pundits say we are, but, in fact, we are quickly loosing our freedoms and liberty. Great liberating discoveries in science, medicine (cures) have been available for decades, but they are suppressed from public consciousness. A few discover and speak of these truths but are quickly drowned out by the dominating voices of main stream media.

A super elite, the New World Order, is rising quickly to crush the sovereignty of nations, and individuals, to force all people to submit to their will and control. When we ignore the abundant information and truths that surround us, that allows them to completely control of our lives; of our finances, property, rights, freedom, and even our thoughts.

Once you get a glimpse of the much larger world available to us, some choose to fight and proclaim this vision to others. It is exciting and liberating. Knowledge is power. It is both empowering and a burden of responsibility. Lack of knowledge is enslaving.

Men occasionally **stumble over the truth**, but most of them pick themselves up and hurry off as if **nothing ever happened**.- Sir Winston Churchill\_

## // Why I write this book

*In Feb.'05. I heard new things about 9-11.*

It led me to a web site that showed a short video that presented unsettling information about 9-11. The site suggested concepts like these;

- the hole in the Pentagon was only 18' wide yet was supposedly caused by an airliner 135' wide, and no plane parts or wreckage were found there,
- similarly, the crash site at Shanksville was only 15 by 20' where another huge airliner was said to crash,
- the collapse of the World Trade Towers happened in less than 9 seconds, with tale-tale evidence of explosives in the building, and many other incredible statements to disturb the memory I had of that event.

Of course, I **already knew** what the message said **could not be true**, but I accepted it as a challenge. From that point, I began first a simple inquest, then my full fledged research on What Really Happen on 9-11.

I've been an architect, a published writer and poet, a wordsmith, and a mathematician, which hones my sharp logic and computer skills. I think and type fast (they are related). I slice through tomes of information

quickly and use internet to great advantage. In brief, information comes from many sources; news, internet, books, universities, etc. Not all of it is either truth or complete. Most people want some high authority or popular source to tell them what is true or important. I find it is pretty easy to figure it out yourself, if you just **read widely**.

So I go to the internet to explore 9-11. I search: *9-11 World Trade Towers Demolitions*. Bang ! I find 4 million links. What the heck could all these people be talking about ? As I began to review the articles, news reports, web pages, etc., I find some are ranting, lacking clear discussions and clear information, but among them, there are engineers, architects, scientist, researchers, many studied and scholarly people who have an abundance of facts, physical evidence, public records to support their claims.

This book will show you the magic, the insight and the dependability of the **internet**. I'll cover that later. **Knowledge is power !**

Many people know that prominent authorities say 9-11 was an act of foreign terrorist. I think most of them just echo the shallow information they hear. They do not do independent research. The more I read and research, the more the Official Story simply dissolves.

Key elements, concepts, facts, evidence, as shown in various national main stream publications, i.e. the Official 9-11 Story, is clearly refuted in public records, by convincing and clear evidence, articulated by credited, scholarly professionals.

In simple review, I read for some hours, then 10s of hours, then hundreds of hours, and now over 1,500+ hours. I did not inquire of my associates. They have certainly not read deeply. They rely simply on the widely circulated news, and government reports. They do not know the findings of these suppressed professionals and scientists.

I read over 2,000+ articles from many diverse sources. I was hoping to prove the Official Story presented by government through national media was true. But the more I looked, the more I found the source information, eye witnesses, facts and evidence diverged greatly from the official story. I did my research alone, outside of the influence or dialog with others. I referenced diverse sources.

Who am I to question our authorities ? Did our authorities see and discount the primary evidence ? They must have never seen or simply ignore the primary evidence. Could this evidence be true ?

I've searched widely to find a **crowd of witnesses**, many professionals who know and proclaim these facts. Thousands of us are shouting to have our authorities do a new unbiased 9-11 Investigation. ReOpen911.com

Historically, I've only paid modest attention to news. I spend little time reading or watching news. I primarily spent my time in the learning; - subjects of professional interests, - learning how to study, learn, research, developing computers and software to aid my research. I enjoy books discussing thinking.

Research is a field I have practiced and honed in recent decades. I have the ability to get information from many sources, in many forms; such as shortwave broadcasts, mp3, videos, public records and more.

On 9-11, I didn't understand how the truth I'd found could be so different from nationally reported news.

I've observed in local news, initial reports are often ignored or changed when summarized in national news. I thought they were correcting mistakes. I'd never thought they would be covering exposed truths.

Then I studied **how our news industry works**. In recent years the legislation on media has been changed significantly. Where we use to have

hundreds , even thousands of news agency owners nationwide. Yet today our current national media is controlled by just 9 corporations. I've read books that discuss these changes Censured 2001, ... 2002, ... 2008 – These books & web sites list hundreds of articles **prepared** for broadcast and publication, yet **pulled** before they could run.

**Conspiracy of Silence**, a documentary on Satanic Cults and the CIA, prepared by BBC, including 27 year FBI vet, Ted Gunderson's evidence **was listed to show nationally** in TV Guide, then (members of Congress ?) purchased the rights. It was removed from the TV schedule and was never broadcast.

As I do extensive reading and research, I've built an **incredible library**, in many forms, including hundreds of books, video, audio broadcast. I have acquired, reviewed and posted my findings in summaries with direct access to the source information and evidence through my web site - - more at [www.abodia.com/b](http://www.abodia.com/b) - - I cannot physically copy and distribute all that I have (cost, time, effort), but by using the internet, I can share with many. I've had my web sites for decades – to share information.

My simple conclusion is there are powerful people and organizations who control us simply by controlling

the information we get. Sure there are controlling forces in the world, using guns, prisons and torture, but on a far greater scale are the unseen and undetected, powerful forces who control most of us, by simply controlling the information we get and the assumptions we hold. Suppressing information empowers them, and enslaves us. The truth will set you free.

This book opens a window to see that control. Learn how you can discover these hidden truths and react accordingly. You can learn to **Pierce the Veil of Secrecy**. I did. I'm not smarter than others, I just don't live in assumptions. I spend thought, time and energy to know a deeper truth.

This has been the most serious and strenuous journey, discover, revelation I've ever undertaken. The conclusions are startling and important to us each. Please suspend your former conclusions, your judgment, and learn how to inspect source information so you too might realize what is happening around us.

More than just trying to share with you the revelation I've discovered, I try to show you simple techniques so you may learn to **independently investigate** information to reach your own conclusions, not cluttered by main stream news, or

popular opinion.

I realized we have been completely deceived about what really happened on 9-11. The facts are very different than popularly considered, debated or perceived. I wondered if this deception could touch any other subjects.

To my horror, I found the control of information, and the illusion we are free country, open to free speech and free market forces, is a vast delusion keeping us from questioning the world around us.

To find and learn the truth is really not that hard. At first, I was depressed and saddened to know the truth was different than I had been taught. I was alone and isolated as others around me will not look at the obvious facts. Yet, by persevering, I've found thousands of people who have awakened to the realities around us. They have been a great light to me in understanding what is happening in America.

So don't be disheartened. After you take the brave step to inspect your world and what you thought you knew, be emboldened, enlivened and energized to see the reality that has eluded us.

**An unexamined life is not worth living. - Socrates\_**

If you would be a real seeker after truth, it is necessary that at least once in your life you **doubt**, as far as possible, **all things**. - Rene Descartes\_

These are exciting times. Knowing what we know, meeting, reading new authors, researchers, patriots should make your life better in many ways.

I admit, four years ago, I had no interest in conspiracies, government, history, yet today, it is the fiber of my life. I fight with all my strength to find and know truths and to share them with others to consider. The very perseverance of our liberties hangs in the balance, greatly threatened by the apathy around us, while draconian force deceive us.

I would not have thought it's possible to know what we have learned, yet simply, persistently: ask, seek, knock, as Christ said. Ask and it will be given you, Seek and you will find, Knock and a door will open. Good Luck in your journey !

## // A Crowd of Witnesses

*... you'll find when you're curiosity, open,*

and learn how to investigate.

That's the genesis of this book. The realities around us are kept from us by the main stream media by their diversion, distraction and lack of focus on real issues. I will show you – what, - when, – who, - why, - where and - how.

I realized I can think and reason (unlike those around me living in assumptions), I find things most people never see, including the spokesmen who repeat the Official 9-11 Story. I wondered, "Could this vast deception happen in other fields ?"

Yes, it has been for decades, even centuries.

We live in a world of information. Depending on your ability to get information, your world is either small, controlled, limited, or expansive, free, and open.

Simply your ability to read (and think) can catapult you to new, unforeseen perspectives.

There is **good news** (cures, free energy, incredible sciences and discoveries) and bad news - **New World Order**, Real ID, micro chipping - tracking every human - in location, action, property, and thought, etc.

You can explore the good or the bad, but you can discover a reality most people reverently avoid. It is not that bad ! Simply knowing what is going on brings me great peace.

We no longer need to be deceived, but you personally must develop your own ability to read, think, type !

Otherwise, you will be beholden, be enslaved to those who want to control; - your life, - your labor, - your property, - your rights to submit to them, to raise them in power, control, and wealth. You yield to them when you are not responsible to figure out the reality surrounding you.

## // A Call to Arms

*By **reason**, not **assumption**, we should view our world.*

*I'm gathering those who can read, think, type (i.e. ask questions).*

We need to find and gather those who will **respond** and who will **be responsible** !. We need not be deceived by those around us, nor submit to their deceptions, if we know the deeper truths.

In America, our US Constitution guarantees us the right to Free Speech (to think) and to assemble. If we yield and or abandon these rights, surely we will lose them.

Together we can stand (against lies & deception).  
Divided we will fall.

A few try to control the many. They promote diversity, argument, division, so they may prevail. When we submit, we are defeated. When we reason, (think), talk, assemble, we can endure, stand and prevail. **But reason we must !**

## // How to Use This book

*Read chapters at random, but best if read in order.*

I hope this book reads like a letter to a friend. We must learn to work together. Authorities above us work together to control, limit us.

If you read this book in order, you'll better understand my development of thought.

Complicated concepts can be broken to simple premises. If you elude the foundation, you may not see the bigger picture, the relationships, the more complex whole.

**We see what we know**, (and don't see what we have not learned.) But we can **learn**, and then see things we had not seen – ideas, organizations, purpose, meaning, relationships. **Learning liberates us** from our **limited knowledge**.

You, I and everyone thinks differently. Others may want me to furnish more detail, or less, I try to say just enough to get you started. If you want more you can contact me, my web site, or better, learn and do your own research.

Our world, our reality is the sum of what we've

learned, figured out, or assume. Most accept information from their news, peers and neighbor. I go much deeper, looking at deep resources, easily available through the internet, books, foreign news, etc. I try to think openly, not to be limited by my peers, news, not staying in a local or popular crowd. I follow my thoughts, rather than be bound by a newscaster or a group.

From my web site, [www.abodia.com/t](http://www.abodia.com/t) you can learn much deeper concepts, facts, evidence and many book marks to lead to deeper research. This portable writing is but an **introduction, a window how to see a much deeper, complex world** then most have had even envisioned.

## // Man is social animal

He wants to be accepted, appreciated, admired by his peers. Many have formed friends and adapt to their thinking. I try to find truth, then seek those who share that goal. I have friends, associates, but I build from truth, not from whatever coincidence has connected me to people.

There will be chapters and concepts in this book new and foreign to you. You can learn new things. Many skip or ignore something they don't understand, or that seems unbelievable, irrelevant or unrelated. Suspend judgment, consider the deeper facts before reaching your conclusions.

*[ be ]... slow to judge others." Luke 6:42\_  
Everyone should be quick to listen, slow to speak and slow to become angry, for man's anger does not bring about the righteous life that God desires.- James 1:19-20\_*

You can skip anything. I don't prove my points here (I can through thousands of resources I've gathered many at [abodia.com/T](http://abodia.com/T) ). For this book, I'm only **introducing ideas** and concepts. You can learn deeper details through my web sites or other sources, once you are aware of the key issues.

When I study a new subject, I may review some things several times, to try to understand them. Sometimes a different author who speaks on the same subject can make a point more clear to you or me.

In reading a chemistry book, I may read a chapter on bases (alkaline) and acids. Perhaps I don't understand what the author says, his illustrations and his analogies. So if I find another chemistry book and read about bases and acids. I may understand the 2<sup>nd</sup>, 3<sup>rd</sup> or 4<sup>th</sup> author better. Then I may return to my original book, with a **new awareness**. Then I may even understand the first chemistry book.

So every author, presenter has a unique perspective. You may find another who speaks more in your terms, language, images, examples. **To unveil** a subject, stay on the subject until you find someone who can illuminate it !

The **more** you learn of anything, the **deeper** you can learn. You cannot grasp the deep, complicated concepts, until you first consider and understand the basic ideas. *Crawl before you walk.*

This books tries to teach how to learn, how to think,

how to find, confirm and establish a durable truth.

Although is it filled with particulars, which you may accept or reject, it is trying to teach you how you can easily delve deeper into any subject. Your curiosity may motivate you to spend the time and energy for greater understanding. You can do it. You do not need a group nor a single source.

**Knowledge is framed in language.** Your ability to work with language will determine what you can deal with; books, charts, video, audio recordings, histories, internet. Sometimes even the words block your progress, like legal language. If you persist, you can understand nearly anything, but some things actually require you learn a sub set of other things, like legal terms, to have the foundation to understand your subject.

To understand anti-gravity, free energy, and new phenomena you have to consider new sciences and math that are neither taught or embraced by our current academia. They are real and have real benefits, but most have never heard of them, because the main stream media has blocked or suppressed information about them.

## // Mainstream - Thought Control –

*Our world is built on information.*

What we see and know determines how we act.

### **News, TV, books and movies**

Most follow what is commonly known. Most follow the crowd.

I studied 9-11 to find that most of what I learned from government, from main stream media was incomplete and lacked the comprehensive reports and facts I find and easily verify from public and published sources.

When I learned I could know better and deeper, I re-examined how I was limited in my original understanding of 9-11. I had let the mainstream news be my only basis of understanding, virtually sealing my thinking from any curiosity to know more.

I thought high authorities had reviewed the situation and widely published their findings. No element of discord, or alternative view ever reached me, nor did I suspect to look for one.

Later, I realized what the news said was clearly wrong and incomplete, I had accepted it and **closed** my eyes, my thinking, based on my **first impressions**. Now I know the news was wrong, incomplete, misguided. I see the world's system (main stream thinking) is intent to set first impressions, and transposed them into history and text books.

I wondered who does sort out history ? Who does find and maintain a record of truth ? These thoughts have propelled me on a circuitous journey, but I have emerged on the other side, as a new person with a new vision.

Why do you tell any one anything ? Why does anyone speak ? Mostly, we tell others information that somehow benefits us. Information that does not, in some way help or benefit us (or friends, colleagues), we discard, forget, ignore.

So it is with main stream news. It speaks to serve those who own them, but not necessarily revealing all the news it may get, as some of the news may be damaging to those who own the news agency.

The press forms an *illusion of facts* and controls

public opinion. Who owns the press ?

What is the history of this control over news ?

In 1917 the Congressional Records Oscar Callaway explained how agents for the Morgan banking interest hired news editors to buy out the editorial rights to the nations leading news papers and placed an editor in each location. Although the newspapers get much information, this editor, this gate keeper controls what information they print. This policy and technique has advanced with us to this day. The CIA and President Bush specifically have placed false or misleading articles in newspapers to advance their own agenda. In the 1950s this program (government controlling news) was called Operation Mocking Bird. **Confirm:** Search internet: *Oscar Callaway 1917 Congressional Record Morgan news, or **War of Word** at [www.abodia.com/t](http://www.abodia.com/t)*

We once had a diversity of thousands of newspaper owners in America, as the Federal Communication Commission required. FCC use to limit an owner to one news service (newspaper, TV) in a region, to allow different owners to serve the region, possibly with opposing views. Changes in the FCC

regulations have allowed individual owners or corporations to buy up many agencies; publications, radio, TV, ... for any region to have monopolies of news. This squashes competition and opposing voices. News was once competitive, vying for truth. Now it is controlled, biased without counter claims.

Now in American, just 9 corporations, like General Electric, Via Com, Time Warner, own and **control** virtually 95 % of our main stream **thought** – including newspapers, TV, movies, books, text books. They control our thought primarily by **eliminating** many subjects from consideration. (The internet, *so far*, has been comparatively exempt from this draconian control.)

To understand, or believe some of my ideas, you may need further research or proof. My web sites has this greater work easily available. Turn there for proof. [www.abodia.com/t](http://www.abodia.com/t)

We do not have a representative government (as we assume), one that is responsive to We the People. It appears we do, we are told we do. The politicians meet, greet, talk to us, but inevitably they respond and do the will of those who place and keep them in office.

Who is that ? The media is their voice, who are their owners ?

The global elite, the international bankers virtually own most of the corporations, including the news media. By the media, they shape our reality, shape (limit) our thought. They largely influence (control) who is elected to our representative government.

These high, mighty and hidden forces exert an unseen hand on our politics, government, courts, media. Once you realize this, you can begin to look outside of their control.

Their trend is to concentrate power and control. It is happening in all fields; food, money, banking, medicine, drugs, military armament.

So those we think we elect to protect us are now but the minions of the corporations who own the news and control much of our lives.

Wm. Milton Cooper, a great patriot, researcher, retired military, writer of **Behold a Pale Horse**, shares this incredible insight. We elect our politicians to eliminate our problems. The media use to be the last

watch dog to ferret out our problems for public debate. But now, what is the easiest way to eliminate a problem - drugs, crime, finances, pollution ? The easiest way to eliminate these problems is simply to remove them from public consciousness, from consideration. *Behold a Pale Horse* (available free through [Scribd.com](https://www.scribd.com) – a **free**, public resource of 10s of **1,000s of books** & documents.).

So the press, which is controlled by the global elite - the global corporations, controls the thinking of the America people. The media can convince us our politicians are serving us, by removing from our consideration, the continuation and expansion of our on going problems.

What are these problems ? war, financial catastrophes, pollution, graft, ... ways the corporations make huge profits. Issues that are concealed from the eyes of the public. As we are **not informed**, but *deceived to think we are informed*, then the great evils continue, even expand without public thought or perception.

All that is necessary for the triumph of evil is that good men do nothing. - Edmund Burke\_

The elite who run our world, change our perception of the world. They advance the politicians who are submissive to their will. They influence news to focus on some subjects, perspective, and to ignore others.

We thought we elected politicians to solve our problems, when in fact those who control our thinking, simply remove the reports of the problems from the news – so we don't think of those problems.

It would seem that the national press is failing us, but they, like the politicians, are just following the will of those (the global elites - corporations) who own and control them.

Main steam controls our thought, our perception, our consideration and debate. They control news, books, histories, education. They eliminate important considerations from our thought. They control popular opinion.

Those who venture out, consider things beyond the main stream press have a chance to see real information, real conditions, make great discoveries; inventions, cures, free energy and more, but most people and organizations criticize and mock them,

because they themselves cannot / will not look beyond the main stream, popular news, the world of information that is tightly controlled by the global elites who own our world.

Why are we controlled by main stream ? Because we want to fit in with others be compatible in thought and action. Let's learn to follow our own conscience. Perhaps we will inspire and lead others.

The **news controls our lives, not the politicians**. The politician are down stream from the elite forces who control us all, the wealth & power of the secret government, the 13 banking families, the elite who rule our thoughts.

## // Thought Print- Search Quoted Phrase

*This chapter will empower you.*

**This simple idea can help anyone immensely !**

A **Thought Print** is like a finger print, voice print or eye scan, which can identify something uniquely. It's a **unique or uncommon series of words in a particular order**. Search internet for a "unique phrase" quoted or a Thought Print to quickly find an exact copy of an article, document, book.

Find information or hidden truths easily !

Searching for a **TP** enables you to quickly find an exact copy of an article, document, book if you just quote "a unique phrase" found in the document you seek.

**Quote a phrase from any document** you have, or saw, or read. Quote something directly from the text, not similar, exactly from the text. I look for a "unique quoted phrase", something sort of uncommon.

Say you seek a book, article, government form, most anything. If you have ever seen it, look through it and find a relatively unique phrase like; General Macarthur crossed the Rhine river in August, not a

common phrase like "the man crossed the river."

Now search the internet for that "quoted phrase" so it must find that **sequence of words in that order**.

Voila ! In just a few seconds you will probably find multiple source to works that contain he phrases and probably what you seek. Once you find it you can read, print, copy, save, or send to others (the link or the file).

If you look for a book or article title or an author, you often find web sites that try to sell or discuss the book or article, but not the actual text.

I have found **out of print books** and many books that I own now on the web.

I don't quote source anymore because it is so easy for anyone to find things !

You can search the web's billions of files and find what you want in 30 seconds !

Here's an example, An e-mail mentioned this article. I quoted a phrase from it and searched the iNet.

"On October 17, 2006 Congress allowed the president" - **Google Search** finds:

#### 4. [American Civil Liberties Union - Find Habeas:](#)

"habeas corpus poster On October 17, 2006, Congress allowed the President to sign away a fundamental constitutional right. On April 18, 2007, start bringing ... " [action.aclu.org/site/Ecard?ecard\\_id=3921](http://action.aclu.org/site/Ecard?ecard_id=3921)

Punctuation and capitalization are ignored in searches, but the words have to be spelled the same and in the same word order.

One can remember or write down **long complicated web sites**, but quote an unusual phrase for simple way to refer to document.

#### // *Why a Quoted Phrase finds hidden things*

Consider 2 letters, **A** and **B**, Consider **2 spaces** to write them. List all combinations; **AA, AB, BA, BB**  
2 letters, 2 spaces =  $2 \times 2 = 4$  combinations.

How many vocabulary words do you find in newspaper or Junior High School? Perhaps 10,000 ?  
So in reading a news or magazine article, each word used is chosen from 10,000+ words.

2 words in a sequence, is 1 chance in 10,000 times  
10,000 possibilities or 1 in 10,000,000 or 1 in  $10^8$  to

find those 2 words in that order.

5 specific words in a row, with each word in a particular place, yields 1 in  $10^{4 \times 5}$  or  $10^{20}$

If you do a search and list words; The Quick Brown Fox. you'll find links where any of the words, or word combinations may be found:

quick, ... brown fox, ... the quick, ... Brown River, ...  
quick fox, ... quick sand, ... fire fox ...

If you quote at beginning and end of the phrase, a "quoted phrase", "Col. Wilson leaped from the Silver Bridge to the Rhine".

You limit searches to only documents that include the **specific words in the specific order**.

Take 5 to 7 **unusual** word sequence. Do use, "Major Armstad crossed the Nile River in August."  
Don't use, "The man crossed the road."

In an unusual phrase, of 5 to 7 words, you will find only a few document which contain that phrase.

I call this a **Thought Print**, a particular phrase used by a writer in a written work.

In searching for any document, report, book, article, if you search for a 5+ word quoted phrase, or even two different 3 word quoted phrases, you may quickly find the original article, book, court case referenced by the phrases (if it is on the internet- many things are).

There may be billions of documents on the internet. Not all things are there, but many are. With these short phrases searches, you are able to quickly find a confirmation or multiple references to the document in question.

Searching for a quoted phrase, you may find the full article, book, or report. From there you can read, print, copy or e-mail to others. This is a simple but powerful way to determine if things are true.

You may not believe something because people / institutions you know and or news you read does not agree, but if you search the internet, you may find some reputable source that you accept, or such a crowd of witnesses, many people and sites repeating something, that you would be hard pressed to deny it.

Read the web site addresses, to ascertain a **reputable source**; Cornell Law Library, New York Times, etc.

Find a **crowd of witnesses**, many links, many web sites which confirms a quote or a document is a way to find or confirm a thing is true, authentic, genuine.

### **// Additional Search Techniques**

One can write down long complicated web sites, but an easier way to refer to them is to **quote a phrase from it, or from any document** that you have, or saw, or read, then do an internet search (like Google, Alta Vista, ...), with a quoted phrase.

Punctuation and capitalization are ignored by most search engines (Google), but the words have to be **spelled** the same and in the same word order.

You can use a "short quoted phrase" and add other terms, Eisenhower ... Paris ... Treaty ... to be found in the article, but not directly in the sequence.

These brief searches can penetrate to the most secret hidden things, in seconds.

Also **search for concepts** together like this:

**CIA Clinton Mena** Mena is a small town in Arkansas, where the guns and drugs of Iran Contras were handled.)

**Pine Gap HAARP**. Weather controlled world wide for decades, by secret governments on going.

Use **multiple phrases** and or **add other key words** with the quoted phrases to aid your search.

Consider any document, government form, book, article. Remember that all things are not on the internet, but many things are. There are many sources for information; the Library of Congress, your public library, court and other public records, newspapers and achieves, video and broadcast media. Many of these can now be found easily by using the internet.

This is most efficient method to find information using the internet, with perhaps 20 billion documents. If you learn good search skills, you can quickly and easily find tomes of information.

The internet, the news, books, legislators, other people can all tell truths, ½ truths, and open lies. Some may simply be misinformed and truthfully telling what they know which may not be true. Truth is illusive and hard to find, but it is within reach for those that search. As the internet is the most expansive and easily searched reference point, you can find articles pro or con on most issues. As you read the various competing view points, I believe from the facts, witnesses, evidence, logic, you can sort through to find deeper truths then those that reach your door by a controlled national media.

My writing could be filled with reference and sources, but ... I have found that it is so easy to **search web for a quoted phrase**, that anyone, who learns that technique, can easily and quickly find one or more sources to the materials I use. I focus on **interweaving content to lead to understanding**, and therefore step away from the simple clerical task of identifying sources. For any to lazy to search, I'd gladly find and state those sources for them, if they'd like to pay for my time. *Inquire*.

## // Reason (evidence) vs Authorities

*I have worked under authorities for 50+ years.*

I'm son of Henry T. Elden, a prominent architect,. I was well schooled at Blair Academy, Carnegie Mellon University, Bachelor of Architecture, a student at Colorado Outward Bound (survival) School. I've spent 31 years as nationally accredited, practicing architect.

My father taught me to look, see, and to photograph, of basic sciences, and to reason.

My mother taught me nuisance of perception, thought and writing and encouraged me to be a writer.

My background, education and experience all blended well to keep me in the main stream, conventional thinking. I admit my 4th grade report card noted "Ted does not respond well to authority." Is this a stigma that has been with me always ?

I take this clue from my father, with his inquiring mind. When I am told or shown something, I usually ask why ? Others tire of questioning, and or frankly don't know. Some teachers may propagate some information but never consider opposing perspectives. *That's not their job !*

So most of my life, for most of my decisions, I have lived in main stream thinking.

My research of 9-11 showed me there are many other sources of information, radio, recorded materials, vast troves of information, facts, witness available through the internet and inner library loans.

So as I have seen the great deceptions perpetrated by government, media, institutions and organizations, I have stepped back to more carefully analyze information that I get.

I find, and encourage others, to see we are mentally asleep. We've been taught to follow and obey authorities. We have not been checking the realities around us and that others tell us. Often, simple logic and reason can break through, can Pierce the Veil of Secrecy that surrounds many reports.

When you analyze the information you get, you can see great gaps in logic, impossible sequence of events, breaks in the chain of evidence, gaps in the connecting links.

A forensic investigator (crime investigator) is not so much engaged in fact, evidence, but more in links. When primary evidence is quickly removed or destroyed, you have to question, "Why the hurry ?"

Established laws forbid prevent we destroy crime scene evidence, but more and more laws are skipped, normal procedures avoided, and new people engaged in suspect investigations, cover ups.

Yet, we the individual citizen, can figure those things out.

Many good information sources can give us clues. The American Free Press, the Idaho Observer have given in real time, contemporary reports of suspicious and improper handling of major events like; Waco, 9-11, and many other national events.

I contend, "Quit being so awe struck" and accepting of all your authorities; government, main stream media, large institutions and or teams of doctors. Do the math, do the research, analyze the information, facts, evidence, look for alternative perspectives, reports. Consider and evaluate them.

America is quickly declining, falling prey to lies everywhere which the population accepts, forfeiting our rights, freedoms, wealth, health and safety. We are too self centered, not thinking of our community and future. We grasp at our piece of the material world around us and do not consider how our government and country is declining due to draconian

forces among us.

In Nazi Germany, people ignored the storm trooper coming for their neighbors. None responded or protected them. Finally when they came for you, there was none left to defend you.

We must think, work together, communicate, assemble, debate and break the strong arm of the false news and authorities who try to enslave us. Awake, dear America, awake and begin to think again. Authorities will abuse you until *you reach the **point of resistance***.

## // Perception vs Reality

*Most of what we **learn** comes from others.*

What we learn (input) is the limit to what we know and believe. If we have not seen or considered something, then we cannot know it. We attend government funded schools, we listen to news, TV, books and movies. This information comes from others.

We accept information that is easy for us to get, commonly known among our peers, information that comes from high authorities; government, universities, institutions, even corporations. Many blissfully accept information without thought, consideration, comparison, reason, analysis.

If it's good enough for others, then it is good enough for us.

When in school (a social setting) an instructor (and text books) pour out information. Our task is to receive, memorize and repeat the information. None are thinking to question, debate, evaluate the information. The fact we are in the school, or in a course, means that we have already largely accepted

what will be taught. We expect that learning this material will advance us in ability to earn, learn, or even in status and prestige. We follow the beaten path, assuming it will take us to what we want.

Teachers are paid to teach us certain information for course and text books. They are not encouraged, nor paid, to teach us to reason, think, question. Their purpose is to indoctrinate us with what they have to teach. And we are measured in that task with constant exams and tests. We are measured against their standard that we should know and accept what they teach. We are not encouraged to learn on our own, of subjects of our interest, or to develop any outside information sources or abilities. From birth, through life we are pushed toward uniformity.

Individual difference in abilities, talents, perceptions are squashed in an effort to make us all uniform.

Education is not so much to teach, but more to unify us, by giving us all a common base of knowledge (information). Only a few who learn years later to review what we have learned have an opportunity to realize we often learn things that are not entirely true. What we learn impedes our ability to connect with things outside of the norm.

Many great educators have realized that the **genesis of our limited world** and thinking is born in our **government** regulated **education** system. See [www.Deliberate Dumbing Down.com](http://www.DeliberateDumbingDown.com) book & web site of Charlotte Thomson Iserbyt, former Senior Policy Advisor in the US Department of Education. She blew the whistle on government activities.

Hitler said, "Let me control the textbooks and I will control the state. Today we see President Obama recruiting his civilian army, his 'Hitler' youth brigade. Should not the parent, instead of the state, be the dominate voice in guiding children ? **USAvsUS.info** shows how marriage and birth certificates yields control of the child to the state. Requires testing, administering drugs, separating children from families – should all this be at the option of the state ?

After finding the great deceptions in 9-11, I've begun to explore many of my foundation beliefs, many of the assumptions I was led to believe, popular thought, as you will.

Once you learn how to work with information, - use the internet (a quick and easy tool), or - research in libraries, you can easily get information from diverse sources, information that was not considered by your teachers, newspaper or other sources.

Surely, as you read and study, you constantly come to new ideas, even concepts that are different and or a reversal of what you "already know." Most dismiss things that are new or different than what they know. They are stuck in the status quo. They do not desire to change their work, life, home, habits, so they resist learning new things. New thought may lead us to choose new paths of activities and to even abandon things we have already learned or acquired.

But, in learning, you also have opportunities to great benefits. Learning how to learn is the most important advantage. What we learn is dependent on our sources. Most live in the popular world, surrounded by peers, news, main stream thinking. As soon as you begin to think outside of the box, considering unpopular or unknown ideas and reports, most people begin to ostracize you. They have no interest to think, to change, to follow you. They are secure in their world, with their peers. They bind with the greatest number of people, thinking, assuming, what most know, believe, act on must be true, and the better path.

A Simple **summary**; Reality is often different then perception. You have the opportunity to see and know the truth. To do so, you must (temporarily) let go of

the standards you accept to consider things beyond the main stream – beyond popular thinking. There are opportunities in many fields, suppressed by main stream. By keeping the empowering knowledge from you, they can continue to control and dominate those who live in a world of assumptions, following the herd.

Our main stream is a simplified view of the world. When you look deeper, you may find many advantages to other ways of thinking. This book points to just some of the subjects where you can know more than most will ever consider. Here are some heavily suppressed topics I've found; - cures and treatments, - taxes, - history of war, - law and courts, - sciences: - free energy, - anti-gravity, - secret government, etc.

## // New World Order

*A plan to eradicate individual freedom world wide.*

Publicly the idea is mentioned, listing it's beneficial attributes, but rarely exposing it's flaws and it's harm to many.

By information, we are manipulated, deceived, robbed and plundered.

Hitler mentioned the New World Order, as did President George Walker Bush in his inauguration in 1990.

To some, this term or concept may seem distant and removed, but if you study it, looking for links, spokes persons, ideas and actions, you will find that the NWO covers the machinations of a vast and powerful group to take control of the world. They desire to reduce the population by 95 % - by war, vaccinations, and famine. They desire to unify all nations to a one world government, one court, one religion, one currency, and identify all people with an RFID micro chip implanted in your body, to know wherever you are, and to know all about you – your records; health, finances, and personal information.

## Se **Spy Chips** by Katherine Albrecht++

This is an unbelievable idea, you assume by not studying them. You live in your innocent illusion.

Search this title and examine the documents, statement, and articles about this practice.

Secret Societies and global organizations conspire together for their benefit, profit and control over the people, turning individual freedom into slavery, killing and injuring vast populations of the world.

Best yet, read quotes what those global elites have to say themselves about their organizations. See appendix

Here are quotes from those professing to bring about the New World Order. Do a search for some quoted phrases (from 2 or more quotes) from this list to find a lengthy list of more of these quotes on the internet.

If you search for an individual quote, you can determine that it is true, as noted by their author and or publication.

The appendix list **quotes** of world leaders on the **New World Order**. It is real and quickly coming in to existence. The Georgia Guidestones list 10 planks of their goals. They intend: - to kill 95 % of the population of the earth – *pretending to improve life on earth*, - create one world government, court, currency, religion. Read of their own statements, and of the guidestones to know their specific goals. To ignore their actions is to empower them.

The formation of the **North American Union** will wipe out the sovereignty of the United States, open the borders to Mexico and Canada, allow unregulated commerce, products, people to wander across the borders, - develop a private highway – owned by foreign operators to slice through our country for conveying products, people, contraband ? without supervision, control, monitoring. A new **Amero currency** will replace our currencies, as our dollar will rapidly lose value under these draconian controls.

President Clinton gave the National Parks of the United States to the United Nations in the Biosphere project. Check the signs at the parks ! As early as 1992, he began work on the Biosphere Reserves, the World Heritage Program. Parks are now controlled by

the United Nations, sometimes restricting areas to from the American public. See America Heritage Foundation to see the federal land grab of all the private property near lakes, rivers and streams.

Service men in the United States armed forces are sometimes forced to wear United Nations uniforms and serve their agenda, not the agenda of the United States.

The things I mention are shocking and unbelievable, but you can follow my web sites and or the clues to find hard evidence that they are true. The gap is that our media does not articulate and or discuss these changes.

## // Deceptions

*Property, wealth, freedom is stolen by deception !*

*Were there not civilizations, communities, police and government, such crime might run rampant.*

However, unseen, deceptive, people behind the scenes, corporate and industrial magnate, gain advantage, property, rights, control over other people simply by lying. Joseph Goebbels, Hitler's Minister of Propaganda chanted: "The bigger the lie, the more it will be believed."

So in America, many great frauds, deceptions, lies have been prevaricated on We the People. The lies have grown so large, repeated so long and so often, they have worked their way into our history books, our education, our public thinking.

Only those who have the audacity, veracity, curiosity to inspect the foundation of these issues will ever even consider or discover many of these great deception.

Examples: Adding **fluoride** to our public water supply, supposedly as a health benefit.

The Atomic Energy Commission creates toxic fluoride in their process. This is very toxic substance of which to dispose. They came up with the plan to put it into public water supplies. A dentist, Harold Hodge of the University of Rochester, promoted (false) science studies to indicate that fluoride has a benefit to teeth. It actually makes them brittle, more subject to dental maintenance, and does other harm to the body.

The **false science** continues to find studies of it's advantage, while the tomes of evidence against fluoride is continually covered-up, discarded and discounted.

**ChemTrails** sprayed from plane, lace our open skies with toxic chemicals and harmful bio agents. The Treaty of the Skies allows this. Ohio Rep. Kucinich's House Resolution HR 2977 named ChemTrails as an 'Exotic Weapon.' see at Rense.com US Air Force, media and legislators deny this activity, while Kucinich specifically mentioned it in proposed legislation. World wide this phenomena is witnesses, photographed and reported by thousands. Contrails are the water vapor trail of jets. ChemTrails are intentional spray distributed from planes – not a part of

their propulsion. They can and do turn the spray on and off at will.

As noted in the guidestone and many sources, the NOW has a direct plan to eliminate 95 % of the population of the world. They are doing it with vaccinations (cheapest method), war, famine, poison of air, water, food.

See **Secret Covenant** on the internet or from [www.abodia.com/t](http://www.abodia.com/t) It is a clear and active plan now in existence. Unbelievable yes, but this document is a clear statement of what is happening. Poison our air, water, land. Could this all be coincident, accident ? It is very focused intent by very organized, imbedded and powerful global elites, working towards establishing a one world government, a New World Order.

The best **covert operation** is done in **plain sight**. When the public no longer even recognizes what is plainly visible, then no further cover-up is needed. When you learn, consider, become aware of these subjects, you can easily discover who broadly we are being deceived. We must reason, consider, join with others to be a force to resist these harmful actions.

Elected officials should not be involved in decisions that directly profit them or their companies, associates. That is a conflict of interest. But most people do not see or suspect what is really on going behind closed doors, the union of clandestine corporations and elected officials.

## **The Marijuana Conspiracy**

Hemp is excellent crop for many purposes. It grows quickly and abundantly and was used for centuries. It was in direct competition with the growing chemical synthetic industry, so DuPont and others promoted laws to prohibit hemp for being grown,. They posed that marijuana derived from it was a danger to mind and body.

DuPont's primary investor, Andrew Mellon became Hoover's Secretary of the Treasury. He appointed his future nephew-in-law, Harry J. Anslinger, to head the Federal Bureau of Narcotics and Dangerous Drugs. They decided to declare hemp was dangerous. It was a threat to their billion dollar business. Hemp had to go for their dynasty to prevail. They brought the obscure Mexican slang word: 'marihuana' into America consciousness.

A media blitz of 'yellow journalism' raged in the late 1920s and 1930s. Hearst's newspapers ran stories emphasizing the horrors of marihuana. Films like 'Reefer Madness' (1936), 'Marihuana: The Devil's Weed' (1936) were propaganda to create fear of hemp. In the 1930s, people were very naive. What news papers or radio said was believed true.

In 1937, the Prohibitive Marihuana Tax Law outlawed hemp. The most useful crop became outlawed so the chemical industry would have monopoly of products.

Similarly, many elites, behind the scene magnates grown rich and expand their wealth. They support (buy out) politicians to promote their bills and laws to slant the market place towards their products and profits.

The military industrial complex virtually runs our government, consuming much of our gross national product for the production of armament, munitions, to ever expanding and increasing wars. War is most profitable industry. Promoting war is necessary to expand the activities and profits of the military industrial complex through such companies as

Halliburton, Blackwater, Brown and Root. Certainly false flag operations are staged, aided, funded, and expanded to increase hate, anger and war.

Citizens of different countries do not wish to hate others, nor to leave their farms and cities to fight "enemies." Great efforts are made through the media, government and many organizations to foster and promote war. It's for the huge profits not otherwise available in peace time economies.

Raising issues to emergency conditions allows government to make special provisions, avoid debate and consideration of alternatives. Situations are exaggerated and deemed emergencies to speed their actions without appropriate overview.

## // What to Do ?

*To curb evil around us - be aware of it.*

All that is necessary for the **triumph of evil** is that **good men do nothing.**- Edmund Burke\_

Search, find truth, confirm it, share it with others.

Sure some need to be more fully engaged, to take action, organize people, from committees, groups, organizations, perhaps protest and or from laws and organizations to combat the evil that surround us.

But begin in knowledge.

As most of us are so short sighted, so self centered in our focus, we don't consider, think of, believe these tales of conspiracy and corruptions.

We assume or pretend that the systems around us will find and deal with these problems. Surely the legislators, the main stream media, and our justice and executive branch of government will deal with these serious issues.

To me, that is the great deception, the false illusion, the feel good attitude.

To think that others are working to our benefit without our involvement, support, knowledge.

When you look deeply at the on going activities that are crushing our citizens, our fortunes, our future, you begin to see that there are few to none opposing

forces.

Evil prospers when good men do nothing.

"The world is a dangerous place to live; not because of the people who are evil, but because of the people who don't do anything about it." ~ Albert Einstein\_

So to me, the first action is awareness.

If others find and see the truth, simply circulating this news and expanding the population who know, will begin a movement to retard, reduce and reverse the on going evil.

On the contrary, everyone who has an opportunity to consider these issues and passes them, to focus on their own self interest and immediate benefit, become a co-conspirator in not challenging those who work to oppose and destroy us.

Be a Truth Seeker ! Find and stand on truth. Nothing else is so durable, desirable and beneficial.

Yes, we are few now, but as we grow in number and link to each other, our strength will easily surpass those who oppress us.

There are vast populations who are effected. Finite are those who work to harm us in secret.

United we can stand against them, divided we will fall, fail.

Seek and share Truth !

## // Information Sources – diversity

*Information is stored in language.*

Vast tomes of libraries are available, many public, some private. Some people have acquired private collections of books & references. Others have access to public or special collections, like college libraries. Newspapers may allow research in their archives, as may some government agencies, like Blue Book (government records of UFO reports).

Of all information sources; libraries, public records, news, the internet is the simplest, fastest, easiest way to have a broad preview of vast diversity in information, witness, evidences. Learn how to use it. Knowledge is power, ignorance is enslavement.

## // Internet - Vast Resources

*the voice of many people and organizations*

Life is change, progress is change.

In decades past, people went to the store to see and buy things. Then came catalogs and mail order.

At first people did not trust mail order. They weren't sure they'd get their original order or how to get their money back, but in time, mail order became trusted and popular.

Now the internet greatly expands that. People seek products from distance sources. They order and pay via the internet. Yet, some still distrust the internet as a source of valid information.

Print - Books, newspapers, television seem, to the public, to be more credible, a higher authority. People are reluctant to trust the internet as a source of information, preferring to listen to popular, dominate news reporters and government leaders.

What is the internet ? It is simply speedy access to a vast number of people and organizations. Individuals and corporations stand equal before the world through the internet.

If you are seeking information, how can you know if something you find on the internet is true ?

If you click to a web site, or link, you can determine the source of the information via the web site address. Read the beginning of the link; possible New York Times, Cornell University etc. You may find a link to the home page, and or just delete the last elements of a long web site address

[www.NYResearchGroup/GovernmentSecrets/UFO/Report1.htm](http://www.NYResearchGroup/GovernmentSecrets/UFO/Report1.htm) (*hypothetical*)

By looking that the beginning of the link, you can discern the source. You can trim back the link, climb the tree towards the host who publishes that web site. Sometimes this gives you a clue to the variability or reliability of the information (as old school people want to look at the source).

A more reliable way to test information is to

abbreviate the information, select key ideas, names, events from the article that you read, and search the internet for that information. You often find other sources who talk about the same things, offering either confirmation, additional facts or even rebuttals to what you have found.

The best way to test information, is not by believing a source, but by investigating the core information through many different sources. Seek a crowd of witnesses to confirm.

Some lead you to foundation sources that are undeniable; public records, Congressional Hearings, Senate Investigations, court cases.

The early articles you read may seem unbelievable, but from them you get ideas and concepts to test. Often, like peeling an onion, as you get more involved in a story, concept, report, you'll be amazed to see how many people and organizations confirm or report on it.

By a crowd of witness, we are at peace the information is important, worth considering, probably true (until or unless we find viable rebuttals). Most

information that I find arguing against my investigations are vague, relying on authority, not dealing with the revealed facts and hard evidence. In those cases, I side with the hard facts, publicly know, rather than an authority without a good counter argument. Some follow the authorities, I try to follow the facts, often introducing me to new spokes people from whom I've not heard. It is hard to trust a stranger, but the common feature is that many national reporters are continually at odds with local reports and viable facts. Why would that be ?

Most of the amazing things I have discovered, in research, are not rebutted. They are only ignored.

Authorities try to rule by force and by suppressing opposition. I think that simple reason should be our guide and not high authorities. You can and should think and reason !

## // Truth - What is Truth ?

*Every word, rumor, event has a source !*

*You hear of legends, myths and rumors. Are they true ?  
What is the evidence ?*

Everything you hear has a source. Now, some things may be started as rumor, they're made up. But even that may be a cover to distract you from something else. Often, lies are generated that slightly vary the facts to keep you from looking at the real event, names changed, dates, locations. If they can securely plant false information, then when it is investigated, it evaporates, turns out to be no event or not as expected. Few look exhaustively of **variations** of the main theme, or the source problem or report.

Find the source, go back to where it was first reported, from whom, where. Is there a written report, a local news report ? It is in the handling of information that it is often changed, managed, deflected to loose it's momentum or divert the viewers from connecting with the original materials.

I have falsely believed that later reports were cleared of early mistakes and confirmed. Now I see

that often later versions were handled by people who had some involvement, with their efforts to divert the story and or keep the viewing audience separated from the primary evidence and witnesses.

Consider the Oklahoma City – the Murrah Federal Building bombing. I've collected early local news broadcasts that show; - other unexploded bombs were found in the buildings, - the Justice Department said that they could be used to determine what sophisticated team of explosive experts manufactured the bombs, - the bombs were inside the building, blowing the build outward, as witnesses and evidence indicated, - video footage from news crew showed no crater in front of the building as shown in a **drawing** in Newsweek two weeks later.

The national news and the court case against Timothy McVeigh never mentions any of this evidence.

So you choose. Most don't have this inside information. Do you think that the national news cleared this up, or did they cover it up ? Citizen Information Network made revealing video.

Who has the ability to circulate information like the national news ? They can find news from their resources and or coupled with local resources. They can edit it and broadcast their version. New agencies are not accountable to the public. They are private companies. They are not elected. No public nor court, nor elected officials government control what the news may broadcast. Who checks the news ?

*Misinformation is a perfected art. It may be a distraction, a diversion.*

Consider **Sleight of hand**, distraction by: Hypnotist, lawyer, debater, magician. They shift your focus, what you think about, and what you think about it, to new perspectives, with illusion, misrepresentation, distraction, or simple lies or fraud.

Test, confirm, follow sources. Stay focused on your topic.

A strategy, like a recipe is a method to achieve a goal (like cooked food). Experiments are how techniques are developed. When they are used on unsuspecting, non-consenting subjects, we break laws in their experiments. The government has often doe

such illegal acts, through the illusion that it was for an emergency, for National Security, when these are just for selfish purposes to increase profit and control over the unsuspecting populations. As you come to learn of the real purpose of the National Security Agency, you'll find it is to protect those in political power, from embarrassment, crime or fault. The illusion iis that it protects us form foreign foes, but in reality it protects the incumbent politicians, and embedded corporations.

What is based on Science, evidence, facts. What is based on belief, assumption, faith ? Faith is fine if your sources are trustworthy, not bias.

People ideas organizations, systems social attraction, company, companion

Adjectives medium, articles small

You have to be inside a belief system to see other things, at least suspend, don't close

Youth: changing, dynamic, learning, evolving, rising

Age: stagnate, fixed, not adapting, diminish in

power and control

Many believe high authorities, government, institutions, universities, professional organizations – who lead popular thinking, who establish things commonly known. [Can we do better ?](#) You can get better information if you want to. Read Trust Me, I'm an Expert. Such is the foundation of professional organizations, to elevate some to unquestioned status, power and control. Those positions are fiery fought for.

My [War of Words](#) at [abodia.com/t](#) shows clearly how information sources have been bought up and controlled, as reported in the Congressional Record. **Operation Mocking Bird** is another program to seed lies in news to persuade people to a point of view.

**We are at war** The newspapers **control** popular opinion and **popular thinking**. They are **not an open conduit for thought**. They have been **bought out and are controlled**.

The **illusion** is that going up stream, to primary newspapers, New York Times, Washington Post, **yields truth**.

The following is an **example** of how I got **hard facts by using the Thought Print**, searching for a “**quoted phrase**.” First I hear a rumor of some Congressman saying that the bankers or Morgan bought up the newspapers. I did searches to get the basic facts. When I had the general information, I found the name of the congressman, that his message was in the Congressional Record, and the text of his message. Of course, I **still did not believe** this could be true, but when I searched for a “quoted phrases” from his supposed Congressional Record report, I found many echoes of the same from many sources. So I proved to myself that this is real event, really happened, is durable truth. Here is the product of that search.

Congressman Oscar Callaway reported to **Congress in 1917** (Congressional Record below), how J.P. Morgan hired twelve high ranking news managers. The twelve were asked to “... determine the most influential newspapers in America.” They were to figure out how many news organization it would take ... to control generally the policy of the daily press of the United States.” The twelve found that it was only necessary to “... **purchase the control of 25 of the greatest papers**.” “An agreement was reached; the **policy of the papers was bought**, and an **editor was placed** at each paper to **insure that all published**

**information was in keeping with the new policy."**

Soon that **policy** would be **defined** by a front group formed by JP Morgan and his colleagues (Warburg and Rockefeller). Morgan's personal attorney was the founding President of the organization. The organization was known as the **Council of Foreign Relations** (CFR).

**U.S. Congressional Record** February 9, 1917, page 2947

On February 26, 1917 'The New York Times' misspelled his name too ! Why? (It makes is harder to search for it !) It was misspelled as Calloway to Callaway.

In the **1950s**, **lying news** was promoted through the **Operation Mocking Bird** program.

To many, this is truth: - what is reported from high officials in government, institutions, corporations or media, - what is widely known, widely published and often repeated.

Perhaps, individually, we can find a better truth. From – a crowd of witnesses, - physical evidence, - public records, - court cases, - congressional reports or senate investigations. What are your sources ?

Many rely on dominate and popular. I advocate discerning details consistent with logic and echoed by those directly involved, not reports of others.

So who should you trust ? The more you learn of any subject, the more fairly you can judge it. I find if you just read diverse perspectives on a subject, soon the truth emerges. It is found in reason, and investigation. It's established by arguments with the more evidence, ones that employs your logic and understanding. These then uproot your former limited understanding. are much more believable, trustworthy then simple conclusions and claims from high authorities.

In our greedy world today, those with money and power have found it is easy to buy out people, institutions, news agencies and then edit or control what they release, what they say.

There are many sources of information; news, TV, movies, institutions, books, libraries, research, and the internet,. The internet is best in that it is a single method to connect to most all of these and more.

Of the many sources of information, each has some

truth, some deceptions and some misinformation.

The internet itself is neither true nor false, yet it is less bias as many different people have an opportunity to present materials through the internet.

True, in today's society, most are in a hurry and are content to ride with popular opinion and are quick to accept what dominate voices tell us.

But you have an **opportunity**, should you seek it, to find **broader perspectives, fundamental information** that may not be easily available through other sources.

So far, the internet seems to be much more diverse. Like free speech and free press should be, it seems less controlled by outside forces of government, organizations, money, power and influence.

You can learn to trust the internet by exploring it, using and testing it. Learn from it.

For decades I relied on authorities, but as I have discovered a different side to reality, I now am fully

engaged to find and learn of counter arguments, of hidden or suppressed news, information, witness and facts.

These things lead me to new conclusions and new people. Try it, you'll like it.

Do not believe all that reaches you. Be discerning, check things, suspend judgment, learn to test ideas and facts through the internet.

No one person or organization knows all things, nor is always true, but working through the minds of millions of researchers, reporters, authors and much evidence, it is not hard to blow past the restrictions of the controlled news that we have.

**// Learn to Trust the Internet,**  
*trust your own ability*

In the 70s, I began a mail order business. At that time, people like to go to a local store to see and touch what they would buy. Buying by mail order seemed a risk. Today, millions are comfortable to see and buy via mail order or by the internet, but many resist trusting it for news and facts, thinking anyone could say anything. How would they know what is true ?

If you study a diversity of perspectives, the truth will just float up, become obvious.

We are deceived when we rely on news sources of distant organizations who are not people that we personally know in our own community. News has become like a script, just acting, independent of the real truths.

Obviously news has mostly truth, so that we relax and don't study it to sort out fact from fiction. Even their lies and inaccurate information is subtle and shifts as time progresses.

Most people do not have a deeper, richer background of the true events and histories to sort out the lies from the truth. Their involvement and dependence on the news make them subject to it's subversive goals.

I choose to search more deeply from diverse sources on issues, rather than bother listening and sorting out contemporary news. Truth is more useful than a collection of popular myths.

## ***// Truth is Self Evident***

Speaking the truth in times of universal deceit is a revolutionary act. 1984, G. Orwell\_

Truth is self evident, **when discovered, and threatens liars and deceivers.**

I know, from many examples of actions in our own country, how people are threatened (or killed) for simply stating the truth.

Those who know, have the records, are threatened or killed to allow those who want to control to change the past history.

Orwell, in his 1984 novel, spoke accurately saying:

*Those who control the present, control the past.  
Those who control the past control the future.*

He predicted the conditions that are here now. We we're way beyond even that.

Do you understand about the US war of 1812, and the burning and destroying our original constitution in Richmond Virginia ?

This was done so that the Bank of England could continue their control over the currency in America.

If you really knew your history, you'd too would be up in arms, but of course, the popular source of information is very different than mine/ ours.

Life is a great illusion. Man a social being, hangs on what his associates think.

Few actually know the truth, but remarkably, it is easy to find and learn, for those that want too.

Search for missing 13<sup>th</sup> amendment to see ratified amendment forbidding any lawyers, or titles of nobility, those with titles from foreign nations to be elected officials. This law was not removed form the laws, it is just covered up in history, thru the confusion of the Civil War, when President Lincoln put the 14th amendment in pace, naming it the 13<sup>th</sup> amendment to cover up that lawyers were forbidden to be elected. He was a lawyer, and directly profited form this sleigh of hands. *By deception they do rule.*

## // **Truth Floats Up –**

As you learn, truth becomes obvious.

I've rediscovered the world by reading the internet.

I've abandoned much of what I learned in 50 years of college, of news, from new findings, not widely known.

Unbelievable it seemed, but I investigated many subjects to find that what is commonly believed is easily manipulated by the controlled media.

But much more exciting are the **millions of voices of truth** crying to be heard.

When you **look over the facts**, the many voices, **the truth floats up.**

Not from professionals, institutions, government, media, but from real people with real stories, witnesses, evidence, public records court cases, Congressional Record, Senate hearings, and more.

I'm amazed at how easily, articulate, expansive, accurate, and truthful you can get this information from unconnected individuals fighting to find and tell the

truth.

Even the greased wheels, the powerful corporations, the communication and media networks cannot block the simple and basic truths that echo across the internet.

Bravo for the internet, for now, until this frontier too is compromised. Senator Rockefeller, who is exposed by easy internet information, fights to regulate and control its here before free use and access/

### **// The world is very different then perceived.**

*America is Bankrupt, since 1933, and still is. All people, their heirs and their property have been given to the Federal Government as collateral for government to borrow and spend more Federal Reserve notes borrow from the private, foreign corporation for profit, the Federal Reserve, taking us further in debt.*

The Federal Reserve, IRS and US Government are all foreign corporations in reference to the sovereign united States

In War, PsyCops is widespread to convince the enemy of your dominance and power, regardless of the truth. The media, through propaganda, is the most powerful tool.

The major media in America is now controlled by just 9 corporations. They do not broadcast anything that is harmful to any of their interests, including our warring, major spending on arms, and exaggerating and promoting fear and terrorism.

Over sixty million Americans no longer file or pay income tax, according to Sherry Peal Jackson, former IRS agent and letter from Dept. of Treasure. Court decisions show clearly that filing is neither required nor legal.

### **// Information is the Key**

**Behold a Pale Horse**, by William Milton Cooper, is riveting in its direct approach to information, showing treaties and many original government documents that cover complex issues.

I'm spell bound every time I pick it up. I read this book because so many other sources refer to his seminal work. It is sort of the seed from which other

have come to knowledge. He was a navy intelligence officer. He, his crew members, saw a UFO as big as a ship rise out of the ocean. Higher officials at the base made it very clear he should never divulge this sighting, which he did later and on TV and radio.

Also he states clearly that there is an active UFO reality. The source could be extraterrestrial or it could be advanced military or secret government making the craft and responsible for the many sightings. Probably it is a little of each.

He says there is going to be an invasion (secret military or UFO) to stagger our imagination, and frighten us, again to submit to the high authorities as they form a new World Order.

All this happened to diminish our rights, and enslave us.

### **Information is the key.**

Those who control our world, economies, government, politicians, commerce also control our information; through news, TV, journals, books, ...

Your lawyer and most don't know the truth to many issues because their information path is flawed.

They depending on the criminal to give them information.

The tax protest, the winners, those who find constitutional rights, legal precedents, supreme court case and those that are winning in the courts are not reported. Their cases are sealed.

Other lawyers cannot see or find them into their controlled journals so they assume these other things do not exist.

**Information is the key.** Once you learn that you have many alternate paths to information,

### **You escape their trap, their control.**

My blind friend has a collection of thousands of radio interview broadcasts. We have begun a library of forbidden or contra band books. Not even forbidden, just neglected, books most don't seek or know.

I mine the internet, taking concepts, clues and phrases to search the authors and written works and reports. Most of the things I always knew were simply assumed based on the mainstream information.

Now that I know how to get information from other sources, I challenge the information that I have.

Much of what I had, is not so sound, thorough interconnected with multiple independent witnesses, and replete with evidence, public record and more.

The simplest way to **control people**, is not guns, fences and prison, but simply controlling, limiting, twisting and **deceiving** them through bad or incomplete information.

PsyOps (psychological operations) are designed to pamper, and repeat to our public that we have freedom, choice and are privileged.

Their strategy is to make slow changes in our lives, (against the laws and constitutions) erasing or smearing or changing old histories. This leads to the gradual change, degradation of our life style, to increase their power and control. The elites, who

sponsor this NOW, truly believe the more control they have, the better the world will be, but it is from their perspective only, not considering that the rest of us should have rights, freedom, property, wealth, health, freedom to speak, assemble, travel, etc.

**"None are more hopelessly enslaved than those who falsely believe they are free." - Johann Wolfgang von Goethe ... "**

For me, the trick is to **find the alternate information**. I don't assume the alternate information is necessarily true. Where did I get it, who does it serve, is it skewed or bias ?

But when I **compare information**, rather than just taking and believing what I am told, I am often astonished to find new information, alternative information works better, more connections, proofs, witnesses, etc. **The Information is the key.**

But I am a reader, thinker, manager of information. I churn through a tomes of information before I reach decision.

Most people want a simple answer based on some

institution, authority or news source.

Most people don't think they have the time, or the understanding to figure out things and they just want to follow the herd or the leaders.

Many people, smarter than I am, think they could not possibly figure things out or understand complicated things, so how could I have discovered these things. Have **an open heart, an open mind**. I don't fear to explore, think, reason, consider what others say. I follow the clues.

Those who control our economies, governments, politicians, commerce also control information;

Government, with enough power to give you everything, has enough power to take everything !

Mainstream is controlled; news, TV, books,.

Lawyer and most people don't know the truth on many issues because their information path is flawed.

They depending on the criminals/ main stream to give them information.

The tax protester, the winners, those who find constitutional rights, legal precedents, supreme court

case and those who win in the courts are not reported. Their cases are sealed. The news is suppressed.

Lawyers don't find these reports in their controlled journals so they assume these wins don't exist.

Information is the key.

Once you learn you have many alternate paths to information, you escape their trap.

A blind friend has a collection of thousands of radio interview broadcasts. Although impaired in the physical world, he is rich and able in his ability to think clearly. I champion him. We have begun a library of forbidden or contra band books - no just books that most don't know or seek.

I mine the internet, taking concepts, clues, phrases and search the authors and their written works.

I have found most of what I always knew were simply assumed based on mainstream information.

Now I know how to get information from other sources, I challenge the information I have.

Much of what I had, is not so sound, thorough interconnect, multiple independent witnesses, and replete with evidence, public record as what I now have..

The **simplest** way to **control people**, is not guns, fences and prison, but simply **controlling, limiting, twisting** and deceiving them through bad or incomplete **information**.

The other PsyOps (psychological operations ) is to pamper, and repeat to them that they have freedom, choice and are privileged.

Making slow changes in their lives, (against the laws and constitutions) erasing or smearing or changing old histories all leads to the gradual change, degradation of our life style.

So there are none so enslaved as those who believe they are free.

For me, the trick is to find the alternate information.

I don't even assume that the alternate information is necessarily true.

Where did I get it, who does it serve, is it skewed or bias.

But when I compare information, rather than just taking and believing what I am told, I am often astonished to find new information, alternative information works better, more connections, proofs, witnesses, etc.

So for me Information is the key.

But I am a reader, thinker, manager of information. I churn through a lot of information before I reach a decision.

Most people want a simple answer based on some institution, authority or news source.

Most people don't think they have the time, or the understanding to figure out things and they just want to follow the herd or the leaders.

Many people smarter than I am think they could not possibly figure things out or understand complicated things, so how could little Ted in W. Va.

Here is a sample of how simple diversion keeps us from being curious.

**Roswell** – did an alien aircraft crash there in 1948 - ? who cares (It really did but ... ) What is important is what has been happening in that area since.

Is Area 51 America's Hidden Spaceport? See DVD Movie It is miles of restricted land, on no map except noted as desert. No private, nor commercial plane can fly over the restricted area., nor can any Air Force of military, it is that private and secure.

So what is going on there ? New developments in flight and much more. They originally added many building above ground and are now building more under ground or camouflaged in the mountain side.

I have many witnesses and their testimonies; Bob Lazar, John+ Lear, son of the Lear Jet designer, Phil Schneider and many more.

But more importantly, I have aerial photos 1983, 1989, 1993, etc.

How could Elden, in Charleston, West Virginia, get aerial photos of the most secure place on the planet ?

[Russian Satellite Photos](#) – They too watch this area carefully, they are also very interested in the secret developments here.

So, even simple people, persistent, focused on the question, attentive to the answer, and continuing in effort to explore and examine can unravel even complicated things.

Most all we know of the world we get from others. Life is developing relationships and trust.

When you realize that what is popular is not necessarily true or in your favor, you best begin to think independently and for your self..

Learn of an event, reduce to key words and concepts.

Searching for further reports through keywords, names, places, dates

**No one person or organization knows all things,** nor is always true, but working through the minds of millions of researchers, reporters, authors and much evidence, it is not hard to blow past the restrictions of the controlled news that we have.

## // Facts or Authorities? Persuasion

We see (*only*) *what we already know*.

We have a name for it. We have seen it before. But we can learn new things, see combinations of things, patterns, cause and effect and learn new things.

We trust (or don't) the sources that give us information.

No information is absolute proof, is trustworthy; photos, video, quotations, speakers. Nor do we test it. All can be forged or altered. Few test their information, research it, explore alternatives. Mainly we **listen to people** (national news, institutions, universities) who **we already trust**.

Rather than consider, inspect, test, research what we hear, we just listen to those we already trust. We usually **trust**, not those we have reason to believe, but **those that others trust**. So the break in our acquiring information is that we **get** most **information** of it **from people** to whom we have **no direct relationship**, yet, we **assume** it is true.

We are mainly persuaded by **popular opinion**, media that reaches broad audiences.

So we base our truths on popular people who speak to many. We feel comfortable in a crowd of common beliefs.

When another speaker gives **us different information**, new evidence, photos, video, court cases, public records, Congressional Reports, information that is different from what we've heard, we doubt our new sources. We tend to hold to what we once learned, rather than consider and test new information.

We doubt them because we do not know those who offer this info. We are lazy. We don't consider, inspect, test, their information, we just assume a dissenting voice cannot be true.

As I have found a new reality, one I never imagined, I challenge you to a new method to acquire and evaluate information.

I am well read and have studied in many fields, but I do not equate my education or experience to equal

or excel professionals like doctors, scientists.

However, I can readily see that these professionals typically rely on information from others, from institutions, from news. They rely on the irrefutable information dominate in the public sector without their actually considering or evaluating it themselves.

So we live in a fast passed **world built on assumptions** on assumptions. All are blended together relying on information from established, well known, main stream sources. But the deeper you pry, inspect, examine, the more you come to **realize** that those who are ardently holding to the status quo, are doing so by habit. **They have not looked at many of the foundation arguments.**

### **Make the journey yourself- read !**

In the old school, a writer, or newscaster is suppose to tell you the truth (by their authority) or **prove it with many references.**

**Information is very accessible** today. A writer, researcher can just **lay the foundation** for you. If you take up any of his clues, you can easily affirm the information through internet searches. I'll tell you how

50

later. Consider electronic books and quick searches. You can copy a work or click a link to find expanded information. It's easy to take any word, phrase or concept and quickly find supporting or contradicting evidence through the internet, back to reliable, esteemed sources, like Congressional Records, Senate Investigations, court cases and public records. **So are we persuaded by authorities or by facts ?**

If you go to my web site, or get my CD, I can give you tomes of references, documents, web sites, etc.

In printed form, I pay for the paper.

In electronic form, you pay, with your time. From what you see, you may elect to print, copy, or e-mail anything you see.

Most are focused on **advancing**, deepening their knowledge of **what they already know.**

Few pay or try to read what they don't believe.

**Few want to** abandon or **change** what they know to start a new path. That is a hard pill to swallow – an admission they were wrong before, a possible loss in

whatever you have invested in time, money, resources, commitment.

To **change people**, to reason, **to truth**, they need to **look at new information**. I try to get the information to you as cheaply as I can. As you open your mind to consider it, you can expand your efforts to read further, find confirmations, print or buy what books, video you want.

For **growth and truth, consider**, explore the alternative voices you've never considered before.

**New knowledge** comes from looking at **new information**, from **new people**.

Main stream media crams the airways with information, some true or ½ true. They fill your mind to distraction, especially with trifling subjects. As all clamor to see the news, you become embarrassed to not know the latest story, to discuss it and form an opinion.

But who is considering and debating the serious issues that effect us all, significantly, our families, fortunes, futures ?

This writing is an introduction. Each person has different experiences, different knowledge, and different criteria for evaluating things. I point to many ways, you find the path that helps you.

For some people I could offer 1,000 proofs yet they would not accept them. For other people, I can just show the pattern, the overview, the key people, programs, concepts and they can unwrap the truth beneath. I've become a super sleuth since I have found ways to learn and delve deeper through the use of internet searches and resources.

**National news** is limited to the editing of **some people at the highest levels**. Local news just copies national news. The **internet is the voice of millions of people**. Sure you have to read more, but eventually, by comparing ideas, you can soon sort out the truth.

We have been taught to **follow and accept authorities**.

I content they are misleading us. We need to revert to our own investigation beyond the popular news.

These subjects are not so difficult that you need an expert to explain. We have become dependent, submissive to experts telling us everything. Americans have quit thinking. As news has gained in popularity, we think we have to know the news to know what our neighbor thinks, and what is commonly known.

I find **news does not follow common belief, but leads it.** They propose preposterous information, and, as it is accepted, they magnify and compound it, keeping critical information out of your reach.

## // National News is different than local reports

*Early reports may be unedited, detailed, accurate.*

News reports, police and detective reports, student reports, local broadcast news or other public sources vary significantly from what was broadcast (or repeated) nationally.

*You can explore these on your own. This book will tell you how. You can also refer to [www.abodia.com](http://www.abodia.com) At the bottom of this home page, you should find links to Truth Seekers, 911, Research and or other ways to see a deeper truth.*

### // A Different Story:

*Okla. City Murrah Federal Building Bombing '95 ?*

*Ruby Ridge, Randy Weaver '92*

*Waco Texas, Branch Davidians '93*

*1<sup>st</sup> World Trade Center Bombing '93*

*Columbine High School Shootings '99*

*TWA Flight 800, shot down over Long Island ? '96*

*Assassinations of: JFK '64, MLK '68, RFK '68, JFK Jr. '99*

*Research these at your leisure. This book assures you when you have deeper knowledge, you'll begin to see a **pattern**, where main stream, broadcast and distributed information begins to change from early report. See if you don't see a pattern. What kinds of changes are made ?*

*The elites, who control our news, want to keep us uninformed, separate from the true facts, so we cower in fear, anger, hate and aggression. They want us to be divided among ourselves, not forming alliances in family, community or liberty organizations. They call these organizations or people in them – terrorist, those who simply question the control of the government. They increase their police powers and laws to snuff these people out, denying us our liberties, freedom, constitutional rights of free speech, assembly, privacy and property.*

## // 9-11 - What Really Happened ?

*Consider new information - your conclusions unravel.*

You begin a curious process. Properly nurtured, it can lead you to deeper findings, a deeper truth.

It is easy to follow the crowd, the main stream, but it is not difficult to follow the dissenting voice(s), if only you are curious. With desire, you can establish a firm foundation.

The more you follow the dissenters, the richer, deeper, broader is your information base.

The primary arguments against **dissenters** are:

- It is not true, , it did not happen.
- They don't argue with the facts, they only try to **keep you from looking directly at the information.**
- They criticize or discredit the spokes people, the messengers, finding (pretending) fault in their character or history.

Arguments against the opposing view are:

- It is not true (but it is)
- It does not effect me (but it does)
- There is nothing I can do (but there is)

We all have different knowledge and experience. If you find some angle to view a story, you can find facts you understand.

On collapse of WTC on 9-11: to engineers, I show, physical facts of the building's quick and total destruction, the speed of the fall, the pulverization of all the concrete, and the physical science of the temperatures of steel to fail, temperatures of office fire and the brevity of the flash of the kerosene or jet fuel.

To others, I introduce witnesses who saw and heard the explosions that ravaged the building before and after the (supposed) plane came.

So we each have a frame of reference, what we can understand. When news keep primary facts from you, you falsely assume that you would not understand them.

You may have to read much before you find primary evidence that you can test to be true and that you understand.

Our mind makes a map of things. As you add pieces, you get a better picture. You cannot believe or understand things you don't know. Some times, you have to add many pieces together before you get a total or a convincing picture.

As an architect, others have asked me the main reason I think the World Trade Towers were destroyed by explosives. I have 100s, thousands of reasons. For me it is the overwhelming abundance of evidence, sourced by sophisticated, professional and accredited people, and the multitude of independent witnesses, sharing a common conclusion.

When I started, I did not know I had the capacity to step ahead of all the "experts" that gave us our conclusions.

What I have learned is that in America everything is sold, even information. For a price or a threat, people, even accredited experts will say something. Perhaps, what they say may even be true in a limited or special

case, but it proves not to be true in the broader picture, when you have more complete and comprehensive information.

“Why does all this matter?” people ask.

I contend that most all I had learned and assumed in 50 years is often opposite of the truth I now find, because I did not know how to get information outside of the main stream, and worst, I did not know that there was a different world, that I should be seeking. I'm embarrassed to admit I was not curious, I was peacefully accepting a web of lies.

This book proposes there is a deeper truth than main stream news, and that it is important that we find, and act on that truth..

Once you have the **clues and the method**, you can easily find that information yourself, even through my web site directly, [www.abodia.com/t](http://www.abodia.com/t)

This book aspires to a higher cause.

Many, hundreds of books, thousands of web sites give you clear, factual, deep and impeccable sources

of information that prove this thesis.

This writing is to show you how to:

- know a deeper truth,
- think outside of the box,
- spread this idea to many,
- **want to know**, based on what you find !

Each day we accept lies around us, our country decline.

Our only hope is to - **see the obvious truths**,

- join with others, **find, seek, and spread the truth.**

**Ye shall know the truth and the truth will set you free ! John 8:32\_**

Get over the fear. Jump on in - the water's fine !

The truth, like any goal, is available to those who

**Prepare, Persist, to Prevail !**

## // Language – limit of thought, perception

*Language is our limit of thought, our perception, our building blocks of understanding.*

To some, language may mean, French, English, Spanish.

To me, it is broader; chemical symbols, music scores, poetry, painting, photography, seismic charts. It's the tangible, cognitive record of anything, any word, symbol, gesture, written, recorded.

If you are a painter at the beach, you see a world of color in the sky, sea, shores.

If you are a musician, you hear the roar of the ocean, the blush of the wind, the rustle of the grass.

Whatever our vocation or interest, we become sensitive to that world, perceiving and labeling things of our experience.

The painter may not consciously hear some sounds, nor label nor remember them. They pass him

without record.

He cannot tell another as they were never apart of his conscious experience.

You may be a painter, then learn the law, acquiring a vocabulary and understanding or words and terms.

We see only what we know. If we are not aware of things, a disease, radiation in the air, we do not perceive it. Yet, we can learn new things, encoded as languages, things, events, actions described in words, sounds, symbols.

### **Language is the limit of our thought.**

Most of us are visually dominate, seeing more than hearing or feeling. But we can expand our perceptions, sensitivity by trying and practicing.

Most get their news, or new information through the newspaper, TV, movies. But there are many more recordings, knowledge, sources of knowledge from man's records. Radio interview, audio tapes, mp3, books, articles, files, millions of articulate things, in some language, that could expand your thinking or

knowledge.

If a language does not touch a subject, I don't know how you can get it into your head, save by telepathy, meditation, thought, reflection, which is a little different and rarely used or trusted sources.

Most of what we know of the world, is not from our own direct experience, knowledge, testing, but is accepted as others give information to us. The information may be true, ½ true, temporarily true, or not. We generally accept information from authorities (news / government / institutions/ professionals) without testing it.

There are much broader worlds of reporting, like the many forms found through the internet, but most people limit their world to what the main stream media tells us.

That is known and abused by the main stream. Since they know few are checking, to dominate a society, you only have to impress, control, the majority, other then will follow, as they have not the power or persuasion to draw other to them, or to make others think.

Language is the cognitive part of any subject, be it tangible or abstract, real or imagined, of thought or of action.

It can be a word, image, sound, something tangible, perhaps connected to something that we saw, imagined, or desire.

French, English, German are culture languages, but there are also languages for architects, choreographers, radiologist, archeologists.

They can be words, symbols, images, sounds and more.

To know the symbols allows you to use the language.

If you travel to the beach and you are a musician, you more clearly hear and recall the sound of the waves, the gulls, the wind.

If you are a painter, you must notice the hues of blue in the sea, the skies, the shades of amber in the sunset, he textures of sand kicked up on the beach, laid silvery smooth by the waves and tossed asunder beneath the churning tides.

Whatever your field of observation, participation, introspection, you develop and learn a language to work with it. You might invent your own terms, or learn the expressions of others. You tie things seen

*Language; words, symbols, used to express thoughts and feelings.*

I am not an accredited scholar, but I am an avid reader; of books, video, reader of nature, science, observation, cognizant to the world I hear, see, think about.

I'm a member of the prestigious Charleston Anvil Club, to whom I have presented several papers. Their listening has encouraged my thinking, and of that I find the primordial element in thinking is language.

Language, to me, is more than French, German, English. Language is word, symbols, sounds to convey or link to any other thing. It is a code, or symbol set to point to another thing (real or imagined - tangible or intellectual).

Here are some obvious code sets; - legal language, chemistry words, symbols, equations, architectural and electronic schematics (drawings), maps, charts,

photos, images, painting, poetry, choreography symbols, ...

We must see (perceive), name (label) and remember something consciously to be able to recall it, think of it and tell others. Language is the key. We must have a peg to hang or hold the thought or object. The "word" need not be alpha-numeric, it can be a graphic symbol, sound, anything tactile, etc. But we must have a "word" to point to something that is before us, or in our mind, or something we try to tell another.

Words can be put together to describe something greater, more complex, so a definition, a paragraph, or a book (title) may describe something greater or more complex.

**Why use language ?** As an architect, I do plan drawings and renderings to show a client what we might build. They consider, comment. We change and adapt, then finally build. If I built everything I conceived, we'd be moving walls and making expensive changes in real 3 D space, taking time and money. So my drawings, like a game board, like monopoly or scrabble, is a place to arrange and move parts until we see all our requirements are met, then

we build what the model / drawing shows.

Those who have to look at real 3 D things cannot move as fast as those who can work with lines, drawings, symbols. **Language is a quicker** way to manage information.

To present information, we use word, books, video, audio, slide shows, etc. Even these 2 D presentations are pointing to 3 D objects or emotional or external things, events, objects. Language permeates our very existence.

Every thought travels through language. We may have a feeling, then an urge, finally a thought.

It matures or culminates in a phrase, I want an ice cream cone. Then we take action to complete the thought. Without language or with only a limited language, we cannot move as fast to form complex thought, to act. We are limited to modify, change, consider, communicate complex things.

Animals exhibit some simple language skills to see and remember, to communicate to others, but not the complex language skills that man has developed.

We see only what we already know, but we can learn new things, to see more perceptively, more deeply, with greater understanding.

So the limit of our thought, understanding, perception, is based on the limit of our own personal language. We can learn new terms (words symbols, sounds) and recognize that they point to or stand for complex ideas. Combining more and more complexity together, we reach higher and higher levels of complex thought, like special mathematics, sciences, physics, higher levels of understanding. Without the building blocks of basic language skills, we cannot get to these higher forms of thought and communication.

Our personal experience may continually add to our language, or not, depending on the diversity of our experience. The quickest, easiest way to expand our experience, is by simply reading, or considering the thinking of others.

The more you learn, and use your language skills, the more able you are to see, name and consider new and complex things. You can break them down to simpler terms and recombine them as your language skills allow.

We can convert things (words, article, books, audio, video, pictures) and put them into computers. We can teach the computers to help us manipulate all of these files, to show, compare, consider, to gain new thoughts or revelations and conclusions.

The computer can effectively speed our thinking, gathering, focusing, interrelating more and more information to reach more complex thinking.

The computer can effectively speed our thinking, gathering, focusing, interrelating more and more information to reach more complex thinking.

## // Think

### *Thinking deals in language.*

Only what you can bring to consciousness, by naming it (language) can you think about..

Prior to thinking, moods, feelings arise. If considered and focused, they can be brought into conscious thought, converted to words, drawing, remembered, presented, discussed. Without language, we have no thought. The language or media can be many; words, images, sounds, ...

We can see, hear, feel something, and or bring things to consciousness by personal witness, by reading, watching, listening, by memory or even telepathically, getting clues from the outside.

Most of the information we consider comes to us from others. Most people assume much, taking facts and conclusions from others to make decisions, take actions.

Few examine the foundations of their thoughts.

When you learn to look deeper, with teachers,

books, libraries, internet, or alternative sources to search for information, you can break through conventional thinking, public opinion. With broad perception, you can consider much that others do not consider. When you look at the foundation of thoughts (basic facts), of tradition, or popular thinking, you may easily find different facts, different paths that will bring you to different conclusions.

Thinking is both our option and our privilege. Most are rushed and focused on immediate needs, job, home, family, food, money, even future needs, career, profit, etc.

Few consider their community, their future, finding the truth. For them, examining fundamental thought proves useful. It may seem altruistic to consider these broader issues. But some one must. I encourage you too do it !

Once you start thinking, examining the precepts that others accepted, you may find a different foundation, and can choose other paths, other conclusions. Our thoughts determine our actions. Most accept public opinion, live in the dominate thinking, blend with others, live conventional lives.

Few think out of the box. They are the innovators that can bring us change; progress, prosperity, wealth, health, safety.

When you begin to look at fundamental events, basic premises from which other conclusions are drawn, you enter a world of responsibility. You liberate yourself of the conclusions of others. You alone can choose what you want to believe.

Many focus their thinking on things that advance their own cause, considering and gathering information that justified what they've already done (property, job) and what they want (goals). Goal seekers are often blinded by their own narrow vision. Some of us must be open and consider broader vision. These are the rare people we must to gather and unite.

Few search deep for foundations of thought. It may not lead to immediate and tangible rewards. You are often ostracized as you challenge the conclusion others willingly accept. Others do not want to follow your path. By their avoiding considering the fundamental facts, they reject your conclusions.

Status quo rules our world. Initial impressions are memorialized in news, monuments, museums, books, histories and education. Yet, in a world of alterative thinking, different paths are available to those who would seek it out.

Ask, seek, knock. Ask - it shall be given you, Seek – you will find ! Knock – (a door) shall be opened unto you: Mathew 7:7

Thinking is like sports. You can develop, practice, improve. Like doing push ups, the more you do, the more you gain benefit and efficiency. Here're books that sharpened my abilities.

- Think Like a Genius, Todd Siler; - How to be Twice as Smart, Scott Witt; - Double your Brain Power, Jean Marie Stine; - Brain Power, Albrecht; - The Art of Thinking, Alan Harrison; - Your Maximum Mind, Herbert Benson (who also wrote the Relaxation Response – which suggests to meditate (or pray): Find quiet place, comfortable clothing, and peaceful mind (don't dwell on your thoughts, just be passive, quiet and listen (to God).

// **Find Things** – search a unusual word or phrase

With a word processor, or even a web browser, you can use the search or find command to look for a word or a phrase.

You can use Windows or a program manager to look over your hard drive or in a folder to find a file by it's name, or date or by a word or phrase in the file.

I often find a sheet of paper I printed, and want to find the source in my computer. As I cannot remember where I put the file or what I named it, I type just a unique phrase from the sheet of paper, and ask the computer to locate files that have that phrase.

**Total Commander**, the program I've used for years, does this easily. It is my best, **most useful program**. You can get it, download it free from the internet, but for a slight fee, it works even better.

It may take 30 seconds to search my computer to find a file. I can limit, or speed the search by adding more information like: - the file is a **document**, - was created in last 2 weeks, - is probably under the client folder, etc.

I use similar techniques to find things on the internet.

The **more specific** you get, the **fewer** your answers. The more general your questions, the more numerous your responses.

You can use a relatively unique **phrase**, from a book, document, tax form, etc. and often find the complete text in just a few seconds on the internet.

It will not find links that use any of the word and or in a different order. It only finds documents that use that particular quoted phrase, with only those specific words in that order.

This is powerful to know. People bring me an old out-of-print book, or Senate Investigation, or Congressional Record, decades old. I just find an uncommon phrase, probably not used in many documents and do a “quoted phrase “ internet search. Presto - in a few seconds, I find the original documents, which I can view, read, copy, print or compare to authenticate with the copy that I hold.

This usually works, but not always. Many things are on the internet, but not everything. Things you would never think, can be quickly and easily found there.

**Learn this trick - It maybe most valuable lesson in this book !**

I don't quote source anymore because it is so easy to find things if you just quote a phrase from an article you see ! Rather than just one source, there may be many.

### **// Thinking Method**

By working with thoughts, through reason, we can progress and learn more complex thought.

You must first crawl before walking, walk before you can run. You must learn basic ideas, before you can consider and comprehend more complex ones to build on them.

First enter the shallow water, before embarking in the deep.

In math, you learn to add and subtract, then on to multiplication and division. The complex is built on combinations or principles of the simple.

To know and understand something, or even to believe it, you have to have information.

Some can work entirely on faith, trusting some one or themselves to intuitively know something.

Many of us find comfort to know others who also agree with us. We can accept what media and those around us think, or we can look deeper for alternative ideas, then seek those who know and explain them.

Main stream (voice of global elites who control, direct your life) tends to simplify our life, eliminating shades of grey, diverse thinking, alternates.

**Crop circles** are debunked as hoax in most periodicals. I'd never given them much thought, until I saw Collin Andrews [www.ColinAndrews.net](http://www.ColinAndrews.net) vide. Andrews is an electrical engineer from the U.K., has been researching the crop circle phenomenon since 1983. He gives reports and physical evidence of many things not understood by our sciences. They are amazing in many ways; geometry, changes in the crops, radiation, speed of execution, ...

Main stream tells these are meaningless. They explain that boys with boards go into the night and press down crops to make unusual patterns. Some have paid teams to do just this, thinking this explanation will satisfy most people, as it does. Popular opinion tells us that crop circles are meaningless, they are the work of pranksters, hoaxer

to fool us. Main stream dismisses this discussion. Back to work. Earn and pay taxes, support the war.

Even I was caught in the main stream illusion. I'd never thought to give the subject any further consideration. I "already knew the answer". These formations are meaningless.

Yet, now that I have learned, through a pattern of observation, that much of main stream is designed to take us away from subjects, to **keep us from primary information**, to keep us from finding other people and information that allows us to know deeper and more detailed information.

So I have developed a method to **Pierce the Veil of Secrecy**. Pick a subject, read of it, pick words, ideas concepts, names, events form it, and explore it further on the internet. With thought and time, you can et very deep on most subjects. Do not be defeated, excluded by dominate media voices and high authorities dismissing these ideas. Their purpose is to keep the information from you. As you develop more information, **do not be concerned** if the information is **true or not**, just follow it further to make more searches.

You may find of a book or author that you'd like to preview. Contact your local library about inner library loans. Our library can find and bring me a book anywhere in America and beyond on loan for 30 days for about \$ 3. This is incredible deal. When I hold the book, I can some times find the book or chapters, from a phrase search or by searching for some of the term, events, people mentioned in the book, following the clues.

I have often followed information I did not believe, that was not consistent with what I "already knew" but I followed it any way. Perhaps I was working to completely dismiss it, but on the contrary, I found more information that actually proved and confirmed the suspect information. It is easy to be quick to judge (with too little information) to quickly return to common, conventional thinking. It takes work, focus, thought, time and energy to Pierce through the Secrecy to find the more fundamental sources and information.

When I encountered **Texe Marrs** (ret. USAF), I wondered if he spoke truth. I searched his name on internet and found many who said he spoke without references, without proof. What he said was not true.

But why believe them, I thought, so I found what Texe had said, then I checked if it was true. The statements seemed untrue, unbelievable, but after deep research, I found many primary, even public records that easily confirmed what Texe says is true. But I **had to have the ideas, the words the terms** to investigate them. Some were Operation Garden Plot-Plan 55-2 Operation Gladiator, UN Agenda 21 Project Cloverleaf, Blue Beam, Rex 84. Texe has written many books, revealing incredible things with clear references and proofs. Those who don't know of his evidence and proof have simply not investigated him. It is easy to ignore information, but there is a reward to explore it. I have met Texe at Pastor Butch Paugh's annual conference uniting researchers, authors, media people with ardent Truth Seekers from across USA.

The trick is to find the **fundamental ideas** that others are trying to share with us. Main stream keeps those people and their ideas out of circulation, **beyond consideration**. When we occasionally encounter these "lunatics" we instantly believe they are wrong because they speak differently from what we "already know". But with your intent, time and energy, you may find, as I often do, that these **still silent voices**, actually point me to a reality that I've

never considered. At each penetration to the inner world of reality, I am more enabled and perceptive to other ways to Pierce the Veil of Secrecy, finding new patriots, scientist, investigators with great insights to offer. New ideas lead to new people, and they lead to new ideas.

## // Think – don't assume !

*Don't assume what you can know.*

They don't want to explore or discuss.

**Assumptions** They choose the simple plan that does not involve them or obligate them to action or thought. If they talk with others or face the facts, they can avoid complications, but assumptions allow them to delay their involvement, hoping they will not have to think or act.

News: Report obvious observations, assigning things to local authorities or known events. Reading the news puts you at rest, all is explained, you have no reason to investigate or become involved. Often there is a conclusion stated that conditions you to think a certain way; support gun control, let government manage things, etc.

Local News: Often exposes facts not repeated at national level. Most assume that the former facts were not confirmed or were in error. Facts later discovered are often revealed at local level after an event, but not posted at national news, which has already resolved the issue and cast a way of thinking in the general popular opinion of the American mind.

**Movies:** Often reveal hidden things, yet we discount them as imaginary, fictitious or too far from what we know to be believed.

**Scientific Journals;** reveal deeper truths than reach the general news. News is for the general population, assuming quick, simple solutions without involving complicated thinking.

**History**, in books and Universities, excludes many facts by choice, leading us and memorializing a certain way of thinking. 1984, Orwell's novel, mentioned how current government adjust past histories to support their current policies.

Discovering, perceiving things is hard part.

Many, as had I, forget they have the **ability to know**, rather than assume.

## // How to Think

**Language** - the limit of consciousness, and thought..

Things we have not labeled, don't know or understand, pass before us unnoticed, not

remembered.

**Jigsaw Puzzle** - When you understand many things, when you get many parts in place, then you begin to see the whole picture. Then you can see the pattern and can predict what will happen next. Study a subject to be able to predict it's future. Be curious, examine, investigate, test.

But when that which is **perfect has come**, then that which is **in part will be done away**. When I was a **child**, I spoke as a child, I understood as a child, I thought as a child; but when I became a man, I **put away childish things**. For now we see in a mirror, dimly, but then face to face. **Now I know in part, but then I shall know** ... 1 Corinthians 13:10-12 KJB

Money, power, control rules our physical world.

**Knowledge is power** - Accept and they both grow.

On a computer, you can record, organize and remember things, photos, files, videos, etc. When you are skilled you can manage many pieces and see more complex things as they are comprised of how many different pieces, events work together.

## Find Things in Computer – Total Commander

**On searching, here is clue.**

Things that are digital, electronic, on computers, discs, on the internet, can be easily searched with a **find command**. Elsewhere I discuss searching on the internet. That applies to this and this applies to that.

On a computers, I use a windows program - **Total Commander**. It's a program to manage, find, use files and programs on a computer..

I have **100,000+ files** on my computer. I don't know the names and folders where they are but, with Total Commander (Free download) I can easily find most anything quickly and easily.

When I have a **paper** printed from my computer, I give Total Commander a string of words to search all documents for that phrase. I find files that contain that **string of words**. Even though I don't remember the file name or folder name where I put it, I can still find the file quickly with this search technique.

Rather then read a word processor document or

even a page on the internet, just search for a word. The computer can read much faster then you to find a word or a subject within a document you are looking at.

I use this technique on an **internet search engine**.

I searched google for just the letter "**a**"

It reported **24 billion links** or articles, documents, etc..

So the internet web is at least that big.

Now if I have some subject in mind, or in my hand, or I saw or know about, like an article, documents, a tax form, I can find it electronically, maybe as \*.doc or \*.pdf on the internet.

So I just take a somewhat **unique phrase** from the book, form, or document.

Read the chapter elsewhere in this book to understand how to search on your computer and or search on the internet for specific things with a

“quoted phrase” or generally by a combination of words and concepts.

“The dog crossed the road” (does not seem very unique)

“The Bolsheviks crossed the Prussian River” (seems more unique, unusual)

If I **have a document**, or book, or paper, that **might** be on the **internet**, even in **pdf** format

I search for a **quoted string of words**

Often I can quickly find the exact document, chapter or book in text from on the internet, usually in just a few second. If I get many results to my query, I can narrow the search.

The trick is to have an **exact string of words from the actual document**, and **quote** it so that the order of the words cannot be changed.

I have used this for years on my computer and now I find it is equally quick and effective on the internet.

Sometime I am looking for something that I know.

Say I have a book, I want to refer to you the text or print some pages or refer the book to another person

I like to have the **book electronically** – where I can do these things and more. See copyright rules.

So I find and download it from the internet. This is much easier then scanning the book into my computer.

Also, I can send to someone the file by e-mail, download to my web site or send it on a floppy disk or a CD.

Or I can just tell you a web link to the book,

That way I can give you much information in simple web link as compared to getting and sending or printing the book for you.

Even simpler then a web link like:

<http://www.CornellUniversity/library/book/Historyof>

RussianWar.htm (hypothetical)

would be to quote an **uncommon phrase**:

“Tsar Nicholas fled the palace with Rasputin close behind” *(made up phrase)*

iNet search engines ignore punctuation, capitalization in search queries

“the dog, jumped” or “the DOG. Jumped” or “the Dog JUMPED” are all the same in search query results.

"Voltage ... used; on experiments"

### **Punctuation and symbols / , . are ignored**

These words are from a text phrase from a book I recently got.

I may add the book author outside of quotes (not always needed)

This gets me immediately to a published book in pdf on anti-gravity.

Just some tips. I hope they might help.

### **When Two or more Agree. . it Will Be Done**

Cooperate

When two or more people work together, they can encourage each other, fill in the gaps, combine and get the strength and the compliment of their diverse abilities.

I'm engaged in many projects. I like to find people with similar thoughts, goals, methods, energy and commitment, to share our tasks and speed our progress.

## // **Confirming info, new discoveries is easy.**

Information has never been easier to obtain with access to the greatest tool to truth and freedom, the internet.

Why many are locked to what they already know. They're not open to reconsider things about them:

- To protection what they have, property, job, family.
- Familiar with leaders and neighbors thinking.
- Lazy, don't want to rethink, study, know, it might cause them to change their behavior or lose some property, or friends.
- Fear of reprisal from government, friends, work associates..
- Pride, desire to remain in the popular set
- Believe what most believe must be true.
- Doubt they could gain to see a different reality.
- See, touch, hear, know, authorities,

institutions, who believe what is commonly thought.

- Lack discernment, science, ability to reason and determine logic and truth, thereby believe they must trust other popular leaders and experts.
- Logic, history, subtle changes
- Leap of Faith, believe something unexpected, unseen from inner sense, confidence, self assured, history of past good calls.

But **you can**:

Search internet: key words & phrases for real facts.

Connect the dots, make deductions, follow logic, patterns, histories, methods of operation.

***Intelligence is the ability to see a pattern in diverse elements.***

If you learn or suspect something, it is easy to find

articles, witnesses, news coverage about the subject. As you grow in your information, you have more clues to search internet and can get further details on the event.

## // **Detective Sherlock reasons deductively**

### *Broad thinking in a narrow world under the stars*

**Detective Sherlock Holmes** and Dr. Watson went on a camping trip.

As they lay down for the night, Holmes said: "Watson, look up into the sky and tell me what you see".

Watson said "I see millions and millions of stars".

Holmes: "And what does that tell you ?"

Watson: "Astronomically, it tells me there are millions of galaxies, and potentially billions of planets.

Theologically, it tells me God is great, we are small and insignificant.

Meteorologically, it tells me we will have a beautiful day tomorrow. What does it tell you ?"

Holmes: "Somebody stole our tent !"

## // **Follow the Clues – like Sherlock**

Like Sherlock Holmes, **reason deductively** Follow clues from one report to find relevant and expansive other reports or documents.

As we learn some things, they become keys or links to see, to learn other things. Follow the clues. Our minds are often limited by our understanding.

When we cannot see or understand links and relationships, causes and effects, we doubt they have any relation. We disbelieve things observed or referenced for lack of understanding. Some can operate intuitively, not requiring all understanding or all facts to be seen and in place.

Most are skeptics, stuck in their closed world of exclusion, believing all things have been tried, investigated and decided by others of greater power, effort, knowledge.

On the contrary, should you look deeply at most any subject, you will go far past those about you. Most people only look very superficially at things, taking the simplest, first explanation to be true. With a comment or answer on any subject, they release their curiosity and move to other areas of interest.

To sell or convince a person of something, it takes quite an effort of presentation, information, and demonstration to gain their attention, explain nuances, invite their inquiry, and overcome their objects. (advertising).

Television demonstrates the incredible production costs to prepare and present material on any subject - whether programs or commercials.

Since it is so expensive to create and broadcast, most presentations are well organized and presented. Lacking any alternate view, most people accept material presented without question or debate as being true.

We are trained, or conditioned to accept information, direction, conclusions from our leaders, from authorities, whose power, money, and resources for investigation, presentation, and persuasion far exceed our own.

Once you have dropped your guard and accepted information or a position on a subject, you are normally closed on the subject, clinging to your formed idea. Only with tremendous effort or demonstration can you be invited to review other information, especially should it possibly lead to different or

opposite conclusions.

In investigating conspiracies, which some think are just paranoid, I find many to be true. To me conspiracy theories are born of late news. As the news arrives after the focused investigating, coming from different sources, it is assumed that it could not be true or authenticated. It is precisely because it arrives late from other sources that it will unseat the conviction of the original conclusions. It is information that was specifically suppressed by someone, important facts that arrive late.

Since we have such an organized government and news media, the assumption is that the important information came out first, and anything coming later would be less important, doubtfully true and or little relevance.

With that presumption, most are closed to reevaluating any subject.

What a waste of time to rethink something that has long before been examined by experts and the conclusions are widely known.

Should you actually examine some of these late facts, you may be stimulated to look more. As you begin to collect a very compelling case that important

information has been changed, missing, or not widely known, you find yourself more and more a field from the main stream thinking.

Mainstream is not so much truth as it is the product of powerful media forces that are driven to close every story or event with clear resolve, assigning authority to particular people or organizations and effectively closing the public debate of the truth.

You will find this pattern on virtually every element of news.

Even in your local papers, should an important person be compromised, like a judge's wife caught driving drunk, their importance in the community may well change the treatment they get including the exposure to the public of their error or indiscretion.

News therefore is bought and sold like any commodity, potatoes, gasoline, drugs. The highest bidder, either owning the publication, controlling or contributing to it effectively sets the stage of what will be covered, how and with what parameters and or restrictions.

## // Tarzan, advancing as Ideas, Progress

*You can only advance if you release former ideas !*

**Tarzan** moves through the jungle, swinging from vine to vine.

*He can only progress when he releases one vine to grasp a new one.*

We, as Tarzan, can only progress when we can let go of old ideas. When we encounter newer, better ideas or methods, we must let go of inferior ones. The more of the past we hold on to the less adaptive, progressive, the more delayed and impaired we are to a better future. When you discover or learn new things, as you grow confident of your findings, you must let go of old ideas to embrace the newer ones..

Be brave, be bold. Grasp new ideas and concepts. If you hold on to all your old ideas (baggage) you once had, you'll find it's an impediment to moving forward to new ways of thinking, new skills, new people. You can consider and test new ideas before abandoning old ones. But ultimately to progress, grow, learn, you must let go of some proven false ideas.

## // The Complex is built from the Simple

You must crawl before you can walk.

To understand new and complex concepts, you must first understand basic ones. You must crawl before you walk.

Curiosity is what drives us. Many are satisfied to accept the status quo, what others accept, what others do. A vast world of opportunities awaits the curious, those who invest the time and energy to seek a newer world. Change comes from those who want improvement, who want to step away from problems, limits, confinement.

I work very hard **to find an easier way** to do things, then I **do them many times**, to an advantage. Others may **struggle in hard ways** to do things, and then cease doing them, **abandoned them because they are difficult**, taking precious time with little reward.

It is not necessary to change. Most people do just modest change as they sense a need or see a possibility. I change radically often. I have done so many times before, with great victories. The more you do anything, you should gain in speed, ability and confidence. I often venture into places unknown, and

quickly figure out how to manage in the new environment, situation, new thinking, etc. If I choose to go back, I can, but the more I learn, and see a new world, new horizons, the more I am drawn forward.

If you are thinking of buying a new product, car, computer, most want to be absolutely convinced and proven there will be a benefit, that it can help them, in speed, economy, save money, or some clear tangible rewards, before they will buy. Now who is going to take the time to convince you ? Only one who will profit from their involvement. But if you learn how to do your own research, you'll have more opportunities and can evolve faster.

I take chances, many, bold and decisive. I know you cannot fully **understand** a new world, like a computer program, a language, a religion, an organization, until you are **involved in** it. It's when you're working in a new world then you can clearly see the advantages and disadvantages. Walk a mile in my shoes, one might say, before judging me or my methods.

So this ultimately is a **book about change**, about **thought**, a book about faith. And having responsibility; the ability to respond and the **responsibility to respond**.

It should separate you from the status quo. You'll learn **you are your best guide**, your best protector. What you assume and accept may not be to your advantage. You have the ability to have a better, safer, healthier life and future. You deserve it. Now go get it !

(A word of encouragement - Each person has unique experiences, from which others can gain. If you make your experiences tangible, put them in writing - you begin the process to help others, make your knowledge and insights more available to others ! This is just my story. I encourage others to focus their thoughts, write and be heard. **We can change the world and we must !**)

## // Devil is in the Details

*Belief is strengthened by facts !*

With greater knowledge, testing, holding any idea and finding a world of others adhering to it, we adapt and trust it. Details can be tested, confirmed, argued or disproved. Generalities are both hard to believe and do not aid in confirming information. Things believed in faith, without substance, rely completely on the trust in the authors. Things believed because of a known science, physical facts or reputable sources

have a more tangible, durable, impenetrable conviction on our part.

When we have particular details and test them against alternate sources, records, witnesses, evidence, they either strength or weaken a story or supposition by their ability to unify the thinking, the convictions of many people. The more diversely, in many witnesses, multiple pieces of evidence, record in various forms; published, public or court records, or recordings in film, video, seismic, the more we are compelled to believe a story or situation.

Ultimately our belief is dependent on unseen factors, like our trust or confidence in the spokesman, witnesses, and or the presentation of the evidence, but hard facts are definitely a component to our believing something.

We may also be influenced by others who do or don't believe the evidence, and or their perspective, and or consider their investment, advantage or position on the subject.

## // Learn - Teach

**We must** listen to learn. *We observe some of the world, but get most information from reports of others.*

News, government and TV only talks to us.

They do not listen or take our questions.

There is no debate as to what has happened.

Even our **education is based on rote memory**, learning what we are taught, not **learning how to think** and **find** information.

In a teaching environment, you should have access to a teacher who can respond, take your individual questions, adapt statements so you understand them better.

We learn best in a caring environment, with a dynamic teacher who can respond and attend to us.

As adults, we're treated as robots, puppets, trained just to absorb information from news and from authorities.

I applaud the **Socratic method** of **posing questions** to students, so they reflect and respond under their own will to the subject at hand. You lead them gently to understanding by eliciting their willful cooperation. Cramming information down their throats to memorize and repeat is counter productive. It is hard to implant the information, and kills the thinking of the student.

Do we want to be robotic slaves,

or thinking, cognizant, caring, creative individuals ?

The best of teachers is dynamic with his student.

If you want to advance a person from A to Z in knowledge, you can only present information one step at a time. As the student embraces, considers, and accepts an idea, then you can build on it. If you go too fast, laying down newer ideas based on earlier premises, before the student has accepted the earlier premise, you will cause division, a split. The student will abandon the teacher and the new knowledge, and will return to the safety of what they knew before, their earlier precepts. Often they will seal themselves to avoid again considering the new information. So a

bad, hurried teacher can isolate the student in his former innocence, rather than encourage him to grow in knowledge.

People are delicate. What they consider, discuss is dependent on many things like, the teacher, fellow students, the environment, content, subject, presentation, format, need, circumstances.

In modern, rushed times, the slightest abrasion can break a relationship, sending students adrift from one teacher, and more vulnerable to other forces or influence of other information.

The national news and sports channels are ever present, like big brother, drumming down on us from every corner; restaurants, stores, lobbies, ... As others listen to and become absorbed in the latest fetish of the media, you find if you are not connected to the current news, you are not connected to your friends, to your world.

**// Student - Teacher** – steps to learn, comprehend

To teach is to learn, to learn is to teach.

When a student endeavors to learn, he begins in seeking information and choosing a teacher, whether personally, or through their published works.

Any thing can stimulate your search for knowledge; the subject, a teacher, the community, or another reference to the subject or some attribute, use, advantage about it.

Similarly, when a salesman presents information to a prospect, the prospect already has general knowledge about the subject or product. The salesman, the persuader, does not really force anything onto their prospect, but guides him with steps to a focused understanding of how the products features suit the prospect's needs. The best salesman, listens to understand the prospects situation and particular needs, so he has something to tie the prospect to the product.

**All things are driven by desire.** *Desire is the fire, to what ever you desire.*

In teaching, in learning, the student must comprehend each step in the progression of thought. Complicated things and conclusions are only reached through a series of steps, each understood and accepted by the student. Some steps may be hard to understand or learn, and other approaches, different analogies, examples, models, arguments may be presented to overcome the objections (in sales) or the disbelief or non understanding of the student.

Most people can be led to complex knowledge and understanding when they follow a leader or a prescribed set of steps, or follow a logical progression of events, examples, etc.

Some paths lead you to deep knowledge and understanding, while market forces or controlling people sometimes lead you away from deeper knowledge by presenting obstacles, distractions, subtle lies and other forces to pull you away from pursuing something.

Many things are hidden from the public view by particular people who focus on hiding information. They are called debunkers. Of a subject, like crop circles or UFO, they choose some of the weaker

evidence and or arguments and ridicule those proposing them and or making challenging models and or arguments to lead you away from the discussion of the subject. Their primary motive is to keep you for looking at more information, in more detail, with more relevant, tangible, factual, persuasive points. They discredit the proponents, and lead you to believe it is a waste of your time to pursue the subject. Such has been the fate of many things covered over by widely published debunkers, while the subtle and revealing truths are kept from general circulation, keeping vast populations uninformed of many things.

Some of these subject, which have been debunked, yet are vitally important are relegated to the subject of conspiracy books. Yet, I have found, should you take the time and trouble to actually delve into the facts, the deeper issues show considerable truth and indicate widespread deception to many. The proponents of these subjects are suppressed from there right to free speech, closed from the media and the “supposedly free” press. Expounding truths can consume your time, energy, and alienate you from most people who have chosen to simply follow popular opinion without curious or inspection of the facts.

Our current society, stressed in all dimensions; time, money, concerns, is built on the foundation of accepting the truths of professionals and institutions where the foundation information is no longer examined.

After reading over 2,000 articles on 9-11, I was shocked to see that the media hides much information from the public. After reviewing the change in the laws effecting the media, and reviewing many other unpublished yet extremely important, relevant and timely articles in books like "Censored 2002, ... 01, ... 02, ... 06", I realized the omissions are intentional.

### **// As a child learns**

A child will play endlessly in sand, with sticks, in the woods. Their vivid imagination can supply as many props as they like. Their inquiring minds can synthesize new relations, and their endless energies can make innumerable efforts to try diverse possibilities. If they are alert, they may discover new ways of doing things.

Adults often work in reverse order. They only begin things with predictable results. They are unnerved if things take more time or cost then they anticipated. They limit their activities to specific goals they have. They want predictable results.

Unlike the child who may try endless possibilities and discover things completely unexpected, the adult is so focused as to miss great discoveries along the way. As they are focused on a specific goal, they may not see good things that happen by accident, discarding them because they are not the things they immediately seek.

Broaden your focus, lighten your tension, be aware of the things around you; people. experiences, relations. I often find good things where I least expect them. ***Chance favors the prepared mind***, states

## **Computers can speed your thought and work**

Our thoughts, experiences, knowledge, are our tools.

We can store records of such things in our computers in files and folders. Programs allow us to view, print, change, and expand our information and resources. Learning how to use our computers and programs can speed our thought and the manipulation of symbols, information, projects.

Although it is debatable that computers can think, they certain can speed our clerical efforts, if you learn your software and strategies.

I have no funds for a secretary, nor the time, energy, resources or patience to do complicated work with a pencil or a typewrite, yet with a computer, enhanced by my software library and my tomes of created or acquired files, I can quickly and easily create complex, valuable, creative and unique works that others find valuable, persuasive, enchanting and useful.

## ***// If we listen, we can learn***

To learn, we must first suspend judgment. Leave your former thinking at the door, listen, reason, question, inquire. If you think you already know, you shut down your ability to listen, to hear and understand. Sometimes, just small nuisances can give us new perspectives, from there new horizons, and ultimately to new ways of thinking and seeing.

Most of our lives are closed for thought and analysis, we are running on auto pilot. We have already considered, or debated an issue and made a decision. We are invested in the position that we have taken, having bought a particular computer or car, or live in a particular neighborhood. Since we are invested, it would be great pain, strain or financial loss to change, chose another alternative, or consider information that would shake the foundation of our conclusions. We simply will not hear or debate things that may harbor different conclusions. Much of this we feel is arbitrary and harmless, and therefore not worth our consideration.

However, sometimes, to open slightly, allows us to see a different perspective. Knowledge is power, once we gain a little, we are empowered and in position to gain more knowledge, insight,

understanding. As long as we stay outside of the information, inspection, introspection, we cannot see the facts and reach conclusions based on them.

Typically as we age, or commit to people, property, or professions, we slowly **close the doors to opportunities** around us – focusing on specific goals. We lose our broad vision as we are focused on a particular goal.

Frank B., a wise man, said to me (for readings, meetings, any event): - show up, - pay attention, - be truthful, - let go of the outcome.

On the contrary, we usually approach things with fixed conclusions and we look for the things that confirm our pre-determined goal, or conclusion.

How much wiser, attentive, perceptive it is to go to a subject with an open mind, exploring options and possibilities before committing to a conclusion or an action.

**Learning involves our ability to see**, perceive, **understand** and modify our plans or actions to our advantage. Some things cannot be observed from our

current vantage point, our position (in ownership of some property or membership in some organization). To be free of entanglements, broaden our perspective, our vista and therefore our understanding.

## **// Debate stimulates thought**

Like Socrates, question others to focus their thoughts.

By their **willful response** is the best way to teach someone something.

People learn better rather if you don't tell them directly, which would challenge your will over theirs.

Information, encoded in language; words, articles, books, video, photos, music and more, is abundantly available from many sources, news, institutions, libraries and the internet.

No one source is always complete, comprehensible or true. Each vary, whether created by a person or an organization.

The internet, is simply a clamoring world of the voices of millions of people, groups, institutions.

On the internet, you can find the **root cause**, the **original reports** of observed events.

Most all we know of the world is based on what others tell us. We've found that others distort the truth, so they have an advantage to sell to us, provide for us, or other wise gain our dependence and homage through trust, money, or submission.

Of all sources of information, the internet has to be the most diverse, abundant, simplest, cheapest and fastest to access.

**Learning** is what **elevates** us from the limit of **what we already know to what we might know**. Learning can help us grow, increase earnings, safety, health, and more.

You can learn how to work the internet to yield information and to test for deeper truths.

No single report, to me, is a fact or truth.

But when I find others agreeing or restating in similar perspectives, I begin to trust and value the information.

I believe in a crowd of witnesses, spokespersons – especially when they are independent, unrelated, and unconnected.

***When two or more agree, it will be done.***

Synchronized voices are a greater testimony than a single loud voice.

***Never doubt that a small group of thoughtful, committed, citizens can change the world. Indeed, it is the only thing that ever has.- Margaret Mead\_***

As I find new evidence, or reports, I learn how to

search to see what others might say about the same event, facts, evidence.

It is easy to find information to negate things, but with a broad search, you can often find others who support the information.

I've often found loud dominate voices that say there is no information (on a subject) or that which I've seen is not true, yet, Piercing through the Veil of Secrecy, I can easily find many other voices that state particular events, dates, locations, public records, articles, books, congressional records, that to me confirm that the information is true, tested, viable, tangible. Now, so many things are available directly through the internet.

I trust the concrete facts over the authorities who deny them.

Before I began my Truth Seeker quest, I simply was not aware how easily you can find all these other voices, through the many resources currently available on the internet.

Again, the internet is not the truth, nor the answer, it is just a connecting medium that gives you direct access to the records of here before separate, distant, private or remote records.

You can argue against ideas, but it is hard to refute facts, hard facts in obvious public records.

In yesteryear, a book like this would have to prove every point with references, but you should learn or know how to easily take a fact or a premise and quickly search the internet to find those who support or expand the idea.

You need not believe all that you see, read, all the speakers that talk, but you will invariably develop new standards as to how you establish your own truth.

My new world is built entirely on people I have never known before. I've let go of the talking heads on the news that were reading scripts.

I'm now dealing directly with people who have hard evidence, reports, records, references that I can see and affirm.

I was living under the authority of distant mega news agencies, now I am working hand in hand with people who have their and my similar interest in hand.

We choose to find and help each other to build a better foundation.

It is a digital, electronic world. You have power and access to more information and knowledge than ever

before. Learning and using your computer to see and understand the world will far advance you from limiting your world to the controlled main stream media that comes at you in; newspapers, TV, movies, books.

Libraries offer broader views, but no other resource can give you the visions of millions of people like the internet.

There are forces working to control and limit the internet, to protect the power of the main stream to dominate our thinking.

They pretend they have to control it to keep young people away from pornography sites. But their real and present fear is that more people are awakening to other sources of information than the controlled news.

## **// Truth trumps lies.**

*Truths are durable, compelling, easy to confirm and durable to stand on.*

Lies have to be continually repeated, information has to be controlled and limited.

The news networks continue to say no evidence has ever proven the JFK assassination was any other than a lone assassination.

I collected volumes of dissenting information.

A little investigation should show you;

- 103 witnesses attested to the assassin's shot coming from the grassy knoll, (They have all died or killed in mysterious deaths.)

- 12 movies were taken by spectators in Dealy Plaza. After the shooting the crowd ran to the grassy knoll, where the shots came from. I have copies of the films,

- 2 caskets traveled from TX to Bethesda Medical Center, an empty ornate one, and a more utilitarian casket. The body and wounds were changed from what the Parkland doctors saw to what was included in drawings only in the Warren Report,

- The 12 member Parkland Medical team, each one individually interviewed says that the Warren Report's descriptions were vastly different than the wounds they saw. They individually described the wounds to show the bullet entered the front throat and exited the rear head, from a shot from in front of the limo. The illustrator for the wounds for the Warren Report was only told what to draw. He did not have access to the view the body or photos,

- The motorcade varied from standard procedure in many ways, traveling slower, opening up the protection, changing the route. hundreds of facts,

This is not conspiracy theory, but facts suppressed from main stream reports.. Much of this was revealed. Congress reopen the investigation creating the House Select Committee on Assassinations, where Robert Groden served.

You only need to open your eyes to find the shocking, greater truths. They are in easy reach. You may have just not known how to find them or wanted to find them before.

Yes, many want to believe the authorities, thinking they are safe to agree.

They accept preposterous premises, like **the magic**

**bullet** which according to Arlen Specter, zigzagged through Kennedy's and Gov. Connally's bodies. One bullet supposedly caused many wounds, then later appeared miraculously at the hospital on a stretcher, yet virtually undamaged for all it's travel, breaking and splintering bones.

You can reason through the evidence or just blindly accept the authorities. Most just accept the authorities. That speeds the breakdown of our country.

## // An Argument, Convincing You

Words are worthless *until they're read !*

### Concepts are nothing until they're tested.

You'll find many powerful people to deny these truths, but if you have the ability to read, reason, think and confirm, you will find, as millions have, that all these facts tie together to make an incredible truth.

Neither I nor anyone, with many words, documents, photos can convince you. Only you can make that decisions, make that leap, accept or believe information. We usually believe on the best information that we have. When we get better information, if we consider and accept it, it may change our understanding. Most avoid change, and therefore new information.

We each have different experience and different reasoning process. Many like to stay in a crowd, others can venture further out alone, based on knowledge. Eventually even they can find supporting comrades. But the evidence is clear and for us, easy to confirm. If you want **clues** on how we **gather and focus the evidence**, just let me know.

When you encounter something new or foreign to your thinking, you should not just reject it. Sometimes you have to **read it several times**, like a manual to your new camera or computer, to finally **understand** what it says and means. With the internet, it is easy to take words and concepts and find libraries, books, articles from diverse alternate sources that echoes, expands or explains subjects.

## // Information Sources – yester year

*search "quoted phrase" for many confirmations*

Many consider the **source** of their information to be **most important** as I did for years.

We are led to think that **others are experts**, have deep study and training to sort through the complexity of a subject and bring us the simplified conclusions to our benefit. We are conditioned to think others work to our benefit in ways that we cannot. We think others have knowledge and resources beyond our reach and our ability, so we must be dependent on others, not only for products and services they may provide, but even be dependent on them for basic information.

I encourage you to **use your brain**. You are far more able than you think. You must venture out from your isolation and begin to see, think and work with the world around you. Your first step is to learn to deal with information.

I mention many things in writing and on my web sites, even quoting articles from others.

Many raise their eyebrows, wonder if my sources, my references are true.

Any information from news, media, government, even individuals, may be true or not.

Often it seems true, until you learn additional information, or learn that the info was incomplete, or new findings have changed the conclusion.

The point is, information is not true or false by knowing the sources.

**Truth stands independent** of it's sources. It's veracity, it's truthfulness is to be considered by the reader. You have the ability to determine if something is true.

Yes, we are lazy, we'd like to rely on another rather than figure something out ourselves. You alone are your best advocate. On many subjects, you can preview wide spectrum of information to find the truth that best suits you.

Some things you want in detail, some things you just want general information. One should answer to

the level of detail sought. Too much information often causes a person to lose his curiosity, it seems to be complicated, too much work.

I **do not give references** to particular information I find, because I find it is so **easy to find** and get the information - by using an internet search on a "quoted phrase" or even a combination of concepts - see other parts of this book for how to do this and why it works.

So, whenever you see any information, if you just type (or copy) and search the internet for "a quoted phrase" you can easily find one or many sources of the information. You may find it on an unknown web site, or from a highly accredited source like news or university web site. You are the arbiter, you can decide whom to believe. I believe little, until I find a crowd of witnesses. I don't find a crowd of witnesses in my daily news, I do it by searching the internet focused on a topic, event, person. There it is easy to link to others, passing through the invisible wall where main stream tries to limit us.

The source of the information does not guarantee its truth. To me, it is a crowd of witnesses that makes a thing more probably true. I find unusual ideas, not

reflected in national main stream news, then I begin to find other who speak of it, mention it, refer to it. I take the clues, the concepts, details from the articles and search more. Soon I am overwhelmed by the abundance of independent witnesses, confirming evidence and details to the things completely neglected by main stream.

Main stream media (controlled by global elites) tries to simplify our thinking and get us to walk to the beat of their agenda. Focus on your contribution to society, make money, do your job, pay your taxes. Do not think about government, pharmaceuticals, medicine, federal reserve, or *our individual freedom*. Simply do as you are told. Do not meet, assemble, talk, debate about these things on going in your world. Just accept it and follow the lead and direction of your authorities.

I think the reverse, unless we think of our community, our future, and the bigger picture, we will continually be enslaved and dumbed down to lose our perception of reality.

## **// Broad Resources** gives you advantage

The simple case is that any one who tells you anything, is first concerned with their own benefit. They recommend to you things that they can do, things they can sell or things that will bring them a benefit, like a fee from another through a referral.

When you learn how to get and manage information, you immediately gain a financial advantage (you can get things cheaper) and often better. You can sort through what you really need or want, and find fundamental truths that other many not know or not share.

When you learn to use eBay (a bidding bulletin board on internet) you can buy new products cheaper than many stores can sell them (because they have much more overhead, managing a building, employees). Some eBay sellers may work modestly from their home or simple environment, adding very little overhead to their prices.

Yes, you can even get insurance or money back on some of your eBay purchases.

The tick is to learn to think and act, and develop booth ability and confidence to act.

Sure, you may make some mistakes, even lose some money or have a problem. But learn to think, learn to be responsible for your own actions. You can sort through and find better alternatives than anyone else can for you.

**Learn to be the source of your information.  
Don't be dependent on others.**

## **// Digital World**

Reading, writing on paper will long live.

It's convenience, ready access, and common but

If you want to have in-depth knowledge, or do in depth reading and research, the digital world has many major advantages.

You can get information from many sources; the internet web sites, e-mail, pdf files, CDs.

Sources are abundant, cheap (free), easily accessible, diverse.

Read information on a computer screen. Most things you see, you can copy and paste to your own word processor, where you have total control to vary the fonts, size, and format, to ease and speed your reading, study, thinking.

Keep **links** or **copies** of your information on your own computer.

Things from internet or other digital sources, you can capture or copy, then you can manage more effectively. Copy them to your word processor to mark or bold parts for ready reference, printing and forwarding to others by e-mail, mail or fax.

Things that are **written** (printed) are handy and speedy to acquire, study, and distribute, compared to a real event, a video or audio recording.

Why I copy an article, rather than just keep a bookmark or a link. Sometimes the link no longer works, the information is moved or eliminated. If you have the full article, you can do a phrase search and find it some other place.

I scan hard copy articles/ books into my computer, then use an OCR Optical Character Recognition program like Omni Page Pro to convert the images into accessible text. Pdf from image files may not be searchable by key words and phrases. If converted to text or word documents, then you can search the documents for specific. I do not pretend to know all the

things I have assembled, but you can use Total Commander and have ready access to articles, and books, or pdf files that I may have captured. The more diverse your references, the more solid your understanding, your proof. The more convincing, persuasive you may be to other people.

Although I have a vast library of videos and audio files also, I find the written, text files are the most compact, easiest to read, learn, understand and the fastest and easiest to search and refer to.

Consider printed material.

First, work on a computer connected to the internet – where there is a vast trove of information.

Say you are reading from a pdf or a web site, you see an underlined word, term, or article, you can click to further information or search about any word, concept for further articles.

When reading printed material only, you do not have immediate and instant access to millions of other documents.

You may use a public internet access computer (at library, school, work), If you have your own computer with internet access, you may be able to save what you find.

You can bookmark web sites, so to return to re read them, or copy full or partial articles to your own computer's hard drive, or a portable thumb drive if you use a public computer.

The point is, no matter what you read or study, seeing some things may cause you to have further thoughts or questions. Depending on the time and effort to get additional answers, you will or will not explore your questions.

When you have immediate (open) access to the internet, you can find additional information quickly and easily.

Admittedly, the more you know of how to use computers, internet, software, the more you can read, learn, expand your thinking and knowledge. The more you do know, the more that you can learn.

Information in any form, printed, spoken, video,

etc., from any source, news, institution, government, individual, may be true or not. But the more unrestricted information to which you have access (and ability to read and consider), then you can get closer to an unbiased truth.

Anything less is shaky ground.

Many are content to live with the world of information common to those around them, news, peers. Many follow the dominate leaders, spokesmen, but a few of us press on, seeking deeper knowledge, research, study, reading, to approach a deeper, more durable, safer, secure truth.

Be a Truth Seeker; seek, confirm and spread the truth. It may not be popular (yet) but it is necessary to preserve and improve our way of life, else we are run over, controlled by the dominate voices of media (even beyond government and universities and corporations).

Many think high authorities, government, institutions, universities, professional organization – that lead popular thinking, establish things commonly known. These authorities are our standard of truth.

But we can better ?

At [abodia.com/t](http://abodia.com/t) my article **War of Words** shows how information sources have been bought up and controlled, as reported in the Congressional Record.

**So who should you trust ?** The more you learn of any subject, the more fairly you can judge it. If you just read diverse perspectives on a subject, soon the truth emerges. Truth is found in reason, and investigation. It's established by arguments with the more evidence, ones that employ your logic and understanding. These then uproot your former limited understanding, are much more believable, trustworthy than simple conclusions and claims from high authorities.

In our greedy world today, those with money and power have found it is easy to buy out people, institutions, news agencies and then edit or control what they release, what they say.

There are many sources of information; news, TV, movies, institutions, books, libraries, research, and the internet, a way to connect to all of these and more.

So the internet itself is neither true nor false, it is not bias as many different people have an opportunity to present materials through the internet.

True, in today's society, most are in a hurry and want to ride with popular opinion and are quick to accept what dominate voices tell us.

But you have an opportunity, should you seek it, to find broader perspectives, fundamental information that may not be easily available through other sources.

So far, the internet seems to be much more like a free press with free speech, uncontrolled by outside forces of government, organizations, money, power and influence.

You can learn to trust the internet by exploring it, using and testing it. Learn from it.

For decades I relied on authorities, but as I discovered a different side to reality, I'm fully engaged to find and hear counter arguments, hearing hidden or suppressed news, information, witness and facts.

These things lead me to **new conclusions and new people**. Try it, you'll like it.

Do not believe all that reaches you. Be discerning, check things, suspend judgment, learn to test ideas and facts through the internet.

## // Computers- help think

I got a computer in 1978. I learned to use and program it. Since then, I have designed, built, trained, taught, and sold 350+ systems to diverse clients. Along the way, I have built ever increasing and complex computers for myself, and continued to collect a diverse library of software.

I love math and logic. I was an immediate advocate of computers, what they can do, to expand your abilities, thinking, remembering and our actions. I've written letters to 1/2 million people and done many diverse projects on computers.

Of what I do, I keep a copy on my computer and often get out an old project and revise it for a new project.

If you can find what you did before, it is a great stepping stone to a new project.

## // Today, tomorrow, the next day

In life we do many things, but most are a derivative of something we did before.

Yesterday you got up, bathed, dressed, perhaps drove your car, or worked on computer. Each day you do similar things, but in different order, or with

different parts, clients, ways.

Most all my thinking and work begins in files I create on my computer. Whether writing a list to do, chores, a letter to a Congressman, a client, or designing a new project, I find a similar file on my computer that I did before and begin to amend or change it to create a new project. That is much simpler than starting all things new. I can use techniques, libraries, strategies of things I used before.

So if you have access to things you did before, you speed, advance, economize the effort you need for a new project. You are way past the clerical and initial phases, you only need to add the new design, new information or particulars to bring forth a fully developed new project.

The trick to **speed your thoughts** and production is your ability to:

- find old files,
- work with diverse software to manipulate the files to completion.

Of all programs I use, Total Commander, available free over the internet is my single most useful tool.

I can find things I did before, regardless of the file name, the project folder, the date, or content. All those and more are easy to specify in a search to Total Commander to locate, gather, access and amend your former work.

### **Use a computer to learn and know.**

With computers, math, and logic, I became the manager of information. I have about ½ million files on my main computer, and several other computers also, redundant and also dedicated to specific tasks, like video editing, speech recognition, etc.

Am I smart ? (have logic – quick to see, learn and decide), or do I just have excellent ability to manage information ?

Think about how our mind works. We see / hear things. We can record, photo or write them down. If we see something (or have photos) and we can name it (even title or name photos) and we can find them, then we can remember things and show them to others.

So **knowing** consists of the **original experience**, some way to **label** it, a thing, a place, a writing or

photo, and a way to draw up or **remember** the experience or event, like memory or finding a document or photo in the computer. Then being able to tell or show what we remember.

### **Paper is dead ! Dance with Digital**

I am dead on paper. I've handled much, but I find if I scan, copy or type something into my computer, regardless of what I call it or in which folder I put it, I can still find, view, print and or use it much more easily than things I have on paper. Computers can make all your records more accessible, easier to store, find and use.

Some are afraid they will lose what is in their computer. They keep hard copies. With the ½ million files I have, I could not keep, file, print or find that many paper copies. I do keep redundant copies of what I have in my computers. I dynamically change my materials as I learn and or add newer, better materials.

Learning to use a computer can **magnify**: - **your thinking**, - your memory, - your creation and articulation of thoughts, access to them and others, and be dynamic to connect to add new things to old.

It would take many secretaries (much money, time and effort) to do all I do as fast and easily as I do on computers.

So the trademark that separates me from most people, are my huge resources on my computer.

Knowledge is two parts; getting the information, and being able to find and use it. As I have ability to find and use information, I pass those who work from assumption, where I work from fact.

Admittedly, this is not automatic for anyone. I have learned how to do this, and have much experience (yes, I made many mistakes). My unique software library is where I really excel in speed of thought, memory and action.

Teaming up with a computer, learning how to use it, and managing your information with it can be of great benefit, if and when you learn how to use it and how to back it up to protect your information. **By learning, we change our life.**

Everyone has some info on computer or in files, but for an individual with quick access to 100,000 files in

my own private library; e-books, PDFs, photos, articles, broadcast interviews, videos and more, I manage a lot of information easily and quickly.

### **Why all the information ?**

I want to be able to talk to different people, with different interest, with different perspectives.

Some people have a fax and only talk and listen to other fax users.

Other have e-mail, or phone, or letter mail, and are limited to that media to communicate.

**I open all doors of communications.** I can get fax information from one person, and send it on to an other person with only e-mail. I reach out to all media and talk or listen to people in many dimension on many subjects.

## **// Computer Techniques / Strategies to learn**

The **evolution of thought** begins with undefined, ambiguous feelings. Like the dream world, shape, colors, feeling evolve. We solidify them to tangible elements of language; words, phrases, images, sometimes sentences and stories.

Computers can create, store, and view or print things you have stored in them. Things put into a computer are kept in files with names and in folders. Unless you **name** a file, the computer cannot save or access it.

Unless you name or describe something to another person, they would not know what you are talking about.

## // **Tools to Think – google, scroogle, Total Commander, Copernic**

To search the internet, you need:

- access to the internet (at public library, school, work or home), - a browser ( a program) like windows explorer, FireFox, or Safari on the Mac computer.

You go to a search engine web site like: - Google, - Yahoo, - Alta Vista

I use Scroogle.org as I believe they do not keep track of the web sites that I visit, as I understand that Google does, perhaps to remember me for marketing. Privacy is our right, but we need to learn where we are exposed. For less intrusive, private web surfing, I suggest scroogle.org or ixQuick.com - accurate internet search results with full privacy.

Elsewhere I discuss ways to find particular things and ways to search using words and concepts.

When you locate information on the internet you can – view, read, print, save or copy it. You can also bookmark the site, so you can return to it later. If you copy and keep the information on your computer, then even if the web site is changed, moved, or removed, you still have the information.

You store information on your computer hard drive. Getting an additional hard drive or a bigger one is very inexpensive, compared to all that you can save on one. Keeping things in a computer is much more compact, readily accessible and less expensive than hard copy paper and books. Of course, you need a reliable computer & back-up and ability to use it to gain these advantages.

Learning is the beginning of knowledge to power. Practice is the way to remember what you learn.

To keep, find, manage information on your computer, Total Commander is excellent program, my favorite of all programs. When I can find files in my computer, they are useful. If it were difficult or time consuming to find what I put in my computer, then I would not keep and use such diverse information, files, documents, books, photos and video.

Total Commander **TC manages files on your computer.** It's a free download, shareware from internet. It gives you easy access to programs and files on your computer.

Of all the hundreds of programs I've ever used, none is more useful to me than this one.

Thoughts and things can be described in words,

images, sounds. Computers store things in named files and folders. Whatever you accumulate, TC can make it easier to find any files. You can look for the name of the file, or a word or phrase in the file, or by the file type; \*.doc, \*.rtf, \*.jpg or by a date range, saved in last 3 weeks. I manage about ¼ million files on my computer. I have no idea what I named a file or where I put them (folder), but I can give TC instruction criteria in a few seconds it will show me my file or a list of files that meet my criteria.

It allows me to find and use any of my ¼ million files. I do not have to remember the name of the file, or the folder that I put it in. It can search everywhere with just some information about the file, like approximate date I wrote it, or a word or phrase in the file, or just look at word documents, or only image files,

Because I use Total Commander, I can manage much information. I have 100,000 files on my computer; documents, e-books, book marks and web sites, as well as video & audio recordings. That I have this many files is meaningless, but that I can find, use, view, and share them is the incredible part. I attribute that to my ability to work with Total Commander, which can locate, view and access all these files, regardless

of where I put them or what I named them.

I often modify an existing file I have for a new project, I find the file I need. Then let the software open and use the file, saving the file by a different name as a new project.

Many use their software to find their files, but different software files and retrieves in different ways.

Always start with TC. Find your last file of reference. Click on it to load the program and the file, then immediately save with a new name if you will change the file for new project. Amend, add to or edit the file. TC is great to find anything on your computer. Try it.

Get Total Commander, learn to use it as your primary tool. It can magnify your efforts. Then you're able to manage many more files, keep things longer, have more easy access to everything and soon have your computer doing much more useful work for you, based on the type of things that you can do with the computer.

It's my most useful program, and I've used hundreds of different programs.

I next use simple image management programs like ACD See or Firehand Ember. They are much better,

useful, diverse and handy then the utilities included in windows. I leave you to make your own decisions about a word processor, perhaps components to Microsoft office, and many utilities like adobe reader, and drivers to see video from disks and from web sites like YouTube or Google.Video.

### **Internet Bookmarks**

I have thousands of web bookmarks, my research is deep and exhaustive. I search many subjects to find the world very different than I ever considered before,

But I Pierced the Veil, and find ways beyond popular knowledge and opinion. I have found a way to get to web sites that are no longer on the web. They might have been on the web one to five years ago. There are special sites where you have access to back-ups of the web, like the Way Back Machine. Using them, you can find, view, copy things that are no longer available on the normal internet. It's incredible that former web sites are backed up some where and you can see web sites that are no longer on the web !

### **// *Copernic is a program which stores your searches in computer files***

This takes a diverse task and concentrates it in to single files that you can view, edit, change and still save in their final form.

When you do these operations from your web browser, all your reviews, edits and changes are lost after each session.

Copernic can save them in files of your session.

When you learn how to save and access files on your computer, you can do more complicate things, even thinking, and do them faster and more abundantly.

The more you learn, the deeper you can go.

## // Why Discuss Computers ?

Many think I think differently. True. Every one thinks differently. Most thinking is built on some assumptions, Some of us inspect our assumptions more carefully, to look deeper, and possibly change our thinking and actions to build from a foundation of knowledge instead of assumptions.

I do not read, watch or listen to the news as much as most people do. Many people have far more knowledge and or information than I have in my head, but I wonder where they got their knowledge.

However, when I want to know something, I can find a lot of information through the internet to consider, learn and to understand - before I make decisions and take action. Why ? For as long as I can remember, I've been choosing different paths than others. In entering the world of computers, I found information about Atari business computers. Sure everyone was using \$ 3,000 to \$ 5,000 Macintosh and IBM DOS computers, but the Atari seemed like it might do something effectively and cheaper. I read and read, ultimately I bought one. Then I learned how to use it and acquired much software, learned how to make it compatible and run software from IBM and Macintosh computers. Ultimately, because I did a lot

of reading and thinking, I got a far superior computer and sold hundreds of them, showing others how to buy and use them, how effective they were and how inexpensive.

Many people limit their thinking to what is popular, easy to find and get. I have found with a little reading, thinking and reasoning, I can often find something much better for much less. I've been buying things from a distance for decades. I've bought and used hundreds of things that were extremely successful. Occasionally I am stumped, but I push on thinking that the device has the capabilities, but I know I have to learn how to use them to get the advantage.

So since I am confident and experienced in thinking, I gamble much in getting into things that I alone have to think through to get my results. True, my computer technician has helped me in many bottle necks, but many people do not realize that with some thinking, (hiring and or engaging someone with knowledge or experience) they can break into new areas of utility.

I've developed hundreds of press releases, many shown on national magazine covers and reached audiences of millions in some of the things I have promoted, like my import business of abodia importing

and selling a product from Germany – see web site.

Many people are simply afraid of responsibility and or thinking. Some people have limited time (we all do – choose your priorities) and some have limited money. That is me. I do much thinking to save much money. Some who have a lot of money, spend it foolishly, perhaps, simply avoiding things that require thinking.

How many buy a camcorder, computer, car with many features that they never use. ? If I buy it, I learn to use it. Some think, I don't need it so I won't learn it. Wrong. Only if you **learn and practice something do you have the option to use it**, especially in an emergency. Learn things more than your immediate need. If you know **how to** do something, you can **choose to** do it. If you don't know how to use it, you won't even consider that you could use it.

Much that I learned – playful like a child, I later employed in ways I had not considered.

Consider how a child (with unstressed time) can play for hours in the sand, with an erector set, or building blocks. In their playful, undirected method, sometimes, by accident they discover or create something unique, interesting, useful. They may

remember that and use it some time again or in a different way.

An adult is typically – stressed for time, money, resources. So he rarely plays idly. Most adults only begin a thing for conscious goals committing known resources to a certain time or budget. If the goal is not reached in the prescribed plan, they may abandoned it or at least be angered.

**Learning is the window to change our life.** Learn to do yoga, choose a better diet, read faster, work a computer, search the internet. Whatever you learn can change all attributes of your future. What you don't learn, leaves you in a fixed, limited pattern.

I like to learn, read, study, experiment. The more of it I do, the faster I can do it.

Once I learned how to reason beyond the news, through research on the internet, I converted my suspicion to a fact quickly. Consider that no laws require most individuals to pay personal federal income tax, I searched, found, organized and posted findings to my web site to easily give others, in 10 to 20 minutes the primary concepts they might explore further and or act accordingly. [Abodia.com/irs](http://Abodia.com/irs)

**Information rules our world.** Others rule us by

hiding, distorting and limiting information. Information has never been easier to acquire. You should learn how to research yourself to improve your future in many ways. Fear not, be bold, you will be empowered and expansive as you develop these skills !

## // What Computers Can Do

Think for a minute about how computers work and what they can do. Essentially they mimic things that we can and want to do. There are parallels as to how we think and work which they can help us. Actually, when we come to understand how they have articulated a parallel to how we think, we can effectively learn to think and work more efficiently ourselves.

Jokingly, I turn to the bookshelves beside me and note these books I have.

Brain Power, How to Be Twice as Smart, Think Like a Genius, Double Your Brain Power.

Since I was young, I have enjoyed thinking, inventing, creating, composing, writing, crafting, building and testing various electrical circuits and devices. I love math and science. I suppose as a boy, I was guided that way, living with an architect / engineer father.

I take things apart, examine them, reassemble them, to know more about what they do and how they work.

So I have similarly dissected the process of

thinking. Actually, in learning how to understand and use computers, I've learned how to think better.

My early computers could only manage simple short 8 bit words. The newer computers could handle longer words, 16 bit, 32 bit. A word contains an instruction set. Imagine you are in elementary school. You know and can use words like run, fireman, truck, house, dog. But you don't know complicated ideas and words like encyclopedia, glossary, vilify, cremation. So when you want to describe something, you have to use many little words. But if and when you know the bigger words, that embrace what takes a phrase or sentence to explain, you can talk, think, communicate with fewer words to convey a more complex process or description.

So I thought, at age 35 that I needed to expand my vocabulary. Perhaps I knew 20,000 words at that time. Within 6 months I added about 10,000 words by deliberate and intensive study. I did that precisely so that I could think and communicate more quickly and more articulately.

So from working with my computer, I learned how to think faster and better. There are other ways, I have changed my life from what I've learned and how I use my computer and the programs and information

that I handle.

Many have a secretary, wife or child that helps them.

If you make a computer your partner, it can do many things, quick and easy to save you time and trouble.

If you have a long time relationship with a wife, sibling, work partner, you learn an abbreviated language. You can say or gesture complicated expressions in less words or efforts, because your partner has experience in knowing what you want. So with my computers, I've spent 30,000 hours on the keyboard, I have found many short cuts to do complicated things very quickly, using a variety of programs and strategies I have integrated.

Be open, you too will find that everyday in many ways, you have opportunities to change and improve.

My suggestion is this. Each day you arise, brush teeth, choose clothing, probably dress, possibly drive somewhere, and or read or act on something. **Most that we do, is a varied pattern of something that we did before.** Rather than starting each project **new** like writing, composing, graphic, letter, bill, etc., if you can find some remnant of **something you did before,**

maybe you can adjust or amend it to help you current need or project.

Say I wrote a letter to a Congressman, but am not having any results, or response. If I can find the letter, perhaps expand or modify it and send it to a newspaper or associate, perhaps the same thought might get energized, a response or an action.

So whatever we do, in thought, memory, description, shopping or any list, things to do, papers to file, articulating steps to a project, how to fix the lawn mower, reconnect the monitor cable, etc. if you can find, view print and / or continually amend, adjust or correct your notes, you are better off then starting over each time.

To that end, I have ¼ million files on my computers. Some are used frequently, some are just remnants of things that I did, recorded, found, that may have no future. But because it is easy to keep and find them, I do keep them and often use them.

Most of what we do, is similar to things we have done before. If we have easy access to a remnant, file, drawing, description of something that we did before, perhaps we can use or amend it to a current need.

Imagine if you had kept a photo of your dog from growing up, your first car, your first date, your first theme for English class, your poems, a recording of a camp song. Many people have a similar collection on audio tapes, in paper files, in old photos. But those physical ways to keep and file are vulnerable to moving, damaging, losing, water, tearing, abusing.

I keep things in the digital world, with the ability and practice of backing them up. Then I have an incredible resource of access to things that once passed my eyes, fingers, desk, or even finances; things, thoughts, dreams, goals. Many of the projects I start would not actually come to fruition except I maintained, adjusted, reinitiated or persisted on them.

I often work on many projects at one time, suspending each as I wait for the involvement and or response of others, yet managing it all with easy and facility as they are just files on my computer.

Ultimately, I suggest that you get software and learn how to do more and more things on your computer. Certainly know how to maintain it and back it up, possibly know how to create CDs and or DVD disks. If you expand your library of software to the ability to record video and or audio tracks, and or to work in digital and graphic images as well as being

proficient in word processing, you may find as I have that you have vast reaches of resources that stagger those about you. Most don't have deep computer skills and therefore have short memory of a few things, and are vulnerable as they do not have the resources of all that you can easily manage in a computer.

## **// Computers expand our thinking**

*Computers mimic our thinking process.*

Our thinking is improved when we have help from a computer – cooperation magnifies thought and effort.

Computers, like us, have memory – instant memory in ram, like us recalling some things, passive memory hard drives, like us looking something up in a book. They have computing power, like our logic and cognitive skill. They can gather and organize things, symbols, ideas, design, and create new things or combinations like us. They can dispense easily with the clerical tasks of math, clear and legible labeling, notation, and can communicate via e-mail, printing, fax, and broadcast sound and video.

Although they may not actually think, they can speed and ease the things we have to do to drive thought through to products and goals. So in a sense they do think. I can think, write, compose, create, communicate and receive, record, locate and manage hundreds of times more information with an able computer aiding me, than I possibly could by myself. They reduce the menial, clerical tasks, so you have more creative time to think. Historically, executives use to have secretaries and clerks to aid them in their

tasks. Today, a man with a computer, software, resources and peripheral devices can accomplish far more than a man with a diverse staff just a few years ago.

The more you know of your computer, software, or tools, the more fluent, efficient, effective you are. Know your tools, let them become second nature, habit, save your mind for important thought, let the computer manage the menial tasks, else you will have too, and you will then create less.

The final measure of speed and efficiency is integrating your thinking / execution process with able tools, like software and peripheral devices that you thoroughly understand to use their many features.

For everything you own; program, device, feature, that you don't learn and practice, it becomes like a wart or dead weight, as you lose functionality, diversity and efficiency to not be able to employ it.

Most buy potential far more than they need, and yet, rarely develop all the potential they have. If you buy a computer and software, learn to use them !

## // Mainstream Thought- News- Control

### // Who Owns and Controls Main Stream Media

#### Just 9 Corporations control American Media

*AOL/ Time Warner, Disney, General Electric, Sony, ...*  
Legislation changed to allow this.

[It's Our Media, Not Theirs.— Robert McChesney\\_](#)

If the same owners who own the military industrial and pharmaceutical industries own and control the news agencies, is there not a conflict of interest ?

How can they, without bias, do investigative and in depth reports in policing their own industries.

This is the problem. Beyond our congress, the newspaper has historically served as the police dog in searching and reporting of error, danger, injustice and misconduct in the market place. As Roman senator said, who is guarding the guards?

News is not supposed to be just entertainment and curiosity. It is the very fabric of our culture, the extension of our governing process.

We do not elect, chose or have any control over who owns, runs, speaks for our news agencies.

Who is checking the news ?

We once had competitive news agencies, vying for the first, best in depth story. Now there is very little competition. A few nation leading newspaper make statement about things, then all the local news clamors to grab and repeat it.

The local news certainly does not have the resources to check or compete with the large papers.

In major cities world wide, Madrid, Moscow, Tokyo, Paris, there are typically 10 to 15 daily newspapers. In America, we have the New York Times, and the Washington Post. Is there no question on the report, on the truth. One paper has all the answers ? Where is the inept competitive investigation ?

To me, the news is the mind warp of America.

It has lost it's edge and it's ital role of protecting the American public.

Why ? It's no longer a public service, but a business run for profit. Ad and circulation revenues are part of their gain, but excluding information that would limit, redirect, impinge on their co owners

companies is keep out of the attention and consciousness of the public.

If the public does not know, then the congress need not act. We live is a world of deception. By deception they do battle (even on the American people).

See **The Media is the Problem-** book & video, by Danny Schechter

**Wake Up America. !**

Conspiracies - continue while we're asleep, not perceiving ! Unbelievable – Alice in Wonderland.

## // How News Works, National overwrites local!

I've observed some things in news, and later revisions that change or reverse what was said. I thought that after review, confirmation, they were removing mistakes from the earlier unconfirmed reports.

*Now I see the reverse is true. The early reports, local reports often offer or reveal critical information that other people or organizations want to hide.*

I went back and reviewed recent news about the Oklahoma City bombings – which showed live local news footage, interviewing those fleeing the building and those in the street all knew that many bombs exploded separately within the building. A video from news helicopter circling the site did not show any crater in front of the building where 2 weeks later Newsweek's drawing of the damage, clearly showed a crater supposedly caused by the McVeigh Ryder truck bomb.

Randy Weaver- Ruby Ridge, Branch Davidians-Waco, Tex., 1993 World Trade Center Bombing . Look back to original events -the original local news coverage, you will find a very different story than that which the national news tells. - - [more at abodia.com/t](http://abodia.com/t)

## // News is incestuous – cyclical reasoning

As local events happen, there're observed and recorded. News reports evolve, especially as they rise to wider publication and national news.

Forgive me, it had been my assumption that inaccuracies were eliminated and facts confirmed and clarified.

On inspection in many cases, I find just the opposite.

Follow the news locally from beginning to subsequent developments.

**National news** makes initial sweeping reports, often **very different than local news**. If you go back to the local scene and continuing news you may find them differing even more from the national story line.

See article: National News is different than local reports.

Who is checking the news ? The news is never tested in a court, opposing arguments, perspectives are not offered, not included. Stories may have no balance or confirmation.

Yet, if you go back to the local levels, you often find particular facts, circumstance, witnesses that continue

to broaden the gap between reality and what was nationally reported.

News casters quote other news sources. If it breaks in the news (supposedly) it is true. Information that has not come from a news source is suspect, suppressed, discounted, disallowed, distorted.

The news is incestuous. It mainly just considers other news sources. It doesn't have the ability to consider, evaluate, debate any other outside information no matter who the source or what the information.

Facts, evidence, witnesses are not relevant, only the **news that was once printed, is often repeated.**

News that is accepted in some area (or even pretends to be) can be expanded to be presented and accepted in others areas.

Like gossip, it can spread fast, gripping all in its path. Who has the time and energy to question, check, evaluate it ?

God protect the many people who saw the collapse of the World Trade Towers and knew intuitively that the buildings had been pulverized by internal demolitions.

I was not so astute. Had I only watched the video, I might have recognized the symptoms, but in listening to the sound track, the announcers comments, I was overtaken by their statements.

When you are in deep shock, you drop your guard and are less critical, less cautious of the information that you swallow.

See the Shock Doctrine by Naomi Klein

Purportedly, in skit; Groucho Marx remarked, when caught in bed with his friends wife, "Who you going to believe, Me? or your lying eyes ?" Very apropos for our response to today's manipulative, deceptive, ½ truths and shocking news always on the fore front, continually in our face in all public locations.

News channels run continuously at Doctors offices, lobbies, waiting rooms, a continual bath of propaganda.

When I was young, I thought that is what Russia did, continual lies and propaganda to enslave and dominate their people.

I thought, in the united States of America, we had freedom.

## // National News has an agenda.

They have owners, who seek profit, and protection from; - law suits, - delays to their operation, and - questions to their actions. They do not want the public prying into their affairs. They may exclude information that may have effect on their co owners.

Simply put, they try to keep us in stress and fear, shutting down our more humanitarian view of society. Fear your neighbor, strangers, foreigners, and terrorist ! Hate evil foreign oppressors ! Focus anger on foreigners. Don't suspect any domestic person, corporation, government. Don't question authority !

News may quote individuals or institutions. They selective include information that leads you to their conclusions. They conveniently exclude information that might cause you to have deeper knowledge, questions they don't want us to consider.

What they present is what they choose to expand on the perspective they want to convey. Alternate sources of news offer a very different view. Those sources are easily available to any through libraries, internet. American Free Press. Hundreds of web sites offer a view quite antipodal from the mainstream news.

## // Collect Information without judging it.

Our world is built on assumptions.

With little knowledge, bias, or predilection, we often discard information that conflicts with what we know.

We are rushed to a conclusion. Who wants to rethink all we have done before ?

However, the best of **detectives** or researchers will simply **gather information without prejudice** until he has time to **see all the pieces together**.

You may you discount, discard information, clues, evidence, that may not seem relevant (then). But if you hold many pieces of evidence for **later review**, you may discover an unseen relationship. Without the evidence available the link could never be seen. *Be slow to judge !*

It is our impatience, our rush, our assumptions that can cause us to miss the tiniest of clues, the small nuances that unlocks a much deeper level of understanding.

In reading a book , or solving a problem or a crime, **patience is the best ally**.

In watching others take intelligent tests, I've learned

that patience alone allows you to make a higher score. Intelligent people often know or can find the better answer, but in haste choose the more obvious, less discerning answer, having not given full measure to the problem and or each of the possible answers.

We are easily deceived, like a sleigh of hand of the magician, looking away from primary things as other things catch our attention.

**Don't be deceived. Use your brain, your patience, your diligence.**

## **// Sense of Community**

*We need to work with and help each other.*

Working selfishly for ourselves only, will stigmatize, isolate and ultimately hurt us.

Most all that we know, we learn from others, far beyond what we touch and see.

Most things in our world of capitalism are bought and sold, including information.

Surely each of us, for a price have offered service or information that another wanted to buy, even if that service did not help other people also. We usually

spend money to serve ourselves.

We elect our officials, but don't elect the leaders or providers of our news services.

In the past many different voices competed to find and deliver news.

Large corporations use to spend much money advertising or promoting the good or advantages of their products. Unfavorable press released eroded the public's confidence and desire for products or companies.

Now, large global corporations own and control our news.

Surely you continue to get many events, ball game scores, weather, and occasionally expose of a flawed politician, but the air ways are filled with trivial pursuits; the affairs of Michael Jackson, stories of Britney Spears, movies, fads.

***The news keeps us fully entertained, but only half informed.***

## // **How We are Deceived**

For those who are curious, I can share with you tomes of supporting evidence, including government findings, funding, programs, and court cases.

This seems unbelievable, of course, until you read the hundreds of other articles that echo these same themes through many, many cases; in name, organization, government programs, court cases.

The more extensive your research, the more real, believable is the unbelievable.

**To discard a thing because it does not match things we know** before is typical, simplistic.

I only hold, file, and label them.

Learning is embracing new concepts, before judging them.

But when see the **same materials through dozens of different articles**, writers, researchers,

I sense they're **seeing the same event**, with real evidence, witness, collaboration **from different views**.

These are the subjects that **won't reach the main stream news**.

But I have found methods you can easily **follow the logic**, concepts and evidence of these claims.

**The world is governed by people very different than you would imagine.** Disraeli\_\_

The media, who we think fights for truth and justice, is also just a paw to those who own / control our government and courts.

Their purpose, like a magician, or lawyer, is to take **our eye away from** the area of information, to deal with superfluous issues; sports, events, celebrities, Michael Jackson, Britney Spears, ...

The laws and acts ongoing are undermining our very institutions, our free republic.

In America, most things are bought and sold, including information.

For decades, programs have been enacted to

shape how we think and what we think about. MK Ultra is an extreme of that effort.

"None are more hopelessly enslaved than those who falsely believe they are free. " - Johann Wolfgang von Goethe ... "

*// By deception they do rule.*

Elites control, manipulate and steal from us.

*The best way to control people is through limiting their information, through deception.*

None are so confined, imprisoned, denied in liberties and freedom of choice as those who believe they are free (to make choices).

Our corporate controlled news may have easy access to important issues, acts of Congress, world events, witnesses, facts, evidence and information, but they also have total control as to what they will print or circulate, as suits their agenda.

If news might be harmful to the owners of the news, they can easily just choose not to include such detrimental news.

114

Most local / regional news don't research larger issues, they simply rely and repeat what they find in national news, particularly from the AP, the Associated Press.

When we make assumptions, we fall at risk to things working against us.

We assume that our Congress, Courts, News are working for our advantage, standing for our interests. Of what we see, hear, know, that *seems consistent with the news.*

Never before has information been so easy to get and confirm.

Many voices, witness, articles, books, news sources are available through the internet.

Many, who are not practiced in this, believe they could never read or understand complicated issues from simple people who claim to have direct knowledge or experience.

We have abandoned thinking, relying instead on the assumption that our news reporters, their

professionals, engineers, institutions are giving us our best information.

Most all our information is second hand, we assume it's correct from higher institutions and people with titles. Who pays them? Who represents us?

With just a little direct research on many issues, you can Pierce the Veil of Secrecy and find startling facts, evidence, witnesses, and public records that are in direct contradiction with what the news reports.

Most discount this, thinking surely our news is true, most everyone believes and acts on the news as being true, for their actions and reactions in the world.

What if our News is not true, or not complete, giving a skewed picture of reality?

That would cause us to make wrong or inappropriate decisions, like going to war, spending all our tax dollars on hate, aggression, destruction, feeding the troughs of the rich, powerful elite, the Federal Reserve, the military complex who tell us that we are attack on all sides by unnamed, unproven, unseen assailants.

What is our **individual responsibility** ?

Do we need to really know what is going on in the world, or can we just move and think like most news and most people suggest ?

Sure, ***individually we have no responsibility to our fellow man***, most think.

And yet, why is our economy, our way of life, our freedoms, why is our world changing, degrading so rapidly ?

Could it be that most people, selfishly seek only things that profit and help them, selling their service, talents, to the rich in exchange for a piece of the pie, the reward, the money.

Who should have individual responsibility to help their community ?

Perhaps we all need to do our part to help our community.

What are the issues to consider ?

Many focus on recycling, feed the poor, save the whales, preserve the environment, which keeps us distracted from seeing fundamental things that diminish us all.

But who will look at the reality around us, the things the news will not reveal, the really hard questions.

We, at Truth Seekers, believe it is relatively easy to discern what is really on going. We have sources, and reports in many forms, video, audio recordings, articles and books.

How can you believe what we offer ? We have found and confirm our information from diverse sources, scanning the united States, some even from foreign news. The information is consistent, supported by incredible, reliable, public records, eye witnesses, evidence and facts.

If you don't read this alternative information, you can continue to believe it is impossible.

But the more of the information you read, the sharper your perceptions, memory, understanding, the more you will find confirmation of our findings.

Galileo learned discovery is the hard part.

Once you discover something, you cannot then continue to believe that it is not true. Your world is changed, improved. You cannot return to your innocence, to your unknowing. You can deny what you know, pretend otherwise, but then you are a hypocrite, not to act on your beliefs.

You are now in possession of knowledge that can empower, protect, guide you.

Innocence, ignorance leaves you and me at risk to great manipulative powers that are working for their self interest to the unseating of our property, rights, ability, and income.

Wake up and join us. We find the journey fascinating. All of us were just like you when we started. We could not believe the things we studied, we were only curious and suspicious. After we entered the world beyond the media, we were awakened and enlivened to find how really easy it is to see and understand the world around us, and to find, the millions of other Americans who fight this battle with us.

The journey of a thousand miles begins with a single step.- Lao Tzu\_

Whatever you can do or dream you can, begin it.  
**Boldness has genius**, power and magic in it.- Goethe\_

The change to freedom, life, safety begins in the mind, with reading and understanding the world around us.

The news is **intentionally** designed, like a magician, or the argument of a lawyer, **to keep our eyes away from real issues**, and real information.

I've built an incredible library unlike any other in West Virginia, spanning thousands of videos, recorded shortwave broadcasts, 1,000s of articles, photos, e-books. I share what I can at [www.abodia.com/t](http://www.abodia.com/t)

## // **Fear, Hate, Anger**

*Our news pushes an agenda.*

Fear the world around us. Be angry, blame and hate specific people. Select, supply and send soldiers, weapons to fight those who (we were told) are attacking us.

## // **Where does this come from ? What's true ?**

**Profit** (self interest) is the goal of capitalism, of corporations These use news media as a mind control, to distort our thinking and perceptions. This is part of their method of warping the world to their advantage.

[www.AddictedToWar.com](http://www.AddictedToWar.com) explains how our US government, through the CIA, has been crushing small third world nations for decades, terrorizing and enslaving the people, taking their resources; crops, drugs, oil, and minerals for huge profits for global corporations. We as individual citizens don't gain from this. We are told, the corporations need these to fill our needs. Learn the meaning of **False Flag Operation Ab.com++** One strikes another and blames a different party, who received the retaliation. A method to harm another, with the force of your advocate, by fist wounding yourself.

On a daily basis, you are more at risk to a lightning bolt, or being struck by a car, then to be effected by a terrorist, but the media, the movies, the books, all main stream tries to keep you cowering in fear, submissive to their agenda.

*// Intelligence is ability to see a pattern,*

To the unlearned, In a sea of confusion, when random events show a patten, their considered coincidences.

As a society, we have **abandoned the process of thinking**, evaluating information. We just accept information from our leaders, from our media. We are not testing, comparing, debating or analyzing it. Many obvious things that are not true are quickly accepted from media, then encoded in our memories to never be considered again.

Who goes back on **past events and reexamines** them ?

When I learned that 9-11 had hidden much critical information, I wondered, could this **Great Deception** have happened in other areas ?

So I looked back on these events: - Oklahoma City Bombing, - Waco, - Ruby Ridge, - Columbine Shootings, JFK assassination and ultimately many many more.

The **local news is very different than the national reports**. Even published court cases never had access to primary information that is easy to find.

National news has **access to all these resources** and all local recourses too. I had thought that when the national news said different then local news, the national news had looked deeper and corrected earlier errors. Now I find just the opposite. The national news absorbs all the information, then they selectively edits what they repeat, often leaving out critical information. They are driving you to a conclusion, towards their agenda that would be weakened or negated if you knew the critical (but absent) information.

National news was once represented by many owners. Now just **9 corporations control 95 % of the main stream news**. Local news just copies what national news said, they don't have resources to investigate. News become truth. It is echoed and encoded in books, histories and taught in universities. Who could argue with the news, their authority, their dominance ?

But this is normal. Everyone who handles any information typically repeats what he things is important to lead others to his way of thinking. If you don't want some information to circulate, you just ignore it, like protecting a friend or business associate who was involved in a larger event. Let the blame fall

on others, just don't mention your friend's involvement.

Who is spending time, effort, researching and considering information that has been suppressed, eliminated from public news reports ? Only the few independent truth seekers like those I point to in this book.

National news is all tied together, both receiving information and distributing it like through the United Press wire service.

A former CIA director has openly admitted the CIA has agents in all primary news agencies. They, like the NSA - National Security Agency, can write alternate stories and or deflect certain information from involving certain people, companies and or events. What you thought was hidden because the NSA protects our nation from threats, turns out to be simply NSA protecting the status quo, protecting those in power.

See **Transformation of America**, by MK Ultra Slave (rescued) Cathy O'Brien and her savior Mark Phillips. They have 27,000 documents against those that oppressed her and others for decades, but the courts will not hear the evidence, because of National Security, i.e. It adversely affects high government

officials that are in office. They are protected beyond the law via the National Security Agency.

Are you waking up ? See also The **Franklin Cover-up** by John DeCamp to learn more how the courts cannot touch those in power. I have personally met, talked with and or corresponded with the primary witnesses, researchers, and scientist that have led me to this new reality. I did not just accept something I read, I investigated back until I touched the flesh, found the source, got first hand confirmation.

Franklin Cover - Child Abuse, Satanism, and Murder in Nebraska: John W. Decamp, former FBI, private investigator Ted Gunderson, I've met, and know of his impeccable work on many great heinous acts and deceptions in our world. The CIA's connection to the Satanic child trafficking, sacrifice and pedophiles.

In the old days, people use to read books. Now whatever I read, I try to read near a computer or on computer, to make notes and quickly check facts and explore deeper resources. If you are not electronically connected to the internet, your knowledge base is quite limited.

The ruling elite have taken over control of our

printed and broadcast world, the main stream media; news, TV, books, video. They own or control 95 % of our media. But the smaller presses, and now the burgeoning enterprise of individuals and organizations publishing their findings on the internet has been the single most important safeguard to our world. There evidence, witness, reports are seen directly where any one can find, view and use for free. They offer for consideration truths you will not find from main stream. You need only consider them to learn they are true.

We are controlled not by guns and fences, but by limiting our thought.

The world in which I now deal is involved in things I never consider, I didn't question or examine them. On reexamining the foundations of much of my knowledge, I find the truth is very different then the assumptions I had been led to accept.

When you know a deeper truth, derived from seeing evidence that was restricted to you, you have to let go of your old way of thinking.

**Tarzan can progress** in the jungle swinging vine to vine, if he lets go of the earlier vines. When you find new knowledge that is more comprehensive, more compelling more sounded by multiple witnesses and

evidence, you have to let go of your old know. Change is pain. Most people don't like to change. Most would rather not think, just follow the crowd, thinking that is safer.

Actually the reverse is true. Unless we start thinking, considering the truth, finding and spreading the word, we will all soon be enslaved by powers from above that we never saw expanding and coming on us.

The wealthy and established are the lasts to see the reality around them. They are tied to the people, institutions they know. Even those which large families are sort of stuck. Although they may see the new reality, they cannot persuade others close to them to read, consider, see the new reality, so argument and divisions arise. Most people cover back to accept what others think rather than to be alone thinking differently.

I chose to **follow the truth** wherever it leads me, and make public what I see. Along the way, I have made new friends and associates, as others see what I am thinking and they also see from my vantage point.

So thinking different does not make you alone, but

it may cause you to change your friends and associations.

Most people are concerned with things that have immediate effect on them personally, like job, family, money. They are not concerned about community and the future. So these people are easily stressed by financial trials, government edicts, loud news and authorities.

Who has the time to find and stand on the truth.

We are all in a hurry to get more things, power, wealth, security for ourselves.

But the truth is that we need to seek, find and stand on truth. We need to reach out and find other like us and build unity of purpose and people.

While the few people at the top, the elites, the corporations that run the world, they are few, but loud. Most people bow and yield to them to be compatible with their neighbor.

As we yield to the powers above us, they expand their control, deception and lessen our rights, freedoms, money, health and more.

Google ***In Lies We Trust*** by Dr. Leonard Horowitz

He has many books and is long time advocate

explaining how our government has been secretly developing AIDS, Ebola, cancers, first to depopulate other nations and peoples but now these problems run amuck in our own country, from their evil, secret acts.

## // Pieces of the Puzzle

Individually, most find these conspiracy subjects doubtful, unbelievable. When they are mentioned, they ignore or angrily say they cannot be true.

But on study, of each of these, you see how they are all interrelated.

After seeing the great deception in news, the suppression of primary facts, I learned of the Franklin Cover-up, Hon DeChamp / Ted Gunderson involving trafficking of young teenage male prostitutes flown to events in Washington DC involving high officials, like president, vice president, members of congress.

To see and understand the active Mind Control programs on going in the United States.

Transformation of America (book), by illuminati sex slave, under MK Ultra, Monarch Mind Control Programming, Cathy O'Brien and Mark Phillips who saved her from the program. This and other victims like Brice Taylor – Thanks for the Memories – a slave under Bob Hope, Arizona Wilder, discussed by authors David Icke

Red in the appendix of other areas of conspiracy and deception.

## // How the Pieces Fit Together

When you only consider individual things, they seem separate, unrelated, isolated, perhaps even coincidence, but when you gain a broader perspective, greater understanding, you see the interlinking of witnesses, evidence, relationship, then you can comprehend a more complex event.

Much of the forces that shape our world, never reach the consciousness of the lay person. They are guided by what the media says and debates. Many distractions fill our lives. Celebrities, sports, shocking news, and more.

Who quietly reexamines the meaning of the constitution ? Who runs our government ? Who controls the news media ?

Who knows or considers all the secret events on going ?

Richard Sauder, Ph.D. authored book: **Underground Bases and Tunnels – What is the Government Trying to Hide ?** he shows all the activity of our secret government and / or corporations are doing to build numerous bases, cities, structures below the earth. This has been going on since the 1960s. It was once public records and in the

government budgets, but now it is unseen by the public. Has the activity stopped ? No, it is just no longer available to the general public to debate, restrain or even consider. Consider Nuclear Subselene Tunneling - Machines on the Moon

Things done in secret are not done for your benefit.

**Blank Check: The Pentagon's Black Budget:** Tim Weiner ...

"The thesis of the book—trillions o taxpayer dollars are spent on Black Project unknown to the public and even members of Congress.

**MK Ultra** has been an active program funded by Congress. It was once exposed by congressional hearings and in the public mind, but now, stricken from the media and public knowledge, who is watching the development of the program. Clues are the work of CIA's Dr. Sidney Gottlieb – oversaw invention of devices for assassination, and gave LSD to human guinea pigs, ran Mind Control; Dr. Louis Johnson "Jolly" West, Psychiatrist, studied torture and brain washing at UCLA, died 1999),

Another Dr. Donald Ewen Cameron, president of Canadian Psychological Association, and director of Royal Victorian Hospital, Montreal, received large

payments from the CIA to give 53 patients large doses of LSD and record their reactions. The patients were drugged into weeks of sleep and then given electric shock treatments. One victim, the wife of a member of the Canadian Parliament, is now suing the U.S. companies who provided the drug for the CIA. All the records of the CIA's drug testing program were ordered destroyed by the head of MK Ultra.

US government paid extensively for their work harming innocent victims without their knowledge or consent.

Many times our government develops program which they test on innocent, unknowing US citizens. See Port Chicago, first atomic bomb test – killing 300 black navy men just above San Francisco.

MK Ultra, mind control, LSD, many government programs were tested on unsuspecting citizens, many of whom were badly damaged.

Similar test are done in the health field.

## // **Change the World**

### *Build a Truth Movement*

9-11 and beyond, a **New Reality**, hidden by popular belief, main stream, global corps.

**Information** is the path to **knowledge**, insight, **understanding**. It comes through **language**: words, images, recordings, video, discussion, consideration.

**Government lied about 9-11** to lead to huge profits of war.

[www.abodia.com/911](http://www.abodia.com/911) ... [www.AE911Truth.org](http://www.AE911Truth.org)

- Architects and Engineers show **Demolitions destroyed World Trade Towers**,

- firemen, news reported many flashes, explosions,
- molten steel found beneath collapsed WTC 6 weeks after,
- millions of American know **911WeKnow.com**

Crash site photos show no plane wreckage.

**No Law** requires personal **income tax** 67 million

don't file or pay.

### **Truth Seekers – Wake Up**

All welcome to **monthly meetings** at Library

Library of 1,000+ DVD, CD, e-Books

Name, contact, phone, e-mail

To tell, to **teach**, you need to build rapport, show interest, **listen to others**, for them to listen to you. I believe in the Socratic method. Ask focused questions to center their thinking. Explore their logic, lead them to truth, don't preach it and argue it.

Be **knowledgeable**, get the information you need to open debate. Have **tools**, like the research or testimony of eye witnesses,

Best evidence is conveyed beyond word text, internet site, with radio sound recordings or best DVD **video** presentation.

To teach, you need to **feed people tiny little pieces**, remind and reinforce them, get them to talk

with each other. **Build slowly.** If you dump all you know on people, they flee and will no longer meet or talk with you. Slow, consistent, steady is the trick.

Summary: Find a **place** and set regular **schedule**. Post **notices**, mail, free news listings, and radio. Invite many. Welcome and **connect with people**.

## // Who Controls the World ?

### *13 Bloodlines, (families) rule the world,*

The Illuminati continues through the centuries according to Fritz Springmeier, in his book and presentations. They control through the Federal Reserve, World Bank, United Nations, and controlling leaders, and legislation in the sovereign nations, to dissolve individual freedom, to set up a New World Order, a one world government.

You begin to see the gap in the what is publicly known and the whole story. As you get alternate reports, you begin to see a pattern.

When you note that many stories are so contorted, you look for the common link.

The common link is the news sources that handle and report the news. How could many different news agencies all miss the same primordial facts ? Are they linked somehow ?

Explore their ownership.

### *Who Controls the news?*

The news agencies use to be hundreds of different owners and organizations across the continent, but things have changed.

Since 1900 and even more since the changes in FCC legislation with the Ragan years, the rules of new agency ownership has changed.

It use to be that one owner could only own one news agency in any market area, allowing a competitor to own other agencies in that market; whether newspaper, radio or TV.

Now, there are virtually no limits of who owns what.

More and more, individual news agencies have been bought up by larger organization. Although their names may remain, when you peel the onion, and look at the owners, boards of directors behind the scenes, you find, as in every field, that fewer and fewer owners own more and more of the market.

Today, in America, 98%+ of the mainstream media, in all medium; newspapers, TV, books, video, are owned by just 9 corporations.

**// By deception they do battle.**

### **Psychological Operation**

PsyOps is a military term meaning; to conquer an enemy or get him to submit. You do not have to overpower or beat them, you only have to make them think they are overpowered. Hence the PsyOps. By

propaganda, threat, buff, you convince your enemy they are defeated and must submit.

How does this work ?

In training an elephant, from their early youth, they wear a small rope on their leg attached to a stake from which they cannot pull away. As they grow, the rope remains. They have been conditioned to think they cannot break the rope. They cease trying and submit to the rope restraining them.

When they are full grown elephants, they still submit to small ropes around their leg. If they would try, they could easily break the rope. But they have been conditioned to believe that they are contained by the rope the use to try to break.

Lynch, from Africa, came to the United States to teach slave owners how to condition their slaves, so they would grow to be big and strong, but submit and not challenge their masters. Our educational system does this to most Americans too.

**// Money, Property, Greed - the Root Cause**

*Federal Reserves is private, foreign banks monopoly,*

God and our constitution give individuals the right

to freedom, property and the pursuit of it.

When we lose our money and our property, our lives are diminished, we have less freedom, less liberty, less capability to earn, to learn, to have health and safety.

Who controls money and it's value ?

The US Constitution give the sole right to coin and regulate the value of money, yet, in the 1913 Federal Reserve Banking Act, we again gave the money interest, the rich wealthy bankers control over our currency.

Whatever the government spends, they borrow from the privately held Federal Reserve Bank. Then they have to pay back the money with interest.

The Federal Reserve lets the government print more currency (they have not invested any risk or capital, they just print more money) with the promise that they will pay back to the Federal Reserve the additional money and the interest too.

Every day the Federal Reserve gets richer and richer, either in payback money or in the increase debt owed to them. They are not risking anything. They have not put up any collateral. It is simply a booking entry that the US government promised to give them

more money back, principal that the Federal Reserve never had until the US government decided to print more money.

It is a never ending cycle. We continually go deeper into debt, and the Federal Reserve, which is a consortium of private banks working for a profit, continue to gain.

The endless printing of money make the money we have continually worth less and less, so we borrow more and more increasing our debt.

The private control of our money is the single most degrading event shaping our world, but most people do not understand why this is killing us.

Ron Paul, congressional candidate for US President '08, has consistently tried to close the Federal Reserve for his 20+ years in congress. He also wants to stop the war, and get our government engaged in helping the American people, not spending all our money overseas to the private unbid contract of the Bush administration weapons manufactures and rebuilding efforts. Let the US government help the American people, and get out of this great deception of war, which is incredible profit for the elite, and the decline in life, liberty, freedom, wealth and property for

all others in US and abroad.

If you look at the history of America, you will see it has been a constant battle from the beginning where the private banks wished to control the American currency to the disadvantage of the people.

President Lincoln and Kennedy succeeded in printing US government money, and were both assassinated. Control American currency is big business to the money interest. They control the currency of virtually every nation through a system similar to the private Federal Reserve. They are not federal, not of our government, not subject to, not responsive, not helpful, they are just striving to make their maximum profit as any corporation does. There are no controls over them to impede their raising and lowering interest rates. We are told they are protecting our economy but

Louis McFadden spoke very clearly about their great evils, by manipulation causing the '29 Stock Market Crash, the foreclosure of the family run midwest farms, and much more.

Rather than protect us, they are milking us for their maximum profit.

Many others explain this in greater detail and

nuances, but you should know the single most destructive force working against the American people is the privately owned and controlled Federal Reserve.

Ed Griffith's book and documentary about Jekyll Island where the bankers gathered secretly to form the banking act, and then got Allison + to run it through the congress over a Christmas recess when most congressmen were home with their families.

## // Information – birth and development

Event, Fact, Knowledge, Intelligence, Wisdom

**Event:** An action or state brought about by a cause. Something that takes place; an occurrence. Something that happens.

**Information** Knowledge derived from study, experience, or instruction. 2. Knowledge of a specific event or situation; intelligence. 3. A collection of facts or data: An account of current events: news, information, intelligence, tidings, word, news flash, scoop, bulletin, communiqué, announcement, report, release, dispatch, article, piece, account.

**Fact:** Information presented as objectively real. 2. A real occurrence; an event. 3. Something having real, demonstrable existence. The quality of being real or actual: *a blur of fact and fancy*. 4. A thing that has been done.

**Knowledge:** is known, as by having been acquired through study or experience. Knowledge is the broadest;.. ... it includes facts and ideas, understanding, and the totality of what is known

**Intelligence:** The capacity to acquire and apply

knowledge. The faculty of thought and reason

**Wisdom:** Understanding of what is true, right, or lasting; insight. Common sense; good judgment: ... The sum of scholarly learning through the ages; The intellectual power to decide wisely.

Most of **what we know comes to us from other people**, or their reports, writings, documents, images, etc. We have little first hand, hands on, experience or knowledge of our world. Science, history, achieves and records are supposed to be the accumulated information over time. We assume they are complete, unbiased, representing the whole picture, including everything of significance.

On an occurrence; a traffic accident, bank robbery, murder, we get reports from the news, often interviewing eye witnesses, and or detectives. We collect some tid-bits of information. In time, that which we have seen exposed of the event is summarized and conclude in a neat package. Our curiosity is satisfied. We have received and accepted a plausible (believable) explanation. The matter is referred to the authority of others, police, courts, parents, owners, etc. We no longer have curiosity nor question what happened satisfied that it was as it was recorded.

What if there is another side to the story, important details excluded, additional information that some know. How do we, the public come to get that information. Our society model is that the news teams are working to report information to us without bias. What if the event involves someone who owns the radio or TV, or is from the Mayor's office, or is representative for a major chemical corporation in our area ? Who decides what new to include and what news to exclude ? We assume that the TV personality, the newscaster is fully informed, and perhaps composed or created their version of the report. What upper hand may have a bearing on what information is included and or excluded ? In a court or jury trial, great battles are fought to determine what information may be brought before the judge and or the jury. Not all the information is admissible, for circumstances of law.

Is there any impartial judge, someone outside of the control or ownership of the reporting agencies that determines why and or what information is not explored, researched, considered, included ? No, news is a commodity that is bought and sold and or controlled by the highest bidder, or those who control ownership of the organization and or the chain.

How can a lay person get news to a news media ?  
Who believes anyone outside of the news team ?

We are isolated, insulated, excluded from the full picture, full details surrounding events, as we have delegated our news teams to be the watch dog for our society. There is no speculation or suspicion that any news, event, fact may be tampered, skewed, excluded or confused.

The very foundation of our sense of reality is founded on the conclusions of the reported news. If somehow the news could be controlled and or limited, that would throw askew the records of the event, the history and books that follow and the conclusions and or assumptions that are derived from the recorded, and or popular version of the news.

Ultimately, note how our whole perspective, whole understanding of our world, our history, our background is founded on the frail, untested news.

Years past, great corporations built large public relation organizations to pose different positions of their work and activities. Through advertising and marketing, they broadcast their public view of what they did. Things that may not be favorable to the public interest were not disclosed nor considered. The

news use to find and reveal those.

So what would be the best way to control what the public knows about a corporation – to control the news. To own and control the main stream media, give the corporations a veil to limit inspection and understanding of all their activities. If there is a noted problem in some chemical in foods, or in a defective devices, by owning the news, they can limit the publics interest and or information.

In years past, we had 100s, thousands of owners to media, news papers, TV across the country. With changes in the laws, the FCC has radically changed what is happening. Before on owner could not control all the news for a region, if they owned a TV station, they could not also own the news paper. This provided some balance and control. Now corporations own whole market areas. At the national level, just 9 corporations control all media; TV, news papers, books and video. Such companies as AOL/ Tie Warner, Disney, Sony, General Electric and others control the national news.

If events should occur that lower public esteem of a company or a product, the news can be adjusted to avoid or limit the exposure. Debunker and mis-information is employed to cover and or take the focus

and or importance off such stories.

When I mention the subject that our news might not be completely true, I know this brings anger to most. Our lives have been built on the news that we have. It is hearsay to consider that the news may not be true !

But think again, how important truth in the news is. If it is that important to effect the decisions we make, would it not be of particular value for some people, with power and money, to influence and or control the news that we get.]

As I studied 9-11 I found many important stories, witnesses, evidence that was definitely true, as far as I and many others could test, yet that information has simply not been included in main stream news, at least not knitted together and shown for it's implications.

On examining the changes in law and media ownership, many books, articles, reports cry foul play in the handling of news. I personally have reviewed how true events, witnesses, evidence can be covered with contrary, unsupported testimonials of institutions, to lead you from the primary events.

Like a magician, a lawyer, a debater, the primary role of diffusing and misleading us from knowing the

real truths is to take our attention away from delicate, sensitive, embarrassing issues. Stories to discredit witnesses, erode facts, cause doubt and suspicion. Focusing on other events, hammering on their importance and urgency takes us away from contemporary problems that are not fully resolved.

Many writers, editors and others in the news industry are frustrated by the way that news is handled. Some quit, others are fired or change jobs as they see that news is simply bought and sold to suit the higher players who control the money and or the ownership of the news media.

We've come to realize that the news is neither the full truth, nor unbiased or impartial, but flows with the ones who control it. It seems that human greed and corruption have entered the news, and blurred the truth for the profit, control, and concealment of powerful people and organizations.

### ***News – just one information source***

News is generally accepted, used as reference in writing, history, court. Is accepted among many, serves as standard for truth. But is it true ?

## // What I know and how I know it.

With my extensive computer and internet research skills, I began my search.

I was challenged to consider that perhaps something other than fires from the planes caused the World Trade Towers to Collapse. As I searched for World Trade Towers Collapse, dozens of web links offered the cover story that fire had brought the buildings down, but one link proposed that there had been explosives in the towers.

### A Still Small Voice.

Surely, this particular link was much out numbered by the other cover story links, but I decided to review this site and consider this perspective. Like a still small voice, I chose to consider, and follow the dissenting opinion to see where that would lead.

Two roads diverged in a wood, ...,  
I took the one less traveled by,  
And that has made all the difference.- Robert Frost\_

Once I had some more information about the alternate explanation, I wondered if other people or

more information was available, so I queried the internet, World Trade Towers 9-11 explosions. Then before my eyes, rolls hundreds of sites, links, stories, reports, explanations, descriptions, video, photos, evidence, witnesses.

I certainly had never considered this possibility before, but suddenly, having asked the right or germane question, I found myself drowning in a new world of information.

As I previewed these websites and links, I found other information, and further witnesses and links. Questions about the planes, one was never scheduled to fly, nor listed in the database of national flights until almost 6 months after the event. Discussions of the Pentagon and Shanksville showed very small holes less than 20 foot wide, here purportedly a 135' aircraft had crashed into the Pentagon, and into the earth at Shanksville.

As I learned of all this new information, I continued to look for confirming evidence, which I found in a diversity of witnesses, public and local reports, complete with documents, photographs and more.

Of course, I could not believe that the news was so far from what seemed to be the real truth, so I read on. Tomes and tomes of information, evidence, witnesses surfaced.

Today, information has never been so easy to acquire. If you know what to look for, you can find it in abundance and from many independent sources, public records, local news, and more.

For weeks, and weeks, I read on, sometimes reading all night til dawn, following a lead, pursuing a thesis or report on some aspect of the 9-11 attacks.

Initially, I was depressed and isolated. I did not talk to anyone, 'cause I am aware that most have already made up their mind from what they read in the news. Most have seen 15 seconds of video that convinced them that plane hit the towers.

I'm a member of the Charleston Anvil Club which meets monthly. A member gives a talk on a subject other than his work. We dine and discuss it. I spoke on the ominous date of **05/ 05/ 05**, the 5<sup>th</sup> of May 2005

spoke to this group of esteemed Charlestonians, doctors, lawyers, college presidents, and former national newscasters.

“Gentlemen,” I trembled as I spoke. “I had planned to amuse you with some divergent views of What Happened on 9-11, but at this point, I am absolutely convinced I have stumbled onto an incredible truth. So convinced am I, that unlike any paper presented to the Anvil Club before, I have already written to Congress and Senate to consider the implications of these discoveries.” To the national newscaster in my audience, recently retired and come back to work in Charleston, I commented. “Your very presence here frightens me as surely you should have better, deeper knowledge than I, a lay person possibly could have,” yet I spoke on. Nor did he refute me after speaking.

All were horrified and shocked at what I suggested. They have their sources of information, they are of highly educated, affluence, prestigious, more connected, esteemed, respected among Charleston's leaders. How could a lowly person like me possibly challenge the views and facts they had ? They grew angry and scoffed at me in the end. I had taken 20 or more DVD videos that showed live news coverage of

Overloaded with facts and information, I stood and

the 9-11 event to further reveal and support my thesis that we have been greatly deceived in what we've been told about 9-11.

None asked for more information, nor encouraged nor directed me to speak to any other of this subject. Surely I must be wrong, they probably thought. None ever spoke to me again on this subject. Did any actually watch the videos ? Probably not.

To prove my case, I began accumulating an extensive library. Ultimate, I've reviewed and or purchased many books, reports, over 1,000 DVD videos, thousands of files, photos, e-Books that discuss some aspect of 9-11, and or a different world then our news media will disclose. I've purchased and work through 10 of 1000s of reports, kept from the public's eye, excluded from libraries, yet, viable in documents, photos, evidence, and eye witnesses or subjects to the actions.

I pursued how the news could be so different from the facts. See chapter on How we lose, to listen to news.

I organize my materials, facts, conclusions and

write to Congress, Senate, public officials, College Presidents, and seek speaking engagements at civic clubs around our state, Rotary, Civitans, Exchange Club, Kiwanis, Lions Club and Colleges.

As I present my facts and information, I disturb audience, cause them to anger, recall specific hearsay points and argue with me. I invite others to look at the hard facts, reason and let go of assumptions.

I fear in America we are committed to our isolation. We have been conditioned to accept authority, not question things around us, to go with the flow, follow the crowd. The loudest voice proves true. Television is our source of truth, as our are known and trusted newscasters. Who could ever imagine that the flow of information is controlled or blocked, that we might be seeing anything less than the truth, that other details and information might undermine the truths and assumptions we are lead to believe.

Who could be shifting our focus on important issues and why ? Who controls national news ?

## // Common Sense vs Popular Opinion

When I began to see all the information that I had never considered before, I realized how controlled our world is.

We only think about what the media mentions, only consider it and the alternatives they offer. Who charges off to the library or the internet to learn deeply about a subject. How do you break thru, pierce the **Veil of Secrecy ?**

Hopefully you will be inspired and encouraged to do that having read this book.

My total embarrassment was that I had not even considered an alternative world. I was locked in the world controlled by our media.

I'm inventive, innovative, creative entrepreneur. I do most all things different then other people, giving me a competitive edge, a unique products seen to be obviously and pleasantly different in all my fields of endeavor.

But I was living on a flat earth.

We live in a glass cage, occasionally looking out beyond our limits, but already knowing that only demented, wacko, deluded personalities consider any

of the fringe and conspiracy subjects.

We rest assured that our aggressive and competitive news agencies are striving to turn over ever stone, search and find, sort out any injustice and make a headline story to bring the evil doers to justice.

Well, so I thought.

Who ever thought you could silence the critics by simply buying them out ? Who reports that the guards are sleeping, the defense is down, barn is empty ?

Dr. Peter D. Beter's newsletter explains when and how the gold from Ft. Knox was removed and sold to European Banks.

Yet, the official Ft. Knox web site, doesn't indicate the gold is largely gone. Nothing is said to consider, inspect, audit.

Yet, the gold has not been audited for decades.

The Federal Reserve, of all banking interest, has never been audited. Is it under the government's or people control ? Or is it in fact a private foreign corporation working for profit (for their private owners - not for Americans) working within the United States. What a preposterous idea !

Check with Supreme Law, their history of court

case that reveal this very discovery In their conclusion to 31 questions.

I'm embarrassed that I was sleeping at night, entirely at peace with the world, from all the reports I could see and hear, we are under wonderful leadership, challenged and guarded by public inspectors, investigative news agencies and public protection policies.

What went wrong ? What happened ?

Who ever thought that we could be beaten mentally, not physically ?

## // Strategies used against us

### // *Hegelian Strategy - Problem – Solution: Thesis - Synthesis – Antithesis*

A **Hegelian Strategy** is used to defeat us. Thesis, Anti-thesis, and Synthesis.

They see what they want - to increase their power and control. **Thesis** - they manufacture a problem (pay others to do - terrorism, disease, etc.) **Anti-Thesis** They pose a solution, which seems to solve the problem. (The problem was contrived and exaggerated by the media - provoked by those who will benefit. The solution will help those who created the problem.) **Synthesis – Solution:** Then, having been traumatized and frightened the people, we clamor for the solution - which they offer. Few see and realize how they are duped into a worse condition. (Great Depression, loss of; - gold standard, - family farms, - freedom in medical and health choices ... )

***The Best Covert operation is done in plain site.***

None suspect what is going on. The clues are so

blatant and obvious, that most cannot consider that it is what it seems. ChemTrails, 9-11, JFK multiple wounds from the same magic bullet, many conspiracies are done in plain sight. It is the best cover.

### ***Divide and Conquer***

Bankers/ Controllers/ Elites fund **both sides** of an argument, as the international bankers do in war. The focus is on who will prevail, not who is charging outrageous interest, and why we war.

**Sponsoring opposing candidates** in election, to keep the field of candidates controlled and only considering basic issues. They keep the candidates away from serious, deeper issues.

**Sponsoring division** among us; racial tension, over zealous efforts of environmentalist, over property rights, etc. Together we may stand, divided we will fall. When outsiders (controllers) determine (sponsor) the leaders, they can limit the areas of concern, the popular issues, hide the deeper issues.

Individuals rise to these ranks to be propelled by their sponsors, and become beholden to their limited issues. They may think, I am making so progress, so I

will yield on the other issues. This degrades their power and impact, yet keeps them in leadership. Should they ever test or resist their controllers, they may lose power, following, publicity, or face a fate as JFK, RFK, MLT, Vince Foster.

### ***By deception they do war. (or do rule)***

**False Flag** Operations are where one party; government or political group is visibly harmed and another (innocent) party is blamed. While we rush to punish the evil doer, we are chasing the wrong man.

There're many instances of these False Flag Operations: 9-11, Oklahoma City Bombing, Bay of Tonkin, JFK & other assassinations, ...

Port Chicago in California in the 1940s, great depression.

**Economic Hitman**, author John Perkins [www.JohnPerkins.org](http://www.JohnPerkins.org) explains how the World Bank, the International Money Fund goes to 3<sup>rd</sup> world nations. They find and offer improvement solutions; roads, dams, infrastructure. They offer bonds, loans, and get the governments committed into great debts, which they know they will not be able to pay back. Then they increase their power and control over the

governments by offering alternative ways they can repay; selling their resources for a fraction of going rates, accepting a military base in their country, enslaving their people to slave labor and industrialization they do not want.

### ***Seeking Material World, profit, power***

Most of us are somewhat self-serving, seeking personal & immediate gain, profit, material goods, money, prestige for our selves or our families/ friends.

Our goals, vision, energies are focused on things that reward us, or family or friends. We want what is tangible, immediate, profitable, popular.

Little we do in thinking of our community, our country, our countries future. With more community spirit, and focus on the future, we might better perceive the things on going around us.

Assumption are the killer. In our mind, we apply assumptions to avoid involvement, work, worry.

Surely our government, our institutions, our corporations are watching out for improvement to our world. Surely the justice system is in place. Surely those who would try to steal, deceive or harm us are watched, controlled and punished for bad behavior.

**Wake Up America !** The news is filled with stories to the opposite. Executives at Enron, large corporations and banks, continue to drive their organizations to bankruptcy or failure, while they walk off with astronomical fees, commission, perks, and property. Who is watching them ? Laws and courts do not intervene. Who is sorting this out ? On the collapse (demolition) of the World Trade Tower Building 7 on 9-11, the paperwork of the Enron investigation was destroyed, with other big profile cases.

The greatest human forces in the world; greed, lust for power and control, are sourced in those at the top, the elites, the international bankers, who own much of the world. They own corporations, effectively governments and nations through their manipulation of money. They own our politicians and our media. They have the power to distort, deceive and suppress much information. By doing that they expand their power and control.

Only when rational people, working together, deal with the real world (not the deceptive news). We must band together. Then we'll have a hope to escape the doom planned by the elites.

The elites control us through the manipulation of

information (main stream media). Their forces are to divide and conquer us, They promote dissent, division amongst ourselves, many different church faiths, different political views. We need to focus on primary issues (concealed by media) and work towards their resolve. (demise of the US Constitution, Federal Reserve, deception in news)

Our desire for money, material gain, limits our perception to self serving goals. We must consider each other, our community and our future. The elites control and dominate in the world of power and money. We must selflessly think beyond our immediate needs. Our lust for money, power, gain is how we, as a people, are so easily manipulated by those who have the money and power.

As we seek money and power, we follow (accept lies, illusions) from those who have the power and money, thinking that will help us to rise to their ranks and beyond. It is an illusion. Anything less than truth, anything less than moral, will ultimately hurt any who deals in it, personally and those about them.

The greatest illusion to which most fall, is that you can get something for nothing, and or that others care more for you than for themselves. The illusion is you'll gain from a government or institutions to which you

are not otherwise paying more than your cost.

Contact me if I can help. Ted Elden @SuddenLink.net

Get close to God, accept Jesus Christ. Read, know and act in accordance with His word, despite the calamity surrounding you.

Are we destined to slavery,  
or can we, will we **act** ?

## Wake Up America !

### // New World Order – Quotes from Leaders

4. "In the next century, **nations** as we know it **will be obsolete**; all states will recognize a single, **global authority**. **National Sovereignty** wasn't such a great idea after all." -- Strobe Talbot, President **Clinton's** Deputy Secretary of State, as quoted in Time, July 20th, 1992.
7. "How to Achieve The New World Order" -- Title of book excerpt by Henry Kissinger, in Time magazine (March 1994)
8. "The truth of the matter is that you do have those standby provisions, and the statutory **emergency** plans are there whereby you could, **in the name of stopping terrorism**, apprehend, **invoke the military, and arrest Americans and hold them in detention camps.**" -- US Congressman Henry Gonzalez, August 29, 1994
9. "The high office of the **President** has been used to foment a **Plot to destroy the American's freedom**

and before I leave office, I **must inform the citizen** of this plight." -- President John Fitzgerald **Kennedy** In a speech made to Columbia University on Nov. 12, 1963, **ten days before his assassination.** ??

11. "The drive of the **Rockefeller's** and their allies is to create a **One-World Government** combining **super capitalism and Communism** under the same tent, all **under their control** ... Do I mean conspiracy? Yes I do. I am convinced there is such a Plot, **international in scope, generations old in planning, and incredibly evil in intent.**" -- **Congressman** Larry P. McDonald, 1976, **killed in the Korean Airlines** 747 that was allegedly shot down by the Soviets.

12. "We are grateful to The **Washington Post**, The **New York Times**, **Time Magazine** and other publications whose directors have attended our meetings and respected their promises of discretion for almost **forty years**. It would have been **impossible** for us to **develop our plan** for the world **if we had been subject to the bright lights of publicity** during those years. But, the work is now much more sophisticated and prepared to march towards a **World government**. The **supranational**

**sovereignty of an intellectual elite and world bankers is surely preferable** to the national auto determination practiced in past centuries." -- David **Rockefeller**, founder of the Trilateral Commission, in an address to a meeting of The Trilateral Commission, in June, 1991.

14. "**To achieve World government**, it is necessary to **remove from the minds of men their individualism, loyalty to family traditions, national patriotism, and religious dogmas.**" -- Brock Adams, Director UN Health Organization

17. "Today, America would be outraged **if U.N. troops entered Los Angeles** to restore order (referring to the 1991 LA Riot). **Tomorrow** they will be **grateful!** This is especially true if they were told that there were an outside threat from beyond, whether **real or \*promulgated\* [pretended / faked]**, that threatened our very existence. It is then that **all peoples of the world will plead to deliver them from this evil**. The one thing **every man fears is the unknown**. When presented with this **\*scenario\***, **individual rights will be willingly relinquished** for the guarantee of their well-being granted to them by

the World Government." -- Dr. Henry **Kissinger**, Bilderberger Conference, Evians, France, 1991

20. "**The world is governed by very different personages from what is imagined by those who are not behind the scenes.**" -- **Benjamin Disraeli**, first Prime Minister of England, 1844

21. "The governments of the present day have to deal not merely with other governments, with emperors, kings and ministers, but also with the **secret societies** which have everywhere their **unscrupulous agents**, and **can at the last moment upset all the governments' plans.**" -- British Prime Minister Benjamin **Disraeli**, 1876

22. "In March, **1915**, the J.P. **Morgan** interests, the steel, shipbuilding, and powder interest, and their subsidiary organizations, got together 12 men high up in the newspaper world and **employed them to select the most influential newspapers** in the United States and sufficient number of them to control generally the policy of the daily press ... They found it was only necessary to purchase **the control of 25 of the greatest papers.**" "An agreement was reached; the policy of the papers was bought, to be paid for by

the month; an **editor was furnished for each paper** to properly supervise and **edit information** regarding the questions of preparedness, militarism, financial policies, and other things of national and international nature considered vital to the interests of the purchasers." -- U.S. Congressman Oscar **Callaway**, **1917 [National media is bought out by banks ! 100 years ago ! – they do not report on things that would hurt them.]**

27. "Since I entered politics, I have chiefly had men's views confided to me privately. Some of the biggest men in the United States, in the Field of commerce and manufacture, are afraid of something. **They know that there is a power somewhere so organized, so subtle, so watchful, so interlocked, so complete, so pervasive, that they better not speak above their breath when they speak in condemnation of it.**" -- **Woodrow Wilson**, The New Freedom (1913)

29. "The real menace of our republic is this **invisible government** which like a giant octopus **sprawls its slimy length over city, state and nation.** Like the octopus of real life, it **operates under cover of a self**

created screen ... At the head of this octopus are the **Rockefeller Standard Oil interests** and a small group of **powerful banking** houses generally referred to as **international bankers**. The little coterie of powerful international bankers **virtually run the United States government for their own selfish purposes**. They practically control both political parties." -- **New York City Mayor John F. Hylan**, 1922

. "The **UN** is but a long-range, **international banking apparatus** clearly **set up for financial and economic profit by a small group** of powerful One-World revolutionaries, hungry for profit and power. "The **depression was the calculated 'shearing' of the public** by the World Money powers, triggered by the **planned sudden shortage of supply** of call money in the New York money market ... The One World Government leaders and their ever close bankers **have now acquired full control of the money and credit machinery of the U.S.** via the **creation of the privately owned Federal Reserve Bank.**" -- Curtis Dall, FDR's son-in-law as quoted in his book, My Exploited Father-in-Law

35. "The real **rulers** in Washington are **invisible, and exercise power from behind the scenes.**" -- **Supreme Court Justice Felix Frankfurter**, 1952

36. "**Fifty men have run America**, and that's a high figure." -- **Joseph Kennedy**, father of JFK, in the July 26th, 1936 issue of The New York Times.

39. "The **Trilateral Commission** is intended to be the vehicle for multinational **consolidation** of the **commercial and banking interests** by **seizing control** of the **political government** of the United States. The Trilateral Commission represents a skillful, coordinated effort to **seize control and consolidate the four centers of power political, monetary, intellectual and ecclesiastical**. What the Trilateral Commission intends is to create a **worldwide economic power superior to the political governments** of the nationstates involved. As managers and creators of the system ,they will rule the future." -- U.S. **Senator Barry Goldwater** in his 1964 book: With No Apologies.

40. "The powers of **financial capitalism** had another far reaching aim, nothing less than **to create a world system of financial control in private hands able to**

**dominate the political system** of each country and the economy of the world as a whole. This system was to be controlled ... by the central banks of the world acting in concert, by secret agreements, ... The apex of the system was the Bank for International Settlements in Basle, Switzerland, a private bank owned and controlled by the worlds' central banks which were themselves private corporations. The growth of financial capitalism made possible a **centralization of world economic control** and use of this power for the **direct benefit of financiers** and the **indirect injury of all other economic groups.**"

**Tragedy and Hope:** A History of The World in Our Time (MacMillan Company, 1966,) -- Professor **Carroll Quigley** of Georgetown University, highly esteemed by his former student, William Jefferson Blythe **Clinton**.

52. "**Our job is to give people not what they want, but what We decide they ought to have.**" -- Richard Salant, former President of **CBS News**

81. "Those who **manipulate** this unseen mechanism of society constitute an **invisible government** which is the **true ruling power** of our country. **Our minds**

**are molded, our tastes are formed, our ideas suggested, largely by men we have never heard of.**" -- Walter **Bernays** Propaganda 1928

99. "In October 1917 , we parted with the old world, rejecting it once and for all. We are moving toward a **New World, the world of Communism.** We shall never turn off that road!" He further reassures his Communist colleagues:" Comarades, **do not be concerned about all that you hear about glasnost and perestroika and democracy in the coming years. These are primarily for outward consumption.** There will be **no significant internal change within the Soviet Union** other than for cosmetic purposes. **Our purpose is to disarm the Americans** and let them fall asleep." -- **Mikhail Gorbachev** Nov. 2,1987 address to the Soviet Politburo.

100. "**The individual is handicapped by coming face to face with a Conspiracy so monstrous he cannot believe it exists**". -- J. Edgar **Hoover**, former head of the FBI

102. "The **CFR (Council On Foreign Relations,** New York City) is the American Branch of a society which

originated in England and believes **national directives should be obliterated and one-world rule established**. I know of the operations of this network because I have studied it for twenty years, and was permitted in the early 1960's to examine its papers and secret records ... I believe its role in history is significant enough to be known". -- Dr. Carroll **Quigley**, Professor of International Relations, Georgetown University Foreign Service School, Washington, D.C., author of the epic "**Tragedy & Hope**", advocate of one-world government and personal mentor of President William **Clinton** (who acknowledged Professor Quigley during his 1992 presidential inauguration speech)

103. "The **main purpose of the Council on Foreign Relations is promoting the disarmament of US**. Sovereignty and national Independence and submergence into an all powerful, **One World government**". -- Chester Ward, **Rear Admiral and former Navy Judge Advocate** 1956 - 1960 and CFR member for 15 years

104. "**We operate here under directives from the White House..** (to) use our **grant making power to**

**alter life in the US. so that we can comfortably be merged with the Soviet Union**". -- Rowan Gaither, former president of the **Ford Foundation**, in a 1954 statement to **Norman Dodd** regarding **Congressional investigations** of the **un-American activities of tax-exempt foundations** operating in the U.S.

105. "In **politics, nothing happens by accident**. If it happens, it was planned that way". -- Teddy **Roosevelt**

107. "**America will never be destroyed from the outside. If we falter and lose our freedoms, it will be because we destroyed ourselves**" -- Abraham **Lincoln**

109. "**America** is like a healthy body and its resistance is threefold: its **patriotism**, its **morality** and its **spiritual** life. If we can undermine these three areas, **America will collapse from within**". -- **Joseph Stalin**, former dictator of the **Soviet Union**

110. "There is **no** such thing, at this date of the world's history in America, as an **independent press**. You know it and I know it. There is not one of you who dare to write your honest opinions, and if you did,

you know beforehand that it would never appear in print. **I am paid weekly for keeping my honest opinion out of the paper** I am connected with. Others of you are paid similar salaries for similar things, and any of you who would be so foolish as to write honest opinions would be out on the street looking for another job. If I allowed my honest opinions to appear in one issue of my paper, before twenty-four hours my occupation would be gone. **The business of the journalist is to destroy the truth; to lie outright; to pervert; to vilify; to fawn at the feet of mammon, and to sell his country and his race for his daily bread.** You know it and I know it and what folly is this toasting an independent press? **We are the tools and vassals of rich men behind the scenes.** We are the jumping jacks, they pull the strings and we dance. Our talents, our possibilities, and our lives are all the property of other men. **We are intellectual prostitutes.** " -- John Swinton, former chief of staff, The **New York Times**, in a **1953** speech before the **New York Press Club**

116. **"Treaty laws can override the Constitution.** " Treaties can take power away from Congress and give

them to the President. They can **take powers away from the States and give them to the Federal Government or to some international body** and they can cut across the rights given to the people by their constitutional Bill of Rights. **Foster Dulles**, later Secretary of State, to the American Bar Association in Kentucky April 12, **1952**

119. "The **environmental crisis** is the **cornerstone for the New World Order**" Maurice Strong (U.N. environmental leader ) was quoted as saying, " Isn't the **only hope for the planet that the industrialized civilizations collapse?** Isn't it our responsibility to bring that about?" -- James Garrison (President of the **Gorbachev** Foundation) says " we are going to **end up with world government.** It's inevitable.. "

120. "Another reason why the **Environment** is such an important issue to **Gorbachev** is that it will **enable him to introduce and ratify comprehensive international treaties granting unprecedented power to seize government and private property all in the name of protecting the environment.** In fact, Gorbachevs mandate for the future includes the **imposition of stringent global environmental laws**

which would **regulate every area of life**. Toward this end he has been supporting the creation of an all-encompassing planetary document called The Earth Charter." -- Gary Kah, The Environmental Agenda.

122. "A secret combination that seeks **to overthrow the freedom of all lands, nations, and countries is increasing in its evil influence and control over America and the entire world.**" -- Ezra Taft Benson, 1899-1994, Secretary of **Agriculture** during the **Eisenhower** administration

123. Larry Grathwol, FBI informant from the 80's, told the plot to kill capitalists

<http://vids.myspace.com/index.cfm?fuseaction=vids.individual&videoid=45134736>

In a 1980s documentary about terrorism, former Weather Underground member Larry Grathwol recounted hearing a conversation about the prospect of murdering 25 million die-hard capitalists were America to be overthrown. I brought up the subject of what's going to happen after we take over the government. We become responsible then for

administrating 250 million people and there was no answers. No one had given any thought to economics. How are you going to clothe and feed these people?

The only thing that I could get was that they expected that the Cubans, and the North Vietnamese and the Chinese and the Russians would all want to occupy different portions of the United States. They also believed that their immediate responsibility would be to protect against what they called the counter-revolution. They felt that this counter-revolution could best be guarded against by creating and establishing re-education centers in the Southwest, where we would take all of the people who needed to be re-educated into the new way of thinking and teach them how things were going to be.

I asked, well what is going to happen to those people that we can't re-educate that are die-hard capitalists? The reply was that they would have to be eliminated. When I pursued this further they estimated that they would have to eliminate 25 million people in these re-education centers. When I say eliminate, I mean kill 25 million people. I want you to imagine sitting in a room with 25 people, most of which have graduate degrees from Columbia and

other well-known educational centers, and hear them figuring out the logistics for the elimination of 25 million people. And they were dead serious. The full video:

<http://robbwindow.wordpress.com/2008/12/22/no-place-to-hide-the-strategy-and-tactics-of-terrorism-1982/> <http://www.realityzone.com/noplacetohide1.html>

We can open or close our eyes to reality. At first it seems better to ignore the confusion and evil around us, until you realize that most everyone ignores it - either not knowing of it, or denying and avoiding it. Then you must ask - Who will act ? To search and find these truths, confirm it and spread these truths is the least we can do to fight the evil surrounding and overcoming us.

[United we \(can\) stand, divided we \(will\) fall.](#)

## // Autobiography

*I'm retired architect, writer, computer guru*

I've developed many other business, easily & diversely, because I've found good support in computers, software & logic. See more at [www.abodia.com/t](http://www.abodia.com/t) for my resume & personal background experiences, work, education, etc.

I'm registered architect (ret.) to practice in any English speaking country, NCARB. I've built extensive international import business, a photo studio, mastered computers, designing, building & training 350 client - systems. I'm son of renown Henry T. Elden, Architect. We both served on the National Council of Architectural Registration Boards, and as members of the West Virginia Board of Architect.

**Education:** Carnegie Mellon Univ., Arizona St. Univ., Blair Academy, Colorado Outward Bounds (survival) school, Camp Sea Gull.

I've built a home and studio with 10 hyperbolic parabolas. This studio has been featured on Dream Builders program on Home and Garden TV and in Dwell, a national magazine. My father built his round glass home / studio wrapping a Cliffside in Charleston and overlooking the river city and state Capitol.

My hobby is computers, software, research, thinking and study. I'm avid sports man; water & snow skiing, spring board diving, pole vaulting, track, running the 15 mile

## // Appendix

*Immense portal to all at [www.abodia.com/t](http://www.abodia.com/t)*

### ***Introduction:***

Explore these truths via:

- Issues, - Events, - People, - web sites, - Periodicals,
- Candidates, - News Reporters, - Researchers,
- Authors, - Scholars, - Scientists, ...

### ***Issues:***

Chem Trails, Global Warming, Kennedy Assassination & others, Vaccines, Income Tax, Federal Reserve – Money, Property, Courts, Law, UFOs, Secret Government, Underground Bases, MK Ultra – Mind Control, CIA & Satanic Cluts – Conspiracy of Silence

### ***Introductions to Great Deceptions- Conspiracies***

**People**, organizations, web sites.

Bob Schultz: We the People Foundation

Dr. Steven Greer, Disclosure Project

Richard Gage, AE911Truth.org

Irwin Schiff, Income Tax Hoax, Harken Rose

Radio Hosts: Alex Jones, Dr. Stan Monteith,

Torrent (zillions of resources)  
wikileaks.org

### **More Conspiracies**

These are many areas of deception and suppression that further confirm the enigma we are in: 13 Bloodlines who rule the world, (see Fritz Springmeier) by the Federal Reserve and the like in most counties world wide, illegal Personal Income Tax Traitorous leaders mis lead their countries. They're loyalty is not to their sovereign countries but to advance the New World Order in it's plan for a global , totalitarian one world government, court, currency and religion. They are members of:

*Bildenbergers, Tri Lateral Commission, Committee of 300, Club of Rome, Skull and Bones, Bohemian Club, Masons, Illuminati, Vatican*

#### **Other deceptions to explore:**

Oklahoma City Bombing, 1<sup>st</sup> World Trade Bombing.

Columbine Shootings, Port Arthur, Virginia Tech, many school & public shooting

The suppressed facts on these major event have eluded the public's consideration and understanding.

Look beyond the media to primary, first hand evidence and witnesses – fascinating ! They represents how media blocks the primary information, limits what you think about.

UFOs, Crop Circles (a real unexplained event for 20 years, Colin Andrews has observed, 40 % of world wide crop circles happened near Stone Henge.

Tesla Technologies, new sciences, technologies, free energy, suppressed medical discoveries, cures for cancer, Aids and more.

These subject are debunked as being fringe events from deluded unsophisticated minds. They are very real and deep subjects.

MK Ultra Mind Control, HAARP, Franklin Cover up, Manchurian Candidate, Arizona Wilder, David Icke, www.NewWorldOrderCafe.com patriot stamps, heroes who speak of truth most have never considered.

TWA flight 800 shot down, Challenger shot down

Philadelphia Experiment, Al Bielek, Preston Nichols

Assassinations: JFK, MLK, JFK, Jr.

What do these agencies really do ?

CIA, NSA, BATF

The more you understand the real truth to the individual events, the more you understand the bigger picture. And so, the more you understand the general plan, the more you are driven to know more details of the individual events. The news you once accepted, dissolves as you look at more, diverse and suppresses evidence, witnesses, records.

It is in secrecy, sheathing you from important information that you are controlled, enslaved, limited.

**The Truth will set you free !**

*Follow Me !*

[www.abodia.com/t](http://www.abodia.com/t)

**Is it true, popular, important ?**

Federal Reserve is owned & controls by private foreign banks. Their actions cause rise & fall of currency vales, fleecing the US for their profits.

Income tax is illegal in many ways. You can learn and avoid.

Rockefeller aided the formation of the League of Nations, UN, IMF- The International Money Fund. The IMF loans monies to 3<sup>rd</sup> world nations, for dams, bridges, highways, to get them into debt, then they take control of government policies, get cheap resources (oil, minerals, labor) enslave and impair grown of those nations.

See Anthony Perkins expose - Economic Hitman

See patriot stamps to learn of the leaders of the new reality. Get the facts from the source

## // Still in Progress - - -

### // How we get and send information.

Information is a record or report of something; people, events, activities.

It can be recorded and or transmitted in various ways; via actual evidence, witness, or report, via written report, aural report / interview, video report / interview, and more.

These can be found in news, magazine, TV or cable broadcasts, internet, CD, mp3, video or DVD.

Most of us are content to get our information or news from TV or radio. Yet shortwave radio, and internet web sites offer troves of more detailed and extensive reports on many subjects abbreviated in local and national news coverage.

The object of main stream news is to restate the obvious, well known facts, and tie them to straight forward conclusions so that they satisfy a curious public, and do not invite further review, discussion or inspection.

The object of many **shortwave broadcasts, web sites** and non mainstream publications is to raise

important additional information to disprove the wise spread, popular opinion resolve of issues.

All this alternate news or information is easily available once you learn that it exists and how you can obtain it; like from radio and internet sites, through live or on line broadcasts and or to download or purchase these audio or video interviews on CD or DVD. But who would trouble to get or listen to the back story, the alternate story ? Those who seek the truth !

Most of us simply avoid, discard and or are unaware of these still small voices, of this discordant cry from the broken or oppressed. In our minds the issues are closed and no further debate or discussion is relevant.

We accept, without a court verdict, without a trial or inspection, the conclusion of our main stream news as being complete, comprehensive, true and accurate. That is why we watch our main stream news. They dismiss hoaxes, limit our time and involvement and unify our public to one way of thinking.

If you are curious, there is much more information available to the general public then that which they get from main stream news. through local news, libraries, public records and the internet alone, you have access

to a world of more detailed information. The internet by far is the most flexible, most time efficient and most comprehensive single source to search the achieves of many diverse resources.

None of these is necessarily absolutely true, the main stream news, books, videos, internet, spokes persons. Each may speak the full truth, a partial truth, mixed with inaccurate or incorrect information, and or blatant lies.

There are several tests to come to understand the truth and or the version that you wish to consider.

Most people are comfortable to just believe what those around them believe. I used to think that the main stream news represented what most people believed, but now I think that it posses reports and conclusions to a general population who may feel a little different. As those hearing the news think that that is what others think, they yield slightly to accept the story a little askew from what they think, so as to be compatible with those about them.

Therefore the news is not even reporting the popular view, but actually leading the thinking from what was commonly known to a slightly different version purportedly backed by officials and

verification.

The primary role of the news is not so much in reporting and or mis-reporting particular incidents, but more importantly limiting thought and or focusing and or directing what we do think about or consider.

Often, very important issues, like the changes in the FCC laws, allowing huge conglomerates to own more and more of the news business to effectively monopolize the public news and view. These laws changes were bannered about in the branches of our federal legislatures for month, yet barely a mention of it reached the public while these decisions were being debated and lobbied. The news owners did not want an informed public to be part of the debate on how the news ownership is controlled. The changes to the law are dramatic and little observed or know by the lay public.

I fear, in America, we have relegated thinking to our global corporations who own and control our government and a limited exposure through the controlled national news.

**Time, thought and energy is what we have.  
How shall we invest it ?**

When the news convinces us (well we agree with

what we want to believe, that we have no need to worry about some issues as they are resolved and in proper authorities).

But what if the news was not true in part ? Could it not be true in several things and for a long time corrupting our news, history and our democratic process ?

Getting and sending information.

So we can watch news on TV or radio, or we can reach farther to get distant or unpopular and or unpublished news from web sites, radio stations, published in pdf, mp3, video or other tat we can watch, listen to, copy and share or forward to others.

It is laborious to try and share important news with others. Most just get the news they consider from the sources that they have like the TV or the radio.

To try and get other news to other people is difficult. You can refer them to web sites, copy and forward them video, CDs, and mp3 files, but few want to change their source of news.

Truth is not as important to most people. They are satisfied to know what their neighbor knows and to truth their news channels.

How could you or I, who have found different or disturbing news actually influence any other to suspend believe in their own news and consider other news ?

**That is the role of the teacher and the student, next chapter.**

To cause some people to suspend belief, conviction in what they know and from whom they get information is difficult, but possible for the patient, consistent, knowing teacher.

Many people confuse truth with elaborate presentations. In news we find beautiful, intelligent, well groomed people, with great visuals, charts, graphics, exciting news footages and super graphics.

In some simple pamphlets, books, comments form people without money, power, influence, we may find a revelation, a naked truth.

Be slow to judge, careful to consider.

As I share information with others, I note that most people prefer:

- a live presentation, or on national TV or radio,
- to watch a know or renown personality speak,

- to see clear images, graphics, illustrations.

I find to the contrary that many of the revealing truths I have discovered, by consideration, logic and investigation came from people outside of the main public arena, people who are suppressed, ridiculed, mocked and ignored.

Their information may be powerful, lead to other important information, be impeccable and easy to confirm from other public sources.

But most people live in a popular world. They are afraid to test their own ability to think, to invest time and energy to know more deeply.

What is good enough (in news) for their neighbor, is often good enough for them. Why should they make an effort to resist authority and to know a deeper truth ? Who else does this ?

So as we are shadowed by the authority of main stream, few peek outside to know that million of others have left the main stream camp and are following after revealed truth seekers.

I invite more to join us. It is exciting campaign.

## // How can the lay person radiate information ?

When I found the news to be different from the world I understand, I began to research, collect articles, proofs, evidence or the real truths. Through published books, video, radio interviews, seminars, and special programs, I began to collect facts, testimonials, witnesses and evidence of the new truths emerging as I studied them.

I speak to others privately, publicly (civic and student groups) and via letters. I share things from my library; books, video, DVD, mp3 interviews and more.

The last thing others want to know is a new version of the truth or of the news. Our lives are fast paced, complex, stressed and loaded already with so much information, concerns and anxieties, why would any person want more information, especially from some one outside the news media.

The fact that I have source evidence, a compelling story, deep documentation is not enough to gain people individual attention.

You have to make it **personal and immediate** for others to want to listen.

We each have special areas of interest and concerns, although most of those are held privately by us. For another to enter our world, they need to listen and observe and find the things that are important to us, the things that we believe, and understand how we get our information.

After being of the same skin, walk a mile in our shoes, being gentle, understanding and patient, we may attain a willing, attentive listener. Yet, should we overload them with information that is different than they know, they quickly retreat to their old friend sand habits and seal the door to our communicating with them.

We, those who have found a different world, must learn to teach. We must reach deeply to find core and important events, focus and refine our resources and present them in ways that cannot be discredited.

Most of the information that I deal with and the not popular conclusions that I reach are based on a lot of information.

Few wish to shuffle through my information as they already know the conclusions to these subjects.

It is precisely because they don't look at our information that they can hold and believe the

conclusions they have reached.

Our world is built on information.

But eliminating and or excluding information, you reach different conclusions.

Other resist the time, effort, and expense to follow our path, to the deeper information that takes them to different conclusions.

Even should they follow our path, and come to believe differently, they will soon find that others don't believe them and it is easier to fall back to what others believe then to take on the obligation to inform and changes others.

## // A prophet is not recognized in his hometown

*When you change your mind, you may lose friends.*

Change your perspective, your method or your life, sometimes old friends abandon you.

No harm. New friends are waiting to embrace the new you.

You may find that your current relationships are based on factors you had not considered, your wealth, status, humor, your looks, your influence.

Don't throw pearls to swine. Your knowledge and understanding are important. Don't abandon it. Seek those who seek truth as do you.

When you begin to see a new world, connect with different information, sources people, often old associates do not want to change. They don't have the interest, the energy, the curiosity to follow your thinking, read your new books, consider your new perspective.

I am where I am after reading hundreds of things I'd never considered before. To me, each one was an expansion of what I'd read before. But who could follow

this circuitous labyrinth of new discoveries. Just the physical energy and mental effort to do all this has been a Herculean task. Others would seek immediate and tangible rewards, applause, confirmation before making such a trek.

Others would think like me if they read what I have read.

But most are bound by what is handy, popular and of the moment.

Motivating others to read or think is tough. They did that in college, now they are just coasting, trying to hang on to all the property, material world, status and or connections they have made. They don't want to rethink, and or change. They won't say it, but they would rather live in a lie (particularly when they don't have to admit it) then spend the energy to understand the reality around them.

## // Boomerang – How long can you wait for your reward ?

Whatever we do, we often seek praise or reward, from our family, clients, community, preferably immediately.

We should just do the right thing, for our Creator, our God, under our belief system. Yet human folly is to strive for immediate reward from those with whom we are involved.

My model is throwing a boomerang. How far can you throw yours 5', 10', 100', 1 day, 10 years and still expect to get it back ?

Do a good deed, cast into the sea a note in a bottle. Don't worry about it's benefit to you. Do it in faith, place your time and energy in the hands of your Lord. Some day, in some way, good karma will come back to you. To wait and watch for your reward, expecting it, demanding it, only weaken the good you have done, it distracts you from other positive action.

*Man can do most anything so long as he doesn't care who gets the credit.*

## // World of Commerce ++ revise this chapter

***Our world is commerce, being with, in association with other people for business purposes. Search Federal Zone to realize that zip codes convert sovereign city, states and individuals to corporate persons for control by the central, incorporated, federal Government, the United States (corporation)***

Note all your government forms, court actions, utility bills all refer to you capitalizing your name. John Doe is not the same person as JOHN DOE. When your name is spelled in all capitals, you are converted from a living berthing individual to a corporate person, on which the courts, government can interact, control, tax, and manipulate you.

You need not be subject to their control, when you understand these legal situations. The strawman is another reference to the capitalization of your name. See [www.USAvsUS.info](http://www.USAvsUS.info)

When you submit a birth or marriage certificate, you have included the government in your contract. They then have total control of your produce; your incomes, your children, to educate them, indoctrinate, vaccinate,

take them from you for raising.

When you marry, it is should e contract between you, your spouse and God. You should not let the government stand in between you, making separate decisions outside of your control and knowledge.

To begin, learn of these subjects, the beginning of birth certificate records near the 1933 date when FDR declared US government was bankruptcy all US citizens were and subject to the federal government. It all ties together when you have the bigger picture. The 1917 law forbid Trading with the Enemy – to stop commerce from US firms with countries with which we were at war. That law was then amended to declare that all US citizens are enemies of the state and subject to the state, the people, all their children and future generations and all their property. Shortly after gold was confiscated and the Federal Reserve notes (currency) was no longer backed by precious metals.

Since then inflation has raged unrelentingly. Note that the value of a car and most things is the same as nearly a century ago when measured in silver dollars.

1,000 silver dollars bought a standard car then, as it will not, as a silver dollar is worth almost 20 times as much. 1,000 silver dollars is now worth \$ 20,000 in

federal reserve notes. Precious metals values stay relatively constant. The federal reserve system, sponsored and controlled by the same 13 families internationally have perverted and made near valueless our medium of exchange, the federal reserve notes. When you learn and understand this, you can avoid some problems.

Income tax, illegal in its ratification, it's laws, and it's actions are designed to steal from the public and to inflate the elite international bankers. Personal income tax does not go to the government of the united States of America, but thru the trust in Puerto Rico, to the Federal Reserve banks in Europe.

The Maine Patriot [David Everett Robinson] researched and explains the tactics of the IRS.

[Maine-Patriot.com/contents.htm](http://Maine-Patriot.com/contents.htm)

Whether we exchange conversation or do business, we need to get along with other people.

If you challenge their ideas, their assumptions their knowledge, you separate from them. Perhaps in time, with cajoling and slow gentle teaching and encouragement you could persuade them of some of your thinking, but they fall back into the world.

Other fill there head and day with common beliefs,

assumptions, chatter of current events.

Truth is important, but to state it openly, without an opportunity to explain, teach, build cases based on facts and logic, you are initially rejected to offer different view point.

Our goal is to get along with others, be compatible, exchange money, services, products.

When you bring ideas and information to the table, you slow down your relationship with others. When you offer opposing views, others begin to separate from you.

Who wants to change their world, life, ideas to satisfy a lone “conspiracy nut.” They just move on to other people.

So, lies are commerce. When you stand on truth, you soon find yourself criticized, ostracized, alone, isolated.

True, you can find and build new friends, but it is a lot easier to work with the relationships that you already have.

So you have to be silent and accepting. As the news continues to persuade, dominate, lie daily, it is near impossible to bring those you know up to speed on

the real truths.

Knowing history and truth are a very low priority in today’s fast paced world, seeing immediate and material rewards.

Who cares about the community, about tomorrow, about politics and government.

“You cannot win, They control everything, What is the sense to resist ?” Resistance is futile ! That is the primary message of big government.

But, when you study our constitution and government, you find, surprisingly, that the government was designed to serve “We the People”. We are not to be their slaves, they are to serve us.

So, we individually have to come to realize that we have the rights, the numbers (more people governed than those who govern) and the law. But we have to stand on these to prevail.

**Prepare, Persist, Prevail !**

**American Free Press** publishes a revealing newspaper. Subscribe on line for very modest cost.. They host seminars, unite their national spokes men, witness, researchers with their curious Truth Seeker audience.

**Without free speech, and a free press, we will never find the truth.** Our freedom, independence and rights are squashed, and we are enslaved. The path to freedom this begins in free speech, and free press.

The internet is the best source of information. It takes a thoughtful, patient mind to sort it out.

*". . . the testimony of the Lord is sure, making wise the simple." -- Psalm 19:7.*

---

### **Maine-Patriot.com**

The Maine Patriot [David Everett Robinson] has researched the tactics of the **IRS** and uncovered the **deceitful tricks** they use to enforce a direct income tax on you that they acknowledge is "**voluntary**" and yet demand by implied force. They utilize the principle of "Sub Silentio!"

**"Silence equals Assent;  
Failure to deny is an Admission"**
